# ACCESS SERVICE

1. Application of Service Guide

1.1 This reference guide contains conditions, rates and charges applicable to the provision of Universal Service Fund (USF), Switched Access and Special Access Services, and other miscellaneous services, hereinafter referred to collectively as service(s), provided by the issuing and concurring carriers of this service guide, hereinafter referred to as the Telephone Company, to Customer(s).

Pursuant to the Commission's Rules at Section 69.4(c), 69.5(D), 69.104(1), 69.116, 69.117, 69-603(c), and 69.603(d), regulations concerning administration and billing of Universal Service Fund, rates and charges for these carrier's carrier elements are contained in Section 8 of the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 5. The National Exchange Carrier Association, Inc. will bill and collect all Universal Service Fund charges on behalf of the Telephone Company.

1.2 The provision of such services by the Telephone Company as set forth in this service guide does not constitute a joint undertaking with the customer for the furnishing of any service.

1.3 Exceptions to the rate schedules contained in this service guide are as follows:

1.3.1 Missouri rates are applicable to Access Service customers located in the North Hopkins, Iowa exchange of United Telephone Company of Missouri.

1.3.2 Indiana rates are applicable to Access Service customers located in the Union City, Ohio exchange of United Telephone Company of Indiana, Inc.

ACCESS SERVICE

2. General Conditions

2.1 Undertaking of the Telephone Company

2.1.1 Scope

(A) The Telephone Company will provide services under this service guide only to Customers in connection with their use and/or provision of interstate communications service.

(B) The Telephone Company does not undertake to transmit messages under this service guide.

(C) The Telephone Company shall be responsible only for the installation, operation and maintenance of the services it provides.

(D) The Telephone Company will, for maintenance purposes, test its services only to the extent necessary to detect and/or clear troubles.

(E) Services are provided 24 hours daily, seven days per week, except as set forth in other applicable sections of this service guide.

(F) The Telephone Company does not warrant that its facilities and services meet standards other than those set forth in this service guide.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.2 Limitations

(A) The customer may not assign or transfer the use of services provided under this service guide; however, where there is no interruption of use or relocation of the services, such assignment or transfer may be made to:

(1) another customer, whether an individual, partnership, association or corporation, provided the assignee or transferee assumes all outstanding indebtedness for such services, and the unexpired portion of the minimum period and the termination liability applicable to such services, if any; or

(2) a court-appointed receiver, trustee or other person acting pursuant to law in bankruptcy, receivership, reorganization, insolvency, liquidation or other similar proceedings, provided the assignee or transferee assumes the unexpired portion of the minimum period and the termination liability applicable to such services, if any.

In all cases of assignment or transfer, the written acknowledgment of the Telephone Company is required prior to such assignment or transfer which acknowledgment shall be made within 15 days from the receipt of notification. All conditions contained in this service guide shall apply to such assignee or transferee.

The assignment or transfer of services does not relieve or discharge the assignor or transferor from remaining jointly or severally liable with the assignee or transferee for any obligations existing at the time of the assignment or transfer.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.2 Limitations (Cont'd)

(B) The installation, use, and restoration of services shall be in accordance with Part 64, Subpart D, of the Federal Communications Commission's Rules and shall be subject to the conditions set forth following in Section 13.3.6(A), Telecommunications Service Priority (TSP) System.

(C) Subject to compliance with the rules mentioned in (B) preceding, the services offered herein will be provided to customers on a first-come, first-served basis.

2.1.3 Liability

(A) The Telephone Company's liability, if any, for its willful misconduct is not limited by this service guide. With respect to any other claim or suit, by a customer or by any others, for damages associated with the installation, provision, preemption, termination, maintenance, repair or restoration of service, and subject to the provisions of (B) through (J) following, the Telephone Company's liability, if any, shall not exceed an amount equal to the proportionate charge for the service for the period during which the service was affected. This liability for damages shall be in addition to any amounts that may otherwise be due the customer under this service guide as a Credit Allowance for a Service Interruption.

(B) The Telephone Company shall not be liable for any act or omission of any other carrier or customer providing a portion of a service, nor shall the Telephone Company for its own act or omission hold liable any other carrier or customer providing a portion of a service

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.3 Liability (Cont'd)

(C) Reserved

(D) The Telephone Company is not liable for damages to the customer premises resulting from the furnishing of a service, including the installation and removal of equipment and associated wiring, unless the damage is caused by the Telephone Company's negligence.

(E) The Telephone Company shall be indemnified, defended and held harmless by the IC or end user against any claim, loss or damage arising from the use of services offered under this service guide. This obligation to indemnify, defend and hold harmless shall attach to the IC or the End User separately, and each shall be responsible for its own acts and omissions, including:

(1) Claims for libel, slander, invasion of privacy, or infringement of copyright arising from any communications;

(2) Claims for patent infringement arising from combining or using the service furnished by the Telephone Company in connection with facilities or equipment furnished by the end user or IC or;

(3) All other claims arising out of any act or omission of the end user or IC in the course of using services provided pursuant to this service guide.

Notwithstanding the other provisions of this Section, the Telephone Company shall be indemnified, defended and held harmless by the Customer from any and all claims by any person relating to the Customer's use of services provided under this service guide.

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.3 Liability (Cont'd)

(F) The Telephone Company is not liable for any special, incidental or consequential damages, or for commercial loss of any kind, whether or not it has been informed of the possibility of such damages.

(G) No license under patents (other than the limited license to use) is granted by the Telephone Company or shall be implied or arise by estoppel, with respect to any service offered under this service guide. The Telephone Company will defend the customer against claims of patent infringement arising solely from the use by the customer of services offered under this service guide and will indemnify such customer for any damages awarded based solely on such claims.

(H) The Telephone Company's failure to provide or maintain services under this service guide shall be excused by labor difficulties, governmental orders, civil commotions, criminal actions taken against the Telephone Company, acts of God and other circumstances beyond the Telephone Company's reasonable control, subject to the Credit Allowance for a Service Interruption as set forth in 2.4.4 following.

(I) The Telephone Company does not guarantee or make any warranty with respect to its services when used in an explosive atmosphere. The Telephone Company shall be indemnified, defended and held harmless by the customer from any and all claims by any person relating to such customer's use of services so provided.

(J) The Telephone Company will make reasonable effort to cure any material failure to provide service caused solely by year 2000 defects in Telephone Company hardware, software or systems. Due to the interdependence among telecommunications providers and the interrelationship with non-BRIGHTSPEED Operating Company processes, equipment and systems, the Telephone Company is not responsible for failures caused by circumstances beyond its control including, but not limited to, failures caused by: (1) the Customer; (2) other telecommunications providers; or (3) customer premises equipment. In addition, the Telephone Company does not ensure compatibility between Telephone Company and non-Telephone Company services used by the Customer.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.4 Provision of Services

The Telephone Company, to the extent that such services are or can be made available with reasonable effort, and after provision has been made for the Telephone Company's Telephone Exchange Services, will provide to the customer, upon reasonable notice, services offered in other applicable sections of this service guide at rates and charges specified therein.

2.1.5 Installation and Termination of Services

The Access Services provided under this service guide (A) will include any entrance cable or drop wiring and wire or intrabuilding cable to that point where provision is made for termination of the Telephone Company's outside distribution network facilities at a suitable location inside a customer-designated premises and (B) will be installed by the Telephone Company to such Point of Termination. Access Service has only one Point of Termination per customer premises. Any additional terminations beyond such Point of Termination are the sole responsibility of the customer. The Point of Termination is an inherent part of Switched and Special Access Services, therefore, the preceding does not preclude the customer's ability to have the Point of Termination moved as set forth in 6.7.5 and 7.4.5 following for Switched and Special Services, respectively.

2.1.6 Maintenance of Services

The services provided under this service guide shall be maintained by the Telephone Company. The customer or others may not rearrange, move, disconnect, remove or attempt to repair any facilities provided by the Telephone Company, other than by connection or disconnection to any interface means used, except with the written consent of the Telephone Company.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.7 Changes and Substitutions

Except as provided for equipment and systems subject to FCC Part 68 Regulations at 47 C.F.R. Section 68.110(b), the Telephone Company may, where such action is reasonably required in the operation of its business, (A) substitute, change or rearrange any facilities used in providing service under this service guide, including but not limited to, (1) substitution of different metallic facilities, (2) substitution of carrier or derived facilities for metallic facilities used to provide other than metallic facilities and (3) substitution of metallic facilities for carrier or derived facilities used to provide other than metallic facilities, (B) change minimum protection criteria, (C) change operating or maintenance characteristics of facilities or (D) change operations or procedures of the Telephone Company. In case of any such substitution, change or rearrangement, the transmission parameters will be within the range as set forth in Sections 6 and 7 following. The Telephone Company shall not be responsible if any such substitution, change or rearrangement renders any customer furnished services obsolete or requires modification or alteration thereof or otherwise affects their use or performance. If such substitution, change or rearrangement materially affects the operating characteristics of the facility, the Telephone Company will provide reasonable notification to the customer in writing. Reasonable time will be allowed for any redesign and implementation required by the change in operating characteristics. The Telephone Company will work cooperatively with the customer to determine reasonable notification requirements.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.8 Refusal and Discontinuance of Service

(A) If a customer fails to comply with the provisions set forth in this service guide, including any payments to be made by it on the dates and times therein specified, the Telephone Company may, on thirty (30) calendar days written notice, by mail or by email if the customer is billed electronically or consents to receiving electronic notification, to the person designated by that customer to receive such notice of noncompliance, refuse additional applications for service and/or refuse to complete any pending orders for service by the noncomplying customer at any time thereafter.

If the Telephone Company does not refuse additional applications for service on the date specified in the thirty (30) days notice, and the customer's noncompliance continues, nothing contained herein shall preclude the Telephone Company's right to refuse additional applications for service to the noncomplying customer without further notice.

(B) If a customer fails to comply with the provisions set forth in this service guide, including any payments to be made by it on the dates and times therein specified, the Telephone Company may, on thirty (30) calendar days written notice by Certified U.S. Mail or overnight delivery to the person designated by that customer to receive such notices of noncompliance, discontinue the provision of the services to the noncomplying customer at any time thereafter. In the case of such discontinuance, all applicable charges, including termination charges, shall become due. If the Telephone Company does not discontinue the provision of the services involved on the date specified in the thirty (30) days notice, and the customer's noncompliance continues, nothing contained herein shall preclude the Telephone Company's right to discontinue the provision of the services to the noncomplying customer without further notice.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.8 Refusal and Discontinuance of Service (Cont'd)

(C) The Telephone Company will maintain records sufficient to validate the date upon which a bill or deposit request was sent to the customer. Action specified in (A) or (B) preceding will not be taken with regard to the subject bill or subject deposit request if the customer cures the noncompliance prior to the expiration of the thirty (30) days notice period.

