

## News Release

# Brightspeed's Super-Fast Internet is Coming to Lima, Ohio

*Company's multi-million-dollar investment will provide high-speed internet to communities across Allen County*

CHARLOTTE, N.C. — March 19, 2024 — Brightspeed, the nation's fourth largest fiber broadband builder focused on empowering more homes with ultrafast, reliable internet, has started the fiber deployment process in and around Lima, OH.

Right now, surveying is underway to connect more than 36,000 local homes and businesses to Brightspeed Fiber Internet. Residents of Allen County will soon see construction crews in the neighborhood to bring a high-speed connectivity option to many who have lacked quality internet service.

### **What to Expect During Construction**

Brightspeed trucks will be in local neighborhoods as our crews work to bring families and businesses online. Brightspeed's highest priority is working quickly and efficiently within local communities, keeping safety at the forefront.

Customers can check for fiber availability in their area by visiting [www.brightspeed.com/brightspeed-fiber-internet/](http://www.brightspeed.com/brightspeed-fiber-internet/) and sign up to receive alerts when service is available at their location.

### **Allen County is Getting the Best in Broadband**

The Brightspeed Fiber Internet network leverages the latest XGS-PON (10-Gigabit Symmetric Passive Optical Network) technology to bring boosted gig-speed capabilities and consistent responsiveness. It will enable multi-device households to connect, work, study, stream, communicate, and game efficiently and reliably in Lima and its surrounding areas.

### **Brightspeed Fiber is More Than Just Internet**

Put simply, high-speed internet equals opportunity for households and businesses alike, and access to fast, reliable and affordable internet and Wi-Fi will help close the rural-urban digital divide. That's why Brightspeed is building its smart, fiber optics-based network in communities like Lima — so residents and business owners have the reliable connectivity they need to work, learn, play and thrive.

Brightspeed is already investing \$2 billion in deploying next-generation fiber-optic technology to build a more reliable, super-fast broadband internet network that will reach more than three million homes and businesses across 20 states. Additionally, Brightspeed is pursuing state and federal funding to augment its current fiber network build plan in Ohio to help close the digital divide across the state's counties.

### **About Brightspeed**

Headquartered in Charlotte, N.C. and with assets and associated operations in 20 states, Brightspeed provides broadband and telecommunications services through a network platform capable of serving more than 6.5 million homes and businesses. Our more than 4,000 employees are committed to building a future where more communities benefit from a more connected life, deploying a state-of-the-art fiber network and a customer experience that makes being connected as simple as it should be.
