

**We** are committed to making it easy for our customers to enjoy fast, reliable internet they can count on every day. That's why we're building a smart, fiber-optic network in cities and towns where quality, high-speed options have been limited — delivering the seamless, dependable connection people need to work, learn, play and thrive without frustration.

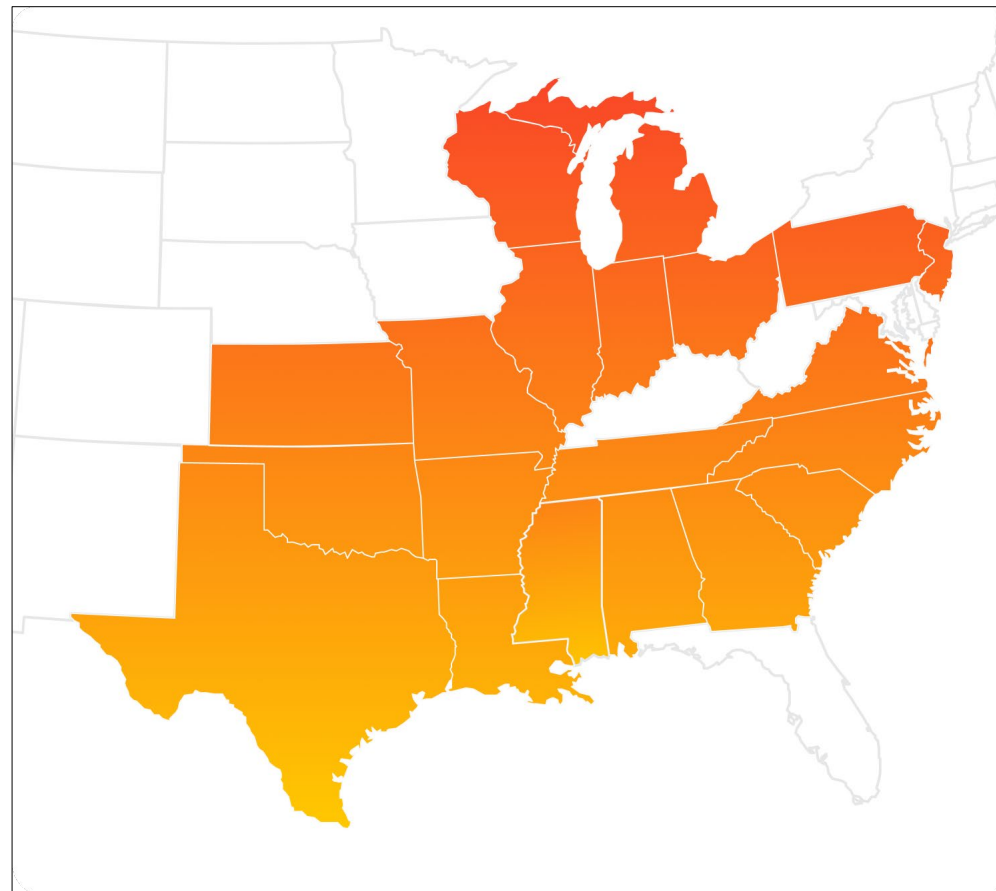

## \$ Investment

Brightspeed **multi-billion-dollar investment**

Broadband grant program awards **\$860 million\***

\*BEAD funding is provisionally awarded pending NTIA approval

## 📶 Network

Fiber passings planned **5,000,000+**

Fiber passings completed **3,000,000+**

Location capacity **7,300,000+**

States serviced **20**  
(Midwest, Southeast, parts of NJ and PA)

## 📄 Our company

Established in October 2022

Headquartered in Charlotte, North Carolina

Third-largest fiber broadband builder in U.S.

Fifth largest Incumbent Local Exchange Carrier (ILEC) in U.S.

Chief Executive Officer, Michel Combes

3,900 employees

## 🔧 Our technology

### Next generation fiber

Next generation fiber-to-the-premises (FTTP) network engineered specifically for internet access

### XGS-PON

XGS-PON with multi-gig-speed connection capability

### Wi-Fi technology

In-home/office network delivering faster speeds and lower latency than previous generations of Wi-Fi

### Speed

Symmetrical upload and download speeds with low latency and consistent response

## 💬 Our service

### Simple and efficient

Product choices without confusing bundles, plans or bills

### Reliable

Transforming the customer experience with 24/7 support

### Helpful

Delivering connectivity to communities lacking quality options