(D) When access service is provided by more than one Telephone Company, the Companies involved in providing the joint service may individually or collectively deny service to a customer for nonpayment. Where the Telephone Company(s) affected by the nonpayment is incapable of effecting discontinuance of service without the cooperation of the other joint providers of Switched Access Service, such other Telephone Company(s) will, if technically feasible, assist in denying the joint service to the customer. Service denial for such joint service will only include calls originating or terminating within, or transiting, the operating territory of the Telephone Company(s) initiating the service denial for nonpayment. When more than one of the joint providers must deny service to effectuate service discontinuance for nonpayment, and where a conflict exists in the applicable service guide provisions, the conditions of the end office Telephone Company shall apply for joint service discontinuance.

(E) Reserved for Future Use

(F) The provisions set forth in (A) or (B) preceding shall not apply to charges that a customer does not pay based on the submission of a good faith dispute pursuant to Section 2.4.1(B)(3)(c) following.

2.1.9 Limitation of Use of Metallic Facilities

Signals applied to a metallic facility shall conform to the limitations set forth in Technical Reference Publication PUB AS No. 1.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.10 Notification of Service-Affecting Activities

The Telephone Company will provide the customer reasonable notification of service-affecting activities that may occur in normal operation of its business. Such activities may include, but are not limited to, equipment or facilities additions, removals or rearrangements, routine preventative maintenance and major switching machine change-out. Generally, such activities are not individual customer service specific, they affect many customer services. No specific advance notification period is applicable to all service activities. The Telephone Company will work cooperatively with the customer to determine reasonable notification requirements.

2.1.11 Coordination with Respect to Network Contingencies

The Telephone Company intends to work cooperatively with the customer to develop network contingency plans in order to maintain maximum network capability following natural or man-made disasters which affect telecommunications services.

2.1.12 Reserved

2.1.13 Representation

The Telephone Company does not represent that its facilities will meet standards other than those set forth in Sections 6, 7, 8 and 12 of this service guide.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.1 Undertaking of the Telephone Company (Cont'd)

2.1.14 Metropolitan Statistical Area Access Service and Competitive Services

When switched dedicated services are provided in a Metropolitan Statistical Area (MSA) for which the Telephone Company has been granted Phase II pricing flexibility pursuant to Subpart H of Part 69 of the Commission's Rules, the conditions, rates and charges set forth in Sections 21 and 23 of this service guide will apply. Switched dedicated services provided in areas for which pricing flexibility has not been granted will be governed by the conditions, rates and charges set forth in Sections 5, 6, and 13 of the BRIGHTSPEED LOCAL OPERATING COMPANIES Tariff F.C.C. No. 4. Special Access services provided in areas deemed Competitive will be governed by the conditions, rates and charges set forth in Sections 5, 7, 13 and 22 of this ISG. Special Access Non-Competitive End User Channel Terminations will be governed by the conditions, rates and charges set forth in Sections 5, 7 and 13 of the BRIGHTSPEED LOCAL OPERATING COMPANIES Tariff F.C.C. No 4.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.2 Use

2.2.1 Interference or Impairment

(A) The characteristics and methods of operation of any circuits, facilities or equipment provided by other than the Telephone Company and associated with the facilities utilized to provide services under this service guide shall not interfere with or impair service over any facilities of the Telephone Company, its affiliated companies, or its connecting and concurring carriers involved in its services, cause damage to their plant, impair the privacy of any communications carried over their facilities or create hazards to the employees of any of them or the public.

(B) Except as provided for equipment or systems subject to the FCC Part 68 Rules in 47 C.F.R. Section 68.108, if such characteristics or methods of operation are not in accordance with (A) preceding, the Telephone Company will, where practicable, notify the customer that temporary discontinuance of the use of a service may be required; however, where prior notice is not practicable, nothing contained herein shall be deemed to preclude the Telephone Company's right to temporarily discontinue forthwith the use of a service if such action is reasonable under the circumstances. In case of such temporary discontinuance, the customer will be promptly notified and afforded the opportunity to correct the condition which gave rise to the temporary discontinuance. During such period of temporary discontinuance, credit allowance for service interruptions as set forth in 2.4.4 (A) and (B) following is not applicable.

2.2.2 Unlawful Use

The service provided under this service guide shall not be used for an unlawful purpose.

2. General Conditions (Cont'd)

2.3 Obligations of the Customer

2.3.1 Damages

The customer shall reimburse the Telephone Company for damages to Telephone Company facilities utilized to provide services under this service guide caused by the negligence or willful act of the customer, or resulting from the customer's improper use of the Telephone Company facilities, or due to malfunction of any facilities or equipment provided by other than the Telephone Company. Nothing in the foregoing provision shall be interpreted to hold one customer liable for another customer's actions. The Telephone Company will, upon reimbursement for damages, cooperate with the customer in prosecuting a claim against the person causing such damage and the customer shall be subrogated to the right of recovery by the Telephone Company for the damages to the extent of such payment.

2.3.2 Ownership of Facilities and Theft

Facilities utilized by the Telephone Company to provide service under the provisions of this service guide shall remain the property of the Telephone Company. Such facilities shall be returned to the Telephone Company by the customer, whenever requested, within a reasonable period following the request in as good condition as reasonable wear will permit.

2.3.3 Equipment Space and Power

The customer shall furnish or arrange to have furnished to the Telephone Company, at no charge, equipment space and electrical power required by the Telephone Company to provide services under this service guide at the points of termination of such services. The selection of ac or dc power shall be mutually agreed to by the customer and the Telephone Company. The customer shall also make necessary arrangements in order that the Telephone Company will have access to such spaces at reasonable times for installing, testing, repairing or removing Telephone Company Services.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.4 Availability for Testing

The services provided under this service guide shall be available to the Telephone Company at times mutually agreed upon in order to permit the Telephone Company to make tests and adjustments appropriate for maintaining the services in satisfactory operating condition. Such tests and adjustments shall be completed within a reasonable time. No credit will be allowed for any interruptions involved during such tests and adjustments.

2.3.5 Balance

All signals for transmission over the services provided under this service guide shall be delivered by the customer balanced to ground except for ground start, duplex (DX) and McCulloh-Loop (Alarm System) type signaling.

2.3.6 Design of Customer Services

Subject to the provisions of 2.1.7 preceding, the customer shall be solely responsible, at its own expense, for the overall design of its services and for any redesigning or rearrangement of its services which may be required because of changes in facilities, operations or procedures of the Telephone Company, minimum protection criteria or operating or maintenance characteristics of the facilities.

2.3.7 References to the Telephone Company

The customer may advise end users that certain services are provided by the Telephone Company in connection with the service the customer furnishes to end users; however, the customer shall not represent that the Telephone Company jointly participates in the customer's services.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.8 Claims and Demands for Damages

(A) With respect to claims of patent infringement made by third persons, the customer shall defend, indemnify, protect and save harmless the Telephone Company from and against all claims arising out of the combining with, or use in connection with, the services provided under this service guide, any circuit, apparatus, system or method provided by the customer.

(B) The customer shall defend, indemnify and save harmless the Telephone Company from and against any suits, claims, losses or damages, including punitive damages, attorney fees and court costs by third persons arising out of the construction, installation, operation, maintenance, or removal of the customer's circuits, facilities, or equipment connected to the Telephone Company's services provided under this service guide, including, without limitation, Workmen's Compensation claims, actions for infringement of copyright and/or unauthorized use of program material, libel and slander actions based on the content of communications transmitted over the customer's circuits, facilities or equipment, and proceedings to recover taxes, fines, or penalties for failure of the customer to obtain or maintain in effect any necessary certificates, permits, licenses, or other authority to acquire or operate the services provided under this service guide; provided, however, the foregoing indemnification shall not apply to suits, claims, and demands to recover damages for damage to property, death, or personal injury unless such suits, claims or demands are based on the tortious conduct of the customer, its officers, agents or employees.

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.8 Claims and Demands for Damages (Cont'd)

(C) The customers shall defend, indemnify and save harmless the Telephone Company from and against any suits, claims, losses or damages, including punitive damages, attorney fees and court costs by the customer or third parties arising out of any act or omission of the customer in the course of using services provided under this service guide.

2.3.9 Sectionalization - Trouble Reporting

The customer will be responsible for reporting troubles, sectionalized to Telephone Company facilities and/or equipment. When troubles cannot be clearly sectionalized to the Telephone Company facilities and/or equipment, the Telephone Company will test cooperatively or independently to assist in trouble sectionalization. Additional charges, as set forth in Section 13, are applicable for cooperative or independent testing performed by the Telephone Company.

2.3.10 Coordination with Respect to Network Contingencies

The customer shall, in cooperation with the Telephone Company, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters which affect telecommunications services.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.11 Jurisdictional Report Requirements

(A) Percent Interstate Usage (PIU)

(1) Pursuant to Federal Communications Commission order F.C.C. 85-145 adopted April 16, 1985, interstate usage is to be developed as though every call that enters a customer network at a point within the same state as that in which the called station (as designated by the called station number) is situated is an intrastate communication and every call for which the point of entry is in a state other than that where the called station (as designated by the called station number) is situated is an interstate communication.

(2) The projected interstate percentages will be used by the Telephone Company to apportion the usage between interstate and intrastate until a revised report is received as set forth in (B)(7) following.

(3) Reserved

(B) Jurisdictional Reports

The Telephone Company developed PIU will be determined at a statewide level. When the access minutes are measured, the interstate percentage will be developed on a quarterly basis by dividing the measured interstate originating or terminating access minutes (the access minutes where the calling number is in one state and the called number is in another state) by the total measured originating and terminating access minutes. The Telephone Company will begin to utilize the Telephone Company PIU factors as soon as sufficient call detail is available, and will implement subsequent Telephone Company developed PIU factors on a quarterly basis.

2.3.11 Jurisdictional Report Requirements (Cont'd)

(B) Jurisdictional Reports (Cont'd)

(10) Entrance Facility and Direct-Trunked Transport (Cont'd)

(a) When an Entrance Facility is provided for both interstate and intrastate Switched Access, the customer must provide a Switched Access Entrance Facility PIU factor on a serving wire center or study area level. The Entrance Facility PIU must account for all Switched Access originating and terminating usage carried over the Entrance Facility.

(b) When Direct-Trunked Transport is provided for both interstate and intrastate Switched Access, the customer must provide a Switched Access Direct-Trunked Transport PIU factor on a study area level. The Direct-Trunked Transport PIU must account for all Switched Access originating and terminating usage carried over the Direct-Trunked Transport facilities.

(c) If the customer does not provide a Switched Access PIU factor for an Entrance Facility or Direct-Trunked Transport as set forth in (a) and (b) above, the Telephone Company will develop a PIU for the Entrance Facility and Direct-Trunked Transport using the most current representative period.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.11 Jurisdictional Report Requirements (Cont'd)

(B) Jurisdictional Reports (Cont'd)

(10) Entrance Facility and Direct-Trunked Transport (Cont'd)

The Entrance Facility and Direct-Trunked Transport PIU Report must be provided to the Telephone Company upon ordering service, and thereafter, on a quarterly basis. Provisions for updating the interstate and intrastate jurisdictional report as specified in Section 2.3.11(B)(7) preceding will also apply for the Entrance Facility and Direct-Trunked Transport PIU Report.

