Brightspeed Begins Fiber Internet Expansion Across Nodaway County

Construction is underway to bring high-speed, reliable internet access to rural homes and businesses

CHARLOTTE, N.C. — June 19, 2026 — Faster internet is officially on its way to Maryville! [Brightspeed](#), the nation's third-largest fiber broadband builder, is advancing its plan to invest in Nodaway County and neighboring rural communities, breaking ground to bring the nation's fastest internet* to the area and expanding access to the tools people need to thrive.

Brightspeed's state-of-the-art network will serve more than 4,400 homes and businesses in the community. It's part of the company's broader effort to connect more than 350,000 locations across the state.

What Nodaway County Can Expect During Construction

As construction gets underway, residents may notice our trucks, crews and increased activity in their neighborhoods. Crews may dig, bore underground or work on existing utility poles to connect the county to Brightspeed's state-of-the-art network. We know construction can be disruptive, but this investment is designed to deliver long-term benefits: faster internet speeds, reliable performance and the bandwidth and capacity needed for online working, learning, streaming and multi-device connectivity.

Our teams will be clearly identifiable, and efforts will be made to keep residents informed as work progresses. Once construction is complete, families and business owners can meet directly with Brightspeed representatives, who will be in the area to spread the word about the availability of Brightspeed Fiber Internet.

Check Availability & Get Connected

For Nodaway County, this investment represents more than fast speeds. It's about creating new opportunities for families who have historically been left behind.

Brightspeed offers various internet speed plans to choose from. Residents and businesses in Missouri can check if Brightspeed Fiber Internet is available in their area by visiting www.brightspeed.com.

*The fastest internet based on the average download speeds measured by highspeedinternet.com speed tests (5/19/26 --5/18/27).

*As of 6/15/2026, Brightspeed has a 4.4-star rating on [Trustpilot](#) and more than 19,000 five-star reviews