The verification provisions specified in Section 2.3.11(C) following will also apply for the Entrance Facility and Direct-Trunked Transport PIU Report.

(C) Jurisdictional Report Verification

If the Telephone Company disputes the reasonableness of the PIU provided by the customer as set forth in (B) preceding, or the reported PIU varies by more than five percentage points over the preceding PIU, the Telephone Company may ask the customer to provide the data used by the customer to determine the projected interstate percentage. The customer shall retain, for a minimum of one year, accurate call detail records from which the percentage of interstate and intrastate use can be derived, and shall make such records available for inspection as reasonably necessary for PIU verification. Such records shall be made available for inspection and audit within 15 days of the Telephone Company's request for verification.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.11 Jurisdictional Report Requirements (Cont'd)

(C) Jurisdictional Report Verification (Cont'd)

The Telephone Company shall limit audits to no more than one per year, except where additional audits may be required to verify allocation changes which represent a five percent shift from the customer's most recent reported figures, and such change is not the result of seasonal shifts or other identifiable reasons. The customer may request that verification audits be conducted by an independent auditor. In such cases the associated auditing expenses will be paid by the customer.

In the event that the customer fails to provide adequate records to enable the Telephone Company or an independent auditor to conduct an audit verifying the customer's PIU, the Telephone Company will bill the usage for all the contested periods using the PIU reported by the customer for the previous period. This PIU will remain in effect until the customer provides the call detail records from which the percentage of interstate and intrastate use can be derived. No prorating or back billing will be done based on the newly derived factor.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.12 Determination of Interstate Charges for Mixed Interstate and Intrastate Access Service

When mixed interstate and intrastate Access Service is provided, all charges (i.e., nonrecurring and monthly) including optional features charges, will be prorated between interstate and intrastate. The percentage provided in the reports as set forth in 2.3.11 preceding will serve as the basis for prorating the charges. The percentage of an Access Service to be charged as interstate is applied in the following manner:

(A) For monthly and nonrecurring chargeable rate elements multiply the percent interstate use times the quantity of chargeable elements times the stated service guide rate per element.

(B) For usage sensitive (i.e., access minutes, calls, and queries) chargeable rate elements, multiply the percent interstate use times actual use (i.e., measured or Telephone Company assumed average use) times the stated rate.

The interstate percentage will change as revised usage reports are submitted as set forth in 2.3.11 preceding.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.13 Certification of Special Access Lines as Interstate

(A) Interstate Classification Requirement

Pursuant to Federal Communications Commission Order FCC 89-224, adopted June 29, 1989 and released July 20, 1989, special access lines are to be classified as interstate when the lines carry more than a de minimis amount of interstate traffic. Interstate traffic is deemed de minimis when the interstate traffic amounts to ten percent (10%) or less of the total traffic on a special access line.

(B) Certification Requirement

When a customer orders a special access line, the customer shall certify, in its order, that the special access line carries interstate traffic and the interstate traffic is more than ten percent (10%) of the total traffic carried on the special access line.

The Telephone Company will provide written notification of the certification requirement to customers with existing special access lines. Existing customers must certify in writing, within 90 days of the effective date of this service guide, that the special access line carries greater than ten percent interstate traffic.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.3 Obligations of the Customer (Cont'd)

2.3.13 Certification of Special Access Lines as Interstate (Cont'd)

(C) Verification Information

If a billing dispute arises or a regulatory commission questions the interstate certification for the special access line, the Telephone Company will ask the customer to provide the general information on system design and functionality it uses to determine that the special access line's interstate traffic is more than ten percent (10%) of the total traffic carried on the special access line. If the customer has usage information which it uses to verify the interstate traffic, the customer shall supply such information when requested by the Telephone Company. The customer shall supply the data within 30 days of the Telephone Company request.

(D) Nonrecurring Charges and Penalties

Customers of Mixed Use Special Access Service will not incur a nonrecurring charge in accordance with Section 7.4.1 (C)(3) of this service guide, nor any penalty for changes made to jurisdictional use of the line.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances

2.4.1 Payment of Rates, Charges and Deposits

(A) The Telephone Company will, in order to safeguard its interests, only require a customer which has a proven history of late payments to the Telephone Company or does not have established credit, to make a deposit as a guarantee of the payment of rates and charges. Such deposit may be required prior to establishing a service or at any time after the provision of a service to the customer. For purposes of this section, a proven history of late payments is defined as two (2) or more occasions within the preceding twelve (12) months in which payment for undisputed charges was not received within three (3) business days following the payment due date, provided the outstanding undisputed amount of each such individual unpaid bill represented at least ten (10) percent of the total charges on that individual bill. The Telephone Company will provide notice via overnight delivery to the person designated by the customer to receive such notice of the requirement to pay a deposit. The customer will be required to make payment of such deposit prior to the provision of service in those cases where the customer has not established credit with the Telephone Company, or otherwise within fifteen (15) business days of such notice. Such notice period will start the day after the notice is sent by overnight delivery.

For new service(s) being established, such deposit will not exceed the estimated rates and charges for a two month period. For existing service(s), such deposit will not exceed the actual rates and charges for a two month period associated with each individual bill that met the criteria for late payments specified preceding. The fact that a deposit has been made in no way relieves the customer from complying with the Telephone Company's conditions as to prompt payment of bills. At such time as the provision of the service to the customer is terminated, the amount of the deposit will be credited to the customer's account and any credit balance which may remain will be refunded.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances

2.4.1 Payment of Rates, Charges and Deposits

(A) Cont'd

Such a deposit may be refunded or credited to the account when the customer has established credit or, in any event, after the customer has established a one-year prompt payment record at any time prior to the termination of the provision of the service to the customer. In case of a cash deposit, for the period the deposit is held by the Telephone Company, the customer will receive interest at the same percentage rate as that set forth in (B)(3)(b)(I) or in (B)(3)(b)(II), whichever is lower. The rate will be compounded daily for the number of days from the date the customer deposit is received by the Telephone Company to and including the date such deposit is credited to the customer's account or the date the deposit is refunded by the Telephone Company. Should a deposit be credited to the customer's account, as indicated above, no interest will accrue on the deposit from the date such deposit is credited to the customer's account.

No such deposit will be required of a customer which is a successor of a company which has established credit and has no history of late payments to the Telephone Company.

(B) The Telephone Company shall bill on a current basis all charges incurred by and credits due to the customer under this service guide attributable to services, including, but not limited to, Maintenance of Service as set forth in 13.1.9 following, established or discontinued during the preceding billing period. In addition, the Telephone Company shall bill in advance charges for all services to be provided during the ensuing billing period (e.g., Special Access and Switched Access Entrance Facility, Direct-Trunked Transport and Multiplexing) and for the Federal Government which will be billed in arrears. The bill day (i.e., the billing date of a bill for a customer for Access Service under this service guide), the period of service each bill covers and the payment date will be as follows:

2.4.1 Payment of Rates, Charges and Deposits (Cont'd)

(B) (Cont'd)

(2) The Telephone Company will establish a bill day each month for each customer account. The bill will cover charges for the billing period for which the bill is rendered, plus any known unbilled charges and adjustments for prior periods. The billing period for usage shall be the last bill day through one day before the current bill day. Payment for such bills is due as set forth in (3) following. If payment is not received by the payment date, as set forth in (3) following in immediately available funds, a late payment penalty will apply as set forth in (3) following.

(3) (a) All bills dated as set forth in (2) preceding for service provided to the customer by the Telephone Company are due 31 days (payment date) after the bill date, or by the next bill date (i.e., the same date in the following month as the bill date), whichever is the shortest interval, except as provided herein, and are payable in immediately available funds. In the event that the Telephone Company renders the bill more than ten (10) days after the normal billing date, the Telephone Company will extend the payment date by one day for each day in excess of ten (10) until the bill is rendered. The date the bill is rendered will be considered to be the date the bill is post marked. If such payment date would cause payment to be due on a Saturday, Sunday or Holiday (i.e., New Year's Day, Independence Day, Labor Day, Thanksgiving

2.4.1 Payment of Rates, Charges and Deposits (Cont'd)

(C) Adjustments for the quantities of services established or discontinued in any billing period beyond the minimum period set forth for services in other sections of this service guide will be prorated to the number of days or major fraction of days based on a 30 day month.

**(**D) The Telephone Company will furnish sufficient supporting detail (e.g., type of charge, service type, invoice number, account number, adjustments, and payments) with bills rendered for access services to enable the customer to verify the accuracy of such bills.

(E) When a rate as set forth in this tariff is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).

(F) When more than one copy of a customer bill for services provided under the provisions of this service guide is furnished to the customer, an additional charge applies for each additional copy of the bill as set forth in 13.3.4 following.

(G) Recovery Fees

(1) Federal Regulatory Recovery Fee (FRRF)

A Federal Regulatory Recovery Fee (FRRF) of 4.05% will be applied to interstate and international **telecommunication services charges (including but not limited to voice, usage and non-usage charges)**. **The** fee**s** help recover the amount paid to the federal government for regulatory costs and telecommunication services for the hearing-impaired. (T) | (T)

(2) Cost Recovery Fee (CRF)

A Cost Recovery Fee of 5.10% will be applied to the total interstate and international (including usage and non-usage charges), and other network related services. The fee recovers costs incurred by Brightspeed for payment of fees, property taxes, and use of public and private rights-of-way.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.2 Minimum Period

The minimum period for which services are provided and for which rates and charges are applicable is one month except for those services set forth in 7.2.12, 7.4.3, 9.4(A) and 13.1.10 following.

The minimum period for which service is provided and for which rates and charges are applicable for a Specialized Service or Arrangement provided on an individual case basis, as set forth in 12 following, is one month unless a different minimum period is established with the individual case filing.

When a service is discontinued prior to the expiration of the minimum period, charges are applicable, whether the service is used or not, as follows:

(A) When a service with a one month minimum period is discontinued prior to the expiration of the minimum period, a one month charge will apply at the rate level in effect at the time service is discontinued.

(B) When a service with a minimum period greater than one month is discontinued prior to the expiration of the minimum period, the applicable charge will be the lesser of (1) the Telephone Company's total nonrecoverable costs less the net salvage value for the discontinued service or (2) the total monthly charges, at the rate level in effect at the time service is discontinued, for the remainder of the minimum period.

2.4.3 Cancellation of an Order for Service

Provisions for the cancellation of an Access Order for Switched Access or Special Access service are set forth in 5.2.4 following.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions

(A) General

A service is interrupted when it becomes unusable to the customer because of a failure of a facility component used to furnish service under this service guide or in the event that the protective controls applied by the Telephone Company result in the complete loss of service by the customer as set forth in 6.5.1 following. For Special Access Digital Data Access and High Capacity Services, any period during which the error performance is below that specified for the service will be considered as an interruption. Except as otherwise provided, an interruption period starts when an inoperative service is reported to the Telephone Company, and ends when the service is operative.

For purposes of administering the following conditions a "major fraction" means more than half of the incremental credit period using the unit of time in which the service interruption is measured, i.e., 30 seconds, 5 minutes. For example, a major fraction for a 30 minute period equals 16 minutes and for a 5 minute period equals 2 minutes and 31 seconds.

(B) When A Credit Allowance Applies

In case of an interruption to any service, allowance for the period of interruption, if not due to the negligence of the customer, shall be as follows:

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(1) For the following services, no credit shall be allowed for an interruption of less than thirty (30) minutes.

Switched Access OptiPoint Services
Special Access Voice Grade Services
Special Access Digital Data Services
Special Access Fractional DS1 Services
Special Access Monthly Program Audio Services
Special Access Monthly Video Services
Special Access 270 Mbps Digital Video Transport Service
Special Access OptiPoint Services
Frame Relay 56.0/64.0 kbps UNI Port Connection

The customer shall be credited for an interruption of thirty (30) minutes or more at the rate of 1/1,440 of the monthly charge for the service for each period of thirty (30) minutes or major fraction thereof that the interruption continued from the time that an interruption period starts.

The monthly charges used to determine the credit shall be as follows:

(a) For two-point services, the monthly charge shall be the total of all the monthly rate element charges associated with the service (i.e., Channel Termination(s), Channel Mileage, optional features and functions, and, when applicable, surcharge for Special Access Service).

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(1) (Cont'd)

(b) For multipoint services, the monthly charge shall be the total of all the monthly rate element charges associated with that portion of the service that is inoperative between the Hub and a customer premises (i.e., Channel Termination(s), Channel Mileage, optional features and functions, and, when applicable, surcharge for Special Access Service).

(c) For multiplexed services, the monthly charge shall be the total of all the monthly rate element charges associated with that portion of the service that is inoperative. When the facility which is multiplexed or the multiplexer itself is inoperative, the monthly charge shall be the total of all the monthly rate element charges associated with the service (i.e., Channel Termination(s), Channel Mileage, optional features and functions, and, when applicable, surcharge for Special Access Service). When the service which rides a channel of the multiplexed facility is inoperative, the monthly charge shall be the total of all the monthly rate element charges associated with that portion of the service from the Hub to a customer premises (i.e., Channel Termination(s), Channel Mileage, optional features and functions, and, when applicable, surcharge for Special Access Service).

(d) For Program Audio and Video multipoint services, the credit for the monthly charges includes the charges for the distribution amplifier only when the distribution amplifier is inoperative.

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(2) For Program Audio and Video Special Access Services provided on a daily basis and 270 Mbps Digital Video Transport Service on a per event basis, no credit shall be allowed for an interruption of less than 30 seconds. The customer shall be credited for an interruption of 30 seconds or more as follows:

(a) For two-point services, when daily rates are applicable, the credit shall be at the rate of 1/288 of the daily charges for the service for each period of 5 minutes or major fraction thereof that the interruption continues. For 270 Mbps Digital Video Transport Service where the per event rates are applicable, the credit shall be at the rate of 1/288 of the per event charges for each period of 5 minutes or major fraction thereof that the interruption continues, not to exceed the total per event rate.

(b) For multipoint services, when daily rates are applicable, the credit shall be at the daily rate of 1/288 of the daily charges for all Channel Terminations, Channel Mileages and optional features and functions that are inoperative for each period of 5 minutes or major fraction thereof that the interruption continues.

(c) For multipoint services, the credit for the daily charges includes the charges for the distribution amplifier only when the distribution amplifier is inoperative.

(d) When two or more interruptions occur during a period of 5 consecutive minutes, such multiple interruptions shall be considered as one interruption.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(3) Reserved

(4) The credit allowance(s) for an interruption or for a series of interruptions shall not exceed any applicable monthly rate or assumed minutes of use charge for the service interrupted in any one monthly billing period.

(5) Service interruptions for Specialized Service or Arrangements provided under the provisions of Section 12 following shall be administered in the same manner as those set forth in this section unless other conditions are specified with the individual case filing.

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(6) Service Performance Maintenance Guarantee

The credit for a service interruption, which applies to the following services, is set forth in the charts below based on the duration of the outage.

Switched Access STS1 Entrance Facility
Switched Access STS1 Direct-Trunked Transport
Special Access DS1 High Capacity Services
Special Access DS3 High Capacity Services
Special Access STS1 High Capacity Services

Frame Relay DS1 level and above UNI Port Connection
Frame Relay DS1 level and above NNI Port Connection
ATM UNI Port Connections
ATM NNI Port Connections
ATM Interoffice Mileage

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(6) Service Performance Maintenance Guarantee (Cont'd)

| Duration of Service Outage | Service Maintenance Credit Percentage ** |
|---|---|
| 180-239 minutes | 10% |
| 240-479 minutes | 25% |
| 480 minutes or greater | 50% |

The credit shall be applied to each rate element associated with the interrupted facility (e.g., channel termination, channel mileage, and optional features and functions;) and shall be credited at the rate, less any discount, in effect on the day the outage is reported by the customer. The credits shall not exceed the monthly rate, less any discount, for the facility interrupted in any one monthly billing period.

(7) SONET Performance Maintenance Guarantee

For Shared SONET Ring Services, no credit shall be allowed for an interruption of less than one minute. If covered facilities fail for one minute or more, the customer will be credited 100% of the monthly recurring charges associated with the interrupted facility.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(B) When A Credit Allowance Applies (Cont'd)

(7) SONET Performance Maintenance Guarantee (Cont'd)

The credit shall be applied to each rate element associated with the interrupted facility (i.e., customer node, customer configuration interface, central office node, central office configuration interface, local channel, alternate central office channel, interoffice channel, internodal channel, intraoffice channel, central office node configuration interface capacity reallocation, customer node configuration interface capacity reallocation) and shall be credited at the rate in effect on the day the outage is reported by the customer. The credits will apply no more than once per month and the total of all credits shall not exceed the monthly rate for the facility interrupted in any one monthly billing period.

(C) When a Credit Allowance Does Not Apply

No credit allowance will be made for:

(1) Interruptions caused by the negligence of the customer.

(2) Interruptions of a service due to the failure of equipment or systems provided by the customer or others.

(3) Interruptions of a service during any period in which the Company is not afforded access to the premises where the service is terminated.

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(C) When a Credit Allowance Does Not Apply (Cont'd)

(4) Interruptions of a service when the customer has released that service to the Telephone Company for maintenance purposes, to make rearrangements, or for the implementation of an order for a change in the service during the time that was negotiated with the customer prior to the release of the service. Thereafter, a credit allowance as set forth in (B) preceding applies.

(5) Interruptions of a service which continue because of the failure of the customer to authorize replacement of any element of special construction, as set forth in Section 14, Special Construction, of this service guide. The period for which no credit allowance is made begins on the seventh day after the customer receives the Telephone Company's written notification of the need for such replacement and ends on the day after receipt by the Telephone Company of the customer's written authorization for such replacement.

(6) Periods when the customer elects not to release the service for testing and/or repair and continues to use it on an impaired basis.

(7) Periods of temporary discontinuance as set forth in 2.2.1(B) preceding.

(8) Periods of interruption as set forth in 13.1.9 following.

(9) An interruption or a group of interruptions, resulting from a common cause, for amounts less than one dollar.

(10) During a declared national emergency, where priority installation of National Security Emergency Preparedness (NSEP) telecommunications services shall take precedence.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.4 Credit Allowance for Service Interruptions (Cont'd)

(C) When a Credit Allowance Does Not Apply (Cont'd)

No credit allowance will be made for:

(11) During natural disasters, work stoppages, civil disturbances, criminal actions; or by fire, flooding or other occurrences attributed to an Act of God, or other causes beyond the Telephone Company's reasonable control.

(12) If a planned or scheduled outage for maintenance, upgrades and enhancements take place.

(13) When the service outage is caused by the failure of customer provided terminal equipment or failure caused by the customer at a single point of entrance on the SONET OC Ring.

(14) Interruptions of a service due to the failure of facilities or equipment provided by connecting carriers.

(D) Use of an Alternative Service Provided by the Telephone Company

Should the customer elect to use an alternative service provided by the Telephone Company during the period that a service is interrupted, the customer must pay the service guide rates and charges for the alternative service used.

(E) In certain instances, the Customer may be requested to surrender a service for purposes other than maintenance, testing or activity relating to a service order. If the Customer consents, a credit allowance will be granted. The credit allowance will be determined in the same manner as a credit for service interruptions as set forth in Section 2.4.4(B). In no case will the credit allowance exceed the monthly rate for the service surrendered in any one monthly billing period.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.5 Customer Bill Verification

Upon reasonable notice, the customer, or its duly authorized representatives, shall have the right of access to mutually agreed upon Telephone Company information and records as may be necessary to verify the accuracy of access bills rendered to the customer in connection with Access Services provided under this service guide.

2.4.6 Reestablishment of Service Following Fire, Flood or Other Occurrence

(A) Nonrecurring Charges Do Not Apply

Charges do not apply for the reestablishment of service following a fire, flood or other occurrence attributed to an Act of God provided that:

(1) The service is of the same type as was provided prior to the fire, flood and other occurrence.

(2) The service is for the same customer.

(3) The service is at the same location on the same premises.

(4) The reestablishment of service begins within 60 days after Telephone Company service is available. (The 60 day period may be extended a reasonable period if the renovation of the original location on the premises affected is not practical within the allotted time period.)

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.6 Reestablishment of Service Following Fire, Flood or Other Occurrence (Cont'd)

(B) Nonrecurring Charges Apply

Nonrecurring Charges apply for establishing service at a different location on the same premises or at a different premises pending reestablishment of service at the original location.

2.4.7 Title or Ownership Rights

The payment of rates and charges by customers for the services offered under the provisions of this service guide does not assign, confer or transfer title or ownership rights to proposals or facilities developed or utilized, respectively, by the Telephone Company in the provision of such services.

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved

When ordering, rating and billing of Access Services under this service guide involves more than one Exchange Telephone Company or rate schedule, the Telephone Companies involved will mutually agree upon one of the billing methods as set forth in (A) or (B) following based upon the interconnection arrangements between the Telephone Companies and the availability of measurement capability.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

The Telephone Company will notify the customer which billing method will be used when the customer orders Access Service. In addition, the Telephone Company will provide the customer written notice of a change in billing method no later than 30 days prior to the implementation of such change.

The billing methods set forth in (B) following are applicable to interconnection arrangements between Exchange Telephone Companies involved in the provision of all Access Services, with the exception of those instances where the provisions of (A) are available.

In accordance with the Federal Communications Commission's Memorandum Opinion and Order in CC Docket No. 86-106, adopted July 20, 1987, the Telephone Company will adhere to the standards set forth in the Multiple Exchange Carrier Access Billing (MECAB) and the Multiple Exchange Carrier Ordering and Design (MECOD) Guidelines when providing access service under Multiple Company (Interconnection Point) Billing arrangements. These documents are available for customer inspection as set forth in the *Reference to Other Publications* section of this service guide.

The Exchange Telephone Companies involved in providing the Access Service, will develop a mutually agreeable working arrangement to allow one of the Exchange Telephone Companies to perform "Access Service Coordination" (ASC) for all services requested.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(A) Reserved

(B) Multiple Company (Interconnection Point) Billing

When an Access Service ordered by a customer involves more than one Exchange Telephone Company or rate schedule, the Exchange Telephone Companies involved will agree upon one of the following billing methods:

Single Bill Method: The Exchange Telephone Companies involved will mutually agree upon a "billing company" which will render the bill for the Access Service provided. The designated billing company will perform the "Access Service Coordination" (ASC) function for the service requested, determine the applicable charges, and bill the customer for the entire service in accordance with its Access Service provisions in this service guide. The designated billing company will be billed by the other Exchange Telephone Companies involved for the portion of the Access Service they provide.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(B) Multiple Company (Interconnection Point) Billing (Cont'd)

Multiple Bill Method: Each Exchange Telephone Company involved will provide the portion of the service in its operating territory and bill the customer in accordance with its Access service guide.

(1) Reserved

(2) Each Exchange Telephone Company will provide the portion of the Transport element in its operating territory to an interconnection point with another Exchange Telephone Company and will bill the charges in accordance with its Access Service provisions in this service guide. The rate for the Transport element will be determined as set forth in (8) following. All other appropriate charges in each Exchange Telephone Company service guide are applicable.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(B) Multiple Company (Interconnection Point) Billing (Cont'd)

(3) When a Special Access Service utilized for connection with Switched Access Service is ordered and a Transport element applies (i.e., the WATS serving office and the end user customer end office are not coterminous) and one end of the Transport element is in the Telephone Company operating territory and the other end is in another Exchange Telephone Company operating territory, the Exchange Telephone Company in whose operating territory the end office is located must receive the order from the customer. In addition, the Exchange Telephone Company in whose operating territory the WATS Serving Office is located must also receive a copy of the order from the customer. Each Exchange Telephone Company will provide the portion of the Transport element in its operating territory to an interconnection point with another Exchange Telephone Company and will bill the charges in accordance with its Access Service provisions in this service guide. The rate for the Transport element will be determined as set forth in (8) following. All other appropriate charges in each Exchange Telephone Company service guide are applicable.

(4) When a Special Access Service is ordered by a customer where one end of the Channel Mileage is in the Telephone Company operating territory and the other end is in another Exchange Telephone Company operating territory, except for Special Access Service provided with the use of Hubs, either of the Exchange Telephone Companies may receive the order from the customer. In addition, the other Exchange Telephone Company must receive a copy of the order from the customer. Each Exchange Telephone Company will provide the portion of the Channel Mileage element in its operating territory to an interconnection point (IP) with another Exchange Telephone Company and will bill the charges in accordance with its Access Service provisions in this service guide. The rate for the Channel Mileage element will be determined as set forth in (8) following. All other appropriate charges in each Exchange Telephone Company tariff or service guide are applicable.

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(B) Multiple Company (Interconnection Point) Billing (Cont'd)

(5) When a Special Access Service involving a Hub is ordered by a customer where one end of the Channel Mileage element is in an Exchange Telephone Company operating territory and the Hub is in another Exchange Telephone Company operating territory, the Exchange Telephone Company in whose operating territory the Hub is located must receive the order from the customer. In addition, The Exchange Telephone Company in whose operating territory a customer premises is located must receive copies of the order from the customer. Each Exchange Telephone Company will provide the portion of the Channel Mileage element in its operating territory to an interconnection point (IP) with another Exchange Telephone Company and will bill the charges in accordance with its Access Service provisions. The rate for the Channel Mileage element will be deter-mined as set forth in (8) following. All other appropriate charges in each Exchange Telephone Company service guide are applicable.

(6) When a Special Access Service utilized for connection with Switched Access Service is ordered and a Transport element applies and both ends or one end and an interconnection point of the Transport element are in the same Telephone Company operating territory and same exchange but in different states which have different rate schedules, the Telephone Company will accept the order in the state where the WATS Serving Office is located. The Telephone Company will provide the service ordered and will bill the portion of the service in each state in accordance with the rate schedule for that state. An interconnection point will be determined by the Telephone Company and will be used to determine the billing for each state. The rate for the Transport element will be determined as set forth in (8) following.

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(B) Multiple Company (Interconnection Point) Billing (Cont'd)

(7) When a Special Access Service, including those involving a Hub, but excluding those ordered for connection with Switched Access Service, is ordered by a customer where both ends of the Channel Mileage element, an end of the Channel Mileage element and an interconnection point, an end of the Channel Mileage element and a Hub or interconnection point and a Hub are in the same Telephone Company operating territory and the same exchange but in different states which have different rate schedules, the Exchange Telephone Company will accept the order in either state except for orders involving Hubs. For orders involving Hub the order must be placed in the state where the Hub is located. An interconnection point will be determined by the Exchange Telephone Company and will be used to determine the billing for each state. All appropriate charges in each state rate schedule are applicable. The rate for the Channel Mileage element will be determined as set forth in (8) following.

(8) The rate for the Switched Access Direct-Trunked Transport or Special Access Channel Mileage per mile element for services provided as set forth in (1) through (7) preceding is determined as follows:

(a) Determine the appropriate switched transport or channel mileage by computing the airline mileage between the two ends of the switched transport or channel mileage. Determine the airline mileage for the Direct-Trunked Transport and Channel Mileage per mile element using the V & H method as set forth in 6.7.12 or 7.4.6 following.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.8 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved (Cont'd)

(B) Multiple Company (Interconnection Point) Billing (Cont'd)

(8) (Cont'd)

(b) Determine the rate for the airline mileage determined in (a) preceding using the Telephone Company's service guide. Multiply such rate by the Telephone Company's billing percentage factor and divide by 100 to obtain the switched transport or channel mileage per mile element charges.

(9) The interconnection points will be determined by the Exchange Telephone Companies involved. The billing percentage factor for the Telephone Company for the service between the two involved offices is listed in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

(C) Reserved For Future Use

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.9 Service Performance Provisioning Guarantee

(A) General

The Telephone Company assures that orders for certain Access Services, as specified in (B) following, will be installed and available for customer use no later than the Firm Order Confirmation (FOC) date.

When the failure to meet a FOC date for installation of these services is solely the Telephone Company's responsibility, the associated nonrecurring charges shall be credited to the customer. The nonrecurring charges will be credited at the rate at which they were billed, however, the credit will not be provided if a credit of the same nonrecurring charge for the same service is provided under other provisions of this service guide. The credit of applicable nonrecurring charges for installations not completed by the FOC date is an exclusive remedy and is in lieu of any other claims described in Section 2.1.3 preceding.

(B) Services Subject to Credit

The Service Performance Provisioning Guarantee is available for Frame Relay Service UNI and NNI port connections, and for the following Special Access Services:

Program Audio Service
Voice Grade Service
Digital Data Service
High Capacity Service

ACCESS SERVICE

2. General Conditions (Cont'd)

2.4 Payment Arrangements and Credit Allowances (Cont'd)

2.4.9 Service Performance Provisioning Guarantee (Cont'd)

(C) When a Credit Allowance Does Not Apply

Nonrecurring charge credits under the Service Performance Provisioning Guarantee will not be made:

(1) When customer actions prevent or inhibit installation of the service (e.g., the customer's premises is inaccessible, the customer changes interface requirements, or the customer is not ready to accept the service).

(2) When other Telephone Companies are involved in the service installation.

(3) When the service is provided under the Special Construction or Specialized Services or Arrangements sections of this service guide.

(4) During a declared national emergency, where priority installation of National Security Emergency Preparedness (NSEP) telecommunications services shall take precedence.

(5) During natural disasters, work stoppages, civil disturbances, criminal actions; or by fire, flooding or other occurrences attributed to an Act of God.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.5 Connections

2.5.1 General

Equipment and Systems (i.e., terminal equipment, multiline terminating systems and communications systems) may be connected with Switched and Special Access Service furnished by the Telephone Company where such connection is made in accordance with the provisions specified in Technical Reference Publications AS No. 1 and in 2.1 preceding.

2.5.2 Connection with Unbundled Network Elements

Pursuant to the Federal Communications Commission's *Report and Order on Remand and Further Notice of Proposed Rulemaking*, FCC 03-36, adopted February 20, 2003, and the requirements of Section 51.309 of the Federal Communications Commission's *Rules*, the Telephone Company will permit a requesting telecommunications carrier to commingle an unbundled network element or combination of unbundled network elements with wholesale access services obtained from the Telephone Company under this service guide. The rates, terms and conditions of this service guide will apply only to the access services that are commingled. Unbundled network elements or combinations of unbundled network elements that are commingled with access services are not available through this service guide.

2. General Conditions (Cont'd)

2.6 Definitions

Certain terms used herein are defined as follows:

Access Code

The term "Access Code" denotes a uniform seven digit code assigned by the Telephone Company to an individual customer. The seven digit code has the form 101-XXXX, 950-0XXX, 950-1XXX, 950-10XX or 950-00XX.

Access Minutes

The term "Access Minutes" denotes that usage of exchange facilities in interstate or foreign service for the purpose of calculating chargeable usage. On the originating end of an interstate or foreign call, usage is measured from the time the originating end user's call is delivered by the Telephone Company to and acknowledged as received by the customer's facilities connected with the originating exchange. On the terminating end of an interstate or foreign call, usage is measured from the time the call is received by the end user in the terminating exchange. Timing of usage at both originating and terminating ends of an interstate or foreign call shall terminate when the calling or called party disconnects, whichever event is recognized first in the originating and terminating exchanges, as applicable.

Access Tandem

The term "Access Tandem" denotes a Telephone Company switching system that provides a concentration and distribution function for originating or terminating traffic between end offices and a customer's premises.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Account

The term "Account" denotes the set of billing information for a customer. Each account is uniquely identified by the billing account number (BAN) located on either the customer's bill or service record.

Aggregator

The term "Aggregator" denotes any individual, partnership, association joint-stock company, trust, governmental entity or corporation as defined under Part 64.708(b) of the Federal Communications Commission's Rules.

Alternate Billing Service

Alternate Billing Service (ABS) provides end users the ability to bill calls to an account not necessarily associated with the originating line.

Answer Message

Denotes an SS7 message sent in the backward direction to indicate that the call has been answered.

Answer/Disconnect Supervision

The term "Answer/Disconnect Supervision" denotes the transmission of the switch trunk equipment supervisory signal (off-hook or on-hook) to the customer's point of termination as an indication that the called party has answered or disconnected.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Asynchronous

A method of transmission in which information is sent with each character (byte) providing synchronization via start and stop bits.

Asynchronous Polled Interface (API)

Burrough's protocol that parallels IBM's SNA protocol.

Attenuation Distortion

The term "Attenuation Distortion" denotes the difference in loss at specified frequencies relative to the loss at 1004 Hz, unless otherwise specified.

B-Channel

The term "B-Channel" denotes a bi-directional synchronous channel which supports 64 kbps of digital transmission.

Balance (100 Type) Test Line

The term "Balance (100 Type) Test Line" denotes an arrangement in an end office which provides for balance and noise testing.

Billed Number Screening (BNS)

Billed number screening is a process which utilizes a data base to determine specific characteristics and/or customer preferences on a billed line number. Examples would include, whether or not the line is a public telephone and whether the billed customer associated with the line will accept a collect call.

Bit

The term "Bit" denotes the smallest unit of information in the binary system of notation.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Business Data Services (BDS)

The dedicated point-to-point transmission of data at certain guaranteed speeds and service levels using high-capacity connections.

Business Day

The term "Business Day" denotes the times of day that a company is open for business. Generally, in the business community, these are 8:00 or 9:00 A.M. to 5:00 or 6:00 P.M., respectively, with an hour for lunch, Monday through Friday, resulting in an standard forty (40) hour work week. However, Business Day hours for the Telephone Company may vary based on company policy, union contract and location. To determine such hours for the Telephone Company, or company location, that company should be contacted at the address shown under the Issuing Carrier(s) name listed on Title Pages 2 through 3 preceding.

Byte

8 bits of data, also referred to as an Octet.

Call

The term "Call" denotes a customer attempt for which the complete address code (e.g., 0-, 911, or 10 digits) is provided to the serving dial tone office.

Call Set-Up

Any attempt by a CPSN user to establish a circuit to send packetized data.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Carrier or Common Carrier

See Interexchange Carrier.

Carrier Identification Parameter

The term "Carrier Identification Parameter (CIP)" denotes a field in the SS7 initial address message that identifies and forwards Carrier Identification Code information to an Interexchange Carrier.

CCS

The term "CCS" denotes a hundred call seconds, which is a standard unit of traffic load that is equal to 100 seconds of usage or capacity of a group of servers (e.g., trunks).

Central Office

The term "Central Office" denotes a local Telephone Company switching system where Telephone Exchange Service customer station loops are terminated for purposes of interconnection to each other and to trunks.

Central Office Building

A structure housing Company equipment that is under the control of the Company.

Central Office Prefix

The term "Central Office Prefix" denotes the first three digits (NXX) of the seven digit telephone number assigned to a customer's Telephone Exchange Service when dialed on a local basis.

Centralized Automatic Reporting on Trunks Testing

The term "Centralized Automatic Reporting on Trunks Testing" denotes a type of testing which includes the capacity for measuring operational and transmission parameters.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Channel(s)

The term "Channel(s)" denotes an electrical or photonic, in the case of fiber optic-based transmission systems, communications path between two or more points of termination.

Channel Service Unit

The term "Channel Service Unit" denotes equipment which performs one or more of the following functions: termination of a digital facility, regeneration of digital signals, detection and/or correction of signal format errors and remote loop back.

Channelize

The term "Channelize" denotes the process of multiplexing /demultiplexing wider bandwidth or higher speed channels into narrower bandwidth or lower speed channels.

Circuit Termination

The data circuit and associated conditioning which provides for dedicated access to the network.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Clear Channel Capability (CCC)

The term "Clear Channel Capability" denotes the transport of twenty-four, 64 Kbps channels over a 1.544 Mbps High Capacity Service via B8ZS line code format.

C-Message Noise

The term "C-Message Noise" denotes the frequency weighted average noise within an idle voice channel. The frequency weighting, called C-message, is used to simulate the frequency characteristic of the 500-type telephone set and the hearing of the average subscriber.

C-Notched Noise

The term "C-Notched Noise" denotes the C-message frequency weighted noise on a voice channel with a holding tone, which is removed at the measuring end through a notch (very narrow band) filter.

Collocation-POT

The physical point of termination in a Central Office Building, specified by the Company, between Other Services and Customer Transport Facilities.

Collocation Space

A location within a Central Office Building, provided through Special Access Expanded interconnection for the purpose of locating Customer Transport Facilities and interconnecting those facilities to Other Services.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Commingling

The term "Commingling" means the connecting, attaching, or otherwise linking of an unbundled network element (UNE), or a combination of unbundled network elements (UNEs), to one or more facilities or services that a requesting telecommunications carrier has obtained at wholesale from an incumbent LEC, or the combining of a UNE, or a combination of UNEs, with one or more such facilities or services.

Common Line

The term "Common Line" denotes a line, trunk, pay telephone line or other facility provided under the general and/or local exchange service tariffs of the Telephone Company, terminated on a central office switch. A common line-residence is a line or trunk provided under the residence regulations of the general and/or local exchange service tariffs. A common line-business is a line provided under the business regulations of the general and/or local exchange service tariffs.

Common Trunk Port

The term "Common Trunk Port" denotes the termination of shared access trunks when traffic is routed to an end office through an access tandem, host office or dial tone office.

Communications System

The term "Communications System" denotes channels and other facilities which are capable of communications between terminal equipment provided by other than the Telephone Company.

Competitive Services

All packet-based business data services; circuit-based business data services above the DS3 bandwidth level; transport services which includes interoffice facilities, channel terminations between the serving wire center and point of presence, and all subelements established for the use of these transport facilities; DS1 & DS3 end user channel terminations, and other special access services, in any competitive SWC; DS1 & DS3 end user channel terminations, and other special access services, in a SWC for which the Company was granted pricing flexibility prior to June 2017.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Completed Call

The term "Completed Call" denotes a call in which answer supervision is received from the called location.

CCITT

Consultative Committee for International Telephone and Telegraph.

Conventional Signaling

The inter-machine signaling system which has been traditionally used in North America for the purpose of transmitting the called number's address digits from the originating end office to the switching machine which will terminate the call. In this system, all of the dialed digits are received by the originating switching machine, a path is selected, and the sequence of supervisory signals and outpulsed digits is initiated. No overlap outpulsing, ten-digit ANI, ANI information digits, or acknowledgment wink are included in this signaling sequence.

Cost

Except as provided otherwise in this service guide, the term "cost" denotes all sums expended directly by the Telephone Company to provide particular facilities and/or services to a user, plus a pro-rata share of the cost to the Telephone Company of its facilities and personnel, including general and administrative costs, used in the provision of the facilities and/or services, plus a reasonable profit.

Customer(s)

The term "Customer(s)" denotes any individual, partnership, association, joint-stock company, trust, corporation, or governmental entity or any other entity which subscribes to the services offered under this service guide, including both Interexchange Carriers (ICs) and end users.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Customer Designated Premises

The term "Customer Designated Premises" denotes the premises specified by the customer for the provision of Access Service.

Customer Transport Facilities

Fiber optic transport and distribution cables and associated transmission equipment required for the operation thereof that are provided, operated, maintained and owned or controlled by the Customer.

D-Channel

The term "D-Channel" denotes a 64 kbps digital signaling channel that provides for call establishment.

DTE Backup

An optional customer feature which allows an alternate Data Network Address (DNA) to be designated for a particular CPSN switch termination in case the original is not in service. If the original DNA is out of order, the calling party will be automatically rerouted to the destination indicated by the alternate DNA.

Data Transmission (107 Type) Test Line

The term "Data Transmission (107 Type) Test Line" denotes an arrangement which provides for a connection to a signal source which provides test signals for one-way testing of data and voice transmission parameters.

Decibel

The term "Decibel" denotes a unit used to express relative difference in power, usually between acoustic or electric signals, equal to ten (10) times the common logarithm of the ratio of two signal powers

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Decibel Reference Noise C-Message Referenced to 0

The term "Decibel Reference Noise C-Message Referenced to 0" denotes noise power in "Decibel Reference Noise C-Message Weighting" referred to or measured at a zero transmission level point.

Decibel Reference Noise C-Message Weighting

The term "Decibel Reference Noise C-Message Weighting" denotes noise power measurements with C-Message weighting in decibels relative to a reference 1000 Hz tone of 90 dB below 1 milliwatt.

Dedicated Trunk Port

The term "Dedicated Trunk Port" denotes the termination of Feature Group B and D access trunks to an end office when provided as a trunk side arrangement or to the access tandem at the serving wire center side of the switch.

Detail Billing

The term "Detail Billing" denotes the listing of each message and/or rate element for which charges to a customer are due on a bill prepared by the Telephone Company.

Digital Subscriber Line Access Multiplexer (DSLAM)

The term "Digital Subscriber Line Access Multiplexer" denotes a multiplexer that aggregates DSL data traffic for transport.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Direct-Trunked Transport

The term "Direct-Trunked Transport" denotes switched access transport from the serving wire center to the end office on circuits dedicated to the use of a single access customer without tandem switching, or from the serving wire center to the access tandem when the transport from the access tandem to the end office is routed on circuits used in common by multiple access customers.

Directory Assistance (Interstate)

The term "Directory Assistance" denotes the provision of telephone numbers by a Telephone Company operator when the operator location is accessed by a customer premises by sending appropriate signals, i.e. off-hook, 411, 555-1212 or (NPA) 555-1212.

Directory Assistance Location (Interstate)

The term "Directory Assistance Location" denotes a Telephone Company office where Telephone Company equipment first receives the Directory Assistance call from a customer's premises and selects the first operator position to respond to the Directory Assistance call.

Directory Number (DN)

The term "Directory Number" denotes a unique NPA-NXX-XXXX assigned to a subscriber of a Local Service Provider.

Donor Switch

The term "Donor Switch" denotes the original switch source of an NXX that has been designated as portable and from which a subscriber has moved their service, while retaining their Directory Number, to a different service provider's switch.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Dual Tone Multifrequency Address Signaling

The term "Dual Tone Multifrequency Address Signaling" denotes a type of signaling that is an optional feature of Switched Access Feature Group A. It may be utilized when Feature Group A is being used in the terminating direction (from the point of interface with the customer to the local exchange end office). An office arranged for Dual Tone Multifrequency Signaling would expect to receive address signals from the customer in the form of Dual Tone Multifrequency signals.

Echo Control

The term "Echo Control" denotes the control of reflected signals in a telephone transmission path.

Echo Path Loss

The term "Echo Path Loss" denotes the measure of reflected signal at a 4-wire point of interface without regard to the send and receive Transmission Level Point.

Echo Return Loss

The term "Echo Return Loss" denotes a frequency weighted measure of return loss over the middle of the voiceband (approximately 500 to 2500 Hz), where talker echo is most annoying.

Effective 2-Wire

The term "Effective 2-Wire" denotes a condition which permits the simultaneous transmission in both directions over a channel, but it is not possible to insure independent information transmission in both directions. Effective 2-wire channels may be terminated with 2-wire or 4-wire interfaces.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Effective 4-Wire

The term "Effective 4-Wire" denotes a condition which permits the simultaneous independent transmission of information in both directions over a channel. The method of implementing effective 4-wire transmission is at the discretion of the Telephone Company (physical, time domain, frequency-domain separation or echo cancellation techniques). Effective 4-wire channels may be terminated with a 2-wire interface at the customer's premises. However, when terminated 2-wire, simultaneous independent transmission cannot be supported because the two wire interface combines the transmission paths into a single path.

End Office Switch

The term "End Office Switch" denotes a local Telephone Company switching system where Telephone Exchange Service customer station loops are terminated for purposes of interconnection to trunks. Included are Remote Switching Modules (RSM) and Remote Switching Systems (RSS) served by a host office in a different wire center.

End User

The term "End User" denotes any customer of an interstate or foreign telecommunications service that is not a carrier, except that a carrier other than a telephone company shall be deemed to be an "end user" when such carrier uses a telecommunications service for administrative purposes, and a person or entity that offers telecommunications services exclusively as a reseller shall be deemed to be an "end user" if all resale transmissions offered by such reseller originate on the premises of such reseller.

Entry Switch

See First Point of Switching.

Envelope Delay Distortion

The term "Envelope Delay Distortion" denotes a measure of the linearity of the phase versus frequency of a channel.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Equal Level Echo Path Loss

The term "Equal Level Echo Path Loss" (ELEPL) denotes the measure of Echo Path Loss (EPL) at a 4-wire interface which is corrected by the difference between the send and receive Transmission Level Point (TLP). [ELEPL = EPL - TLP (send) + TLP (receive)].

Exchange

The term "Exchange" denotes a unit generally smaller than a local access and transport area, established by the Telephone Company for the administration of communications service in a specified area which usually embraces a city, town or village and its environs. It consists of one or more central offices together with the associated facilities used in furnishing communications service within that area. The exchange includes any Extended Area Service area that is an enlargement of a Telephone Company's exchange area to include nearby exchanges. One or more designated exchanges comprise a given local access and transport area.

Exchange Access Signaling

The signaling system which is used, by equal access end offices, to transmit originating information and address digits to the customer's premises and which includes the means of verifying the receipt of these address digits. Features of this system include overlap outpulsing, identification of the type of call, identification of the ten-digit telephone number of the calling party, and acknowledgment wink supervisory signals.

Exchange Termination

Central office equipment (Modem or Channel Service Unit/Digital Service Unit) required for circuit termination at the switch.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Exit Message

Denotes an SS7 message sent to an end office by the Telephone Company tandem switch to mark the Carrier Connect Time when the Telephone Company's tandem switch sends an Initial Address Message to an Interexchange Customer.

Expected Measured Loss

The term "Expected Measured Loss" denotes a calculated loss which specifies the end-to-end 1004-Hz loss on a terminated test connection between two readily accessible manual or remote test points. It is the sum of the inserted connection loss and test access loss including any test pads.

Extended Area Service

See Exchange.

Field Identifier

The term "Field Identifiers" denotes two to four characters that are used on service orders to convey specific instructions. Field Identifiers may or may not have associated data. Selected field identifiers are used in Telephone Company billing systems to generate nonrecurring charges.

Firm Access Order

The term "Firm Access Order" denotes an access service order for which the customer has provided the Telephone Company sufficient information to proceed with the provision of facilities and/or terminations.

Firm Order Confirmation (FOC) Date

The date on which the Telephone Company confirms to the customer that the requested service can be provided.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

First-Come, First-Served

The term "First-Come, First-Served" denotes a procedure followed when the first service order received will be the first service order processed.

First Point of Switching

The term "First Point of Switching" denotes the first Telephone Company location at which switching occurs on the terminating path of a call proceeding from the customer premises to the terminating end office and, at the same time, the last Telephone Company location at which switching occurs on the originating path of a call proceeding from the originating end office to the customer premises.

Frequency Shift

The term "Frequency Shift" denotes the change in the frequency of a tone as it is transmitted over a channel.

Geographically Aggregated Rate (GAR)

The term "Geographically Aggregated Rate" denotes a situation in which the rates and charges for a service offering, for which there is currently no demand, are developed based upon the aggregated total revenue and demand for more than one study area. Upon receipt of a request for service, the current geographically averaged rates will be redeveloped to include the new study area.

Example: Study areas A, B, and C have been geographically aggregated. Geographically averaged rates for A and B were developed based on their aggregated total revenue and demand, while Area C, marked "GAR", has no current demand. Should C receive a request for service, the current geographically averaged rates will be redeveloped to include C's revenue and demand. The redeveloped rates and charges will now be applicable to customers in A, B, and C.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Grandfathered

The term "Grandfathered" denotes Terminal Equipment, Multiline Terminating Systems and Protective Circuitry directly connected to the facilities utilized to provide services under the provisions of this service guide, and which are considered grandfathered under Part 68 of the F.C.C.'s Rules and Regulations.

Holding Time

The duration of a public dial call.

Host Office

The term "Host Office" denotes an electronic switching system which provides call processing capabilities for one or more Remote Switching Modules or Remote Switching Systems.

Hub

A Hub is a Telephone Company designated serving wire center at which bridging or multiplexing functions are performed. The bridging functions performed may be used to connect three or more Customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth.

Immediately Available Funds

The term "Immediately Available Funds" denotes a corporate or personal check drawn on a bank account and funds which are available for use by the receiving party on the same day on which they are received and includes U.S. Federal Reserve bank wire transfers, U.S. Federal Reserve notes (paper cash), U.S. coins, U.S. Postal Money Orders and New York Certificates of Deposit.

Impedance Balance

The term "Impedance Balance" denotes the method of expressing Echo Return Loss and Singing Return Loss at a 4-wire interface whereby the gains and/or loss of the 4 wire portion of the transmission path, including the hybrid, are not included in the specification.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Impulse Noise

The term "Impulse Noise" denotes any momentary occurrence of the noise on a channel over a specified level threshold. It is evaluated by counting the number of occurrences which exceed the threshold.

Individual Case Basis

The term "Individual Case Basis" denotes a condition in which the conditions, if applicable, rates and charges for an offering under the provisions of this service guide are developed based on the circumstances in each case.

Initial Address Message

Denotes an SS7 message sent in the forward direction to initiate trunk set up by seizing an outgoing trunk for sending trunk and call routing and handling information to the next switch.

Inserted Connection Loss

The term "Inserted Connection Loss" denotes the 1004 Hz power difference (in dBs) between the maximum power available at the originating end and the actual power reaching the terminating end through the inserted connection.

Interconnector

The term "Interconnector" denotes any individual, partnership, association, joint-stock company, trust, corporation, or governmental entity or any other entity which provides fiber optic and associated equipment or microwave facilities for connection of its equipment, collocated in Telephone Company serving wire center(s), to other services provided under this service guide.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Interexchange Carrier (IC) or Interexchange Common Carrier

The terms "Interexchange Carrier" (IC) or "Interexchange Common Carrier" denotes any individual, partnership, association, joint-stock company, trust, governmental entity or corporation engaged for hire in interstate or foreign communication by wire or radio, between two or more exchanges.

Intermodulation Distortion

The term "Intermodulation Distortion" denotes a measure of the non-linearity of a channel. It is measured using four tones, and evaluating the ratios (in dBs) of the transmitted composite four-tone signal power to the second-order products of the tones (R2), and the third-order products of the tones (R3).

Interstate Communications

The term "Interstate Communications" denotes both interstate and foreign communications.

Interstate Service Arrangement

The term "Interstate Service Arrangement" denotes an arrangement provided pursuant to INTERSTATE SERVICE GUIDE NO. 4s, contracts or service arrangement whereby the subscriber who obtains the arrangement permits others to make calls to the telephone number assigned to the arrangement without charges.

Intrastate Communications

The term "Intrastate Communications" denotes any communications within a state subject to oversight by a state regulatory commission as provided by the laws of the state involved.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Jointly Used Subscriber Plant

The term "Jointly Used Subscriber Plant" denotes the local nontraffic sensitive facilities which provide connection between the Customer's service location and the exchange central office serving the Customer and which may alternatively be used to place exchange service calls, interexchange intrastate service calls, or interexchange interstate service calls with no change in the nature of the facilities.

Kilobits Per Second (Kbps)

One thousand bits per second.

Kilopacket

One thousand packets.

Kilosegment

One thousand segments.

Line Information Data Base

The Line Information Data Base (LIDB) is a data base containing billing validation data to support Alternate Billing Services.

Line Side Connection

The term "Line Side Connection" denotes a connection of a transmission path to the line side of a local exchange switching system.

Local Access and Transport Area (LATA)

The term "Local Access and Transport Area" denotes a geographic area established for the provision and administration of communications service. It encompasses one or more designated exchanges, which are grouped to serve common social, economic and other purposes. For the purposes of this service guide Geographical Market Area (GMA) and LATA are intended to be interchangeable.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Local Calling Area

The term "Local Calling Area" denotes a geographical area, as defined in the Telephone Company's Local and/or General Exchange Service tariff, in which an end user (Telephone Exchange Service subscriber) may complete a call without incurring MTS charges.

Local Circuit Facility

Unconditioned copper facility used as the basis for designing a data circuit.

Local Tandem Switch

The term "Local Tandem Switch" denotes a local Telephone Company switching unit by which local or access telephonic communications are switched to and from an End Office Switch.

Location Routing Number

The term "Location Routing Number" denotes a ten digit number used to uniquely identify a switch that has ported numbers.

Loop Around Test Line

The term "Loop Around Test Line" denotes an arrangement utilizing a Telephone Company central office to provide a means to make certain two-way transmission tests on a manual basis. This arrangement has two central office terminations, each reached by means of separate telephone numbers and does not require any specific customer premises equipment. Equipment subject to this test arrangement is at the discretion of the customer.

Loss Deviation

The term "Loss Deviation" denotes the variation of the actual loss from the designed value.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Maintenance Test Unit (MTU)

The term "Maintenance Test Unit" denotes a piece of equipment installed and maintained by the Telephone Company near the end of a transmission path on the central office side of a Customer's premises. Upon proper command, the Maintenance Test Unit can isolate a Customer's wire and terminal equipment from the network loop. It enables remote testing of the transmission path's performance to the MTU.

Major Fraction Thereof

The term "Major Fraction Thereof" is any period of time in excess of 1/2 of the stated amount of time. As an example, in considering a period of 24 hours, a major fraction thereof would by any period of time in excess of 12 hours exactly. Therefore, if a given service is interrupted for a period of thirty six hours and fifteen minutes, the customer would be given a credit allowance for two twenty four hour periods for a total of forty eight hours.

Maritime Radio Common Carriers (MRCCs)

The term "Maritime Radio Common Carriers (MRCCs)" denotes carriers which are regulated under Part 81 of the Federal Communications Commission's Rules and Regulations.

Market Service Area

(See "Local Access Transport Area").

Maximum Burst Size (MBS)

The term "Maximum Burst Size" denotes the maximum number of consecutive cells that may be transmitted to the Telephone Company ATM network in a single burst at a rate that exceeds the sustained cell rate (SCR), but does not exceed the peak cell rate (PCR), assigned to the variable bit rate (VBR) connection. Cells exceeding the MBS will be declared as non-conforming and will be buffered or discarded, depending on the level of congestion.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Message

The term "Message" denotes a "call" as defined preceding.

Milliwatt (102 Type) Test Line

The term "Milliwatt (102 Type) Test Line" denotes an arrangement in an end office which provides a 1004 Hz tone at 0 dBm0 for one-way transmission measurements towards the customer's premises from the Telephone Company end office.

Minutes of Use

See Access Minutes.

Multiline Business Customer

The term "Multiline Business Customer" denotes an End User who is provided with more than one Common Line-business line in a state by the same Telephone Company under the business regulations of the General and/or Local Exchange Service tariffs of the Telephone Company.

N-1 Carrier

The term "N-1 Carrier" denotes the telecommunications carrier responsible for determining the Location Routing Number and delivering a call to the Telephone Company's switch. The N-1 carrier is the telecommunications carrier immediately preceding the terminating carrier in the Local Number Portability process.

Negotiation

An optional customer feature that allows negotiation on a per call basis of the packet size, window size, and throughput class for each direction of data transfer.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Network Control Signaling

The term "Network Control Signaling" denotes the transmission of signals used in the telecommunications system which perform functions such as supervision (control, status, and charge signals), address signaling (e.g., dialing), calling and called number identifications, rate of flow, service selection error control and audible tone signals (call progress signals indicating reorder or busy conditions, alerting, coin denominations, coin collect and coin return tones) to control the operation of the telecommunications system.

Network Processing Charge

A charge, per kilosegment, applied to calls which require packetizing at both the originating and terminating points in the network.

Non-Competitive Serving Wire Center

A Company Serving Wire Center that has not met the Competitive Market Test as established by the FCC's BDS Order (17-43) on April 28, 2017 at §69.803.

Nonsynchronous Test Line

The term "Nonsynchronous Test Line" denotes an arrangement in step-by-step end offices which provides operational tests which are not as complete as those provided by the synchronous test lines, but can be made more rapidly.

North American Numbering Plan

The term "North American Numbering Plan" denotes a three-digit area (Numbering Plan Area) code and a seven-digit telephone number made up of a three-digit Central Office code plus a four-digit station number.

Off-hook

The term "Off-hook" denotes the active condition of Switched Access or a Telephone Exchange Service line.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

On-hook

The term "On-hook" denotes the idle condition of Switched Access or a Telephone Exchange Service line.

Open Circuit Test Line

The term "Open Circuit Test Line" denotes an arrangement in an end office which provides an ac open circuit termination of a trunk or line by means of an inductor of several Henries.

Operator Service System (OSS)

The term "Operator Service System" (OSS) denotes the group of interacting hardware (switching equipment, data links, and operator terminals) and software components for the provision of operator service functionality.

Optical Carrier Level (n) (OC n)

The term "Optical Carrier Level (n)" denotes the physical line connection (aka facility) between two locations that uses optical signaling equipment for transmitting information over fiber optics. A level of bit rate speed transmission is indicated by "n". OC1 optical transmissions are at 51.84 Mbps; OC3 at 155.52 Mbps; OC12 at 622.08 Mbps; OC48 at 2488.32 Mbps; and OC192 at 9953.28 Mbps.

Optical Carrier Level n Concatenated (OCnc)

The term "Optical Carrier Level n Concatenated" denotes the physical line or clear channel connection (aka facility) between two locations that is capable, using optical signaling equipment, of replacing multiple payload groupings into one larger payload grouping, resulting in a single communications channel.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Optical Carrier Rate (OC#)

The term "Optical Carrier Rate" denotes a SONET transmission signal/speed, line rate or service. The rate is in multiples of an OC1, which is equivalent to a Synchronous Transport Signal (STS1), 51.84 Mbps, SONET's basic rate. OC# rate bandwidth capacity is 155.52 Mbps for OC3, 622.08 Mbps for OC12, 2488.32 Mbps for OC48 and 9953.28 Mbps for OC192.

Optical Carrier Rate Concatenated (OC#c)

The term "Optical Carrier Rate Concatenated" denotes a clear channel SONET transmission using only one framing format. For example, an OC3 signal provides three STS1 frame formats with 3 overheads for a total capacity of 2322 bytes per Synchronous Payload Envelope (SPE); in an OC3c signal, one STS3c frame format is used with one overhead, increasing the total payload capacity to 2340 bytes per SPE.

Originating Direction

The term "Originating Direction" denotes the use of Access Service for the origination of calls from an end user premises to a customer premises.

Originating Point Code

An originating point code is assigned to identify each Operator Service System (OSS) location.

Other Services

As used for Expanded Interconnection, this denotes specific rate elements offered by the Company, which may be interconnected to Customer Transport Facilities using Special Access Expanded Interconnection.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Overlap Outpulsing

The feature of the exchange access signaling system which permits initiation of pulsing to the customer's premises before the calling subscriber has completed dialing an originating call.

Packet

A continuous sequence of binary digits of information which is switched through the network as an integral unit. Consists of customer data, facilities and addressing/signaling information.

Pay Telephone

The term "Pay Telephone" denotes coin or coinless instruments and related facilities that are available for use by the general public for public convenience and necessity.

Permanent Virtual Circuit (PVC)

A virtual circuit through the packet network that is established at service installation and is available on a permanent basis. No call establishment or call termination is associated with a Permanent Virtual Circuit. The PVC feature may be available across X.75 interfaces.

Personal Identification Number (PIN)

A Personal Identification Number (PIN) is a confidential four-digit code number provided to a calling card customer to protect against the unauthorized use of their calling card number. The PIN is stored in the LIDB for those accounts that have an associated calling card.

Phase Jitter

The term "Phase Jitter" denotes the unwanted phase variations of a signal.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Point of Termination

The term "Point of Termination" denotes a point of demarcation within a customer-designated premises at which the Telephone Company's responsibility for the provision of Access Service ends.

Premises

The term "Premises" denotes a building, or a portion of a building in a multitenant building, or buildings on continuous property (except Railroad Right-of-Way, etc.), not separated by a public highway.

Primary Exchange Carrier

The term "Primary Exchange Carrier" denotes the Local Exchange Telephone Company in whose exchange a customer's first point of switching (i.e., dial tone office for FGA) is located.

Protocol

A set of rules governing the format to be followed when transmitting information between communicating devices.

Query

A query is a request for specific information generated by a computer processor and sent to a data base, with a predefined set of responses expected.

Radio Common Carriers (RCCs)

The term "Radio Common Carriers (RCCs)" denotes carriers which are regulated under Part 22 of the Federal Communications Commission's Rules and Regulations.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Recipient Switch

The term "Recipient Switch" denotes any end office switch that serves Directory Numbers (DN) within a number portable NXX that is not originally assigned to the switch. Customers assigned a DN within the indicated NXX that were working out of a switch other than the one originally designated are said to have ported their number to this recipient switch.

Regional Service Management System/Number Portability Administration Center

The term "Regional Number Portability Administration Center" denotes the third party administered database which maintains the information on all ported numbers in the Telephone Company's region.

Registered Equipment

The term "Registered Equipment" denotes the customer's premises equipment which complies with and has been approved within the Registration Provisions of Part 68 of the F.C.C.'s Rules and Regulations.

Release Message

Denotes an SS7 message sent in either direction to indicate that a specific circuit is being released.

Remote Switching Modules and/or Remote Switching Systems

The term "Remote Switching Modules and/or Remote Switching Systems" denotes small, remotely controlled electronic end office switches which obtain their call processing capability from an ESS-type Host Office. The Remote Switching Modules and/or Remote Switching Systems cannot accommodate direct trunks to a customer.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Response

A Response is one response from a set of predefined expected responses to a request for information contained in a query from a computer processor.

Responsible Organization

The term "Responsible Organization" denotes that entity which is responsible for the management and administration of a Toll Free Code (TFC) service record in the TFC Service Management System.

Return Loss

The term "Return Loss" denotes a measure of the similarity between the two impedances at the junction of two transmission paths. The higher the return loss, the higher the similarity.

Reverse Charge Blocking

The capability to deny reverse charge (collect) calls from other network users.

Secondary Exchange Carrier

The term "Secondary Exchange Carrier" denotes the Local Exchange Telephone Company in whose exchange a customer's end user's end office is located and where the customer's first point of switching is provided by a Primary Exchange Carrier who is not the same Exchange Carrier as the Secondary Exchange Carrier.

ACCESS SERVICE

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Segment

A portion of a packet, defined by the Company as 16 bytes of user data.

Service Control Point

A Service Control Point (SCP) is a transaction processor based system that provides a network interface to various data base services.

Service Switching Point

An end office or tandem switch equipped with the signaling link hardware and software that can perform the Signal Point functions. In addition, SSPs can identify the need for application software in processing a Common Channel Signaling/ Signaling System 7 call and request and respond to call processing instructions issued by a Service Control Point.

Serving Wire Center

The term "Serving Wire Center" denotes the wire center from which the customer designated premises would normally obtain dial tone from the Telephone Company.

Seven Digit Manual Test Line

The term "Seven Digit Manual Test Line" denotes an arrangement which allows the customer to select balance, milliwatt and synchronous test lines by manually dialing a seven digit number over the associated access connection.

Short Circuit Test Line

The term "Short Circuit Test Line" denotes an arrangement in an end office which provides for an ac short circuit termination of a trunk or line by means of a capacitor of at least four microfarads.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Signal-to-C-Notched Noise Ratio

The term "Signal-to-C-Notched Noise Ratio" denotes the ratio in dB of a test signal to the corresponding C-Notched Noise.

Signal Transfer Point (STP)

The term "Signal Transfer Point" denotes a packet switch which provides CCS network access and performs CCS message routing and screening.

Signaling System 7 (SS7)

The term "Signaling system 7 (SS7)" denotes the layered protocol used for standardized common channel signaling in the United States.

Singing Return Loss

The term "Singing Return Loss" denotes the frequency weighted measure of return loss at the edges of the voiceband (200 to 500 Hz and 2500 to 3200 Hz), where singing (instability) problems are most likely to occur.

Single Line Business Customer

The term "Single Line Business Customer" denotes an End User who pays for an End User Common Line at a rate that is not described as a residential rate in the Telephone Company's Local Exchange Service service guides and who does not obtain more than one such line from the same Telephone Company.

Special Order

The term "Special Order" denotes an order for a Directory Assistance Service.

Statistical Multiplexing

The term "Statistical Multiplexing" denotes a multiplexing technique that differs from simple multiplexing in that the share of the available transmission bandwidth allocated to a given user varies dynamically. In other words, in statistical multiplexing, a channel is only assigned to communicating devices (voice, modem, etc.) when they actually have data to send or receive.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Subtending End Office of an Access Tandem

The term "Subtending End Office of an Access Tandem" denotes an end office that has final trunk group routing through that tandem.

Switch Termination

A line port on a central office based packet switch.

Synchronous

A method of transmission in which information being transmitted over a line is controlled by a timing device.

Synchronous Optical Network (SONET)

The term "Synchronous Optical Network" denotes a North American standard for synchronous optical networks providing transmission rates from 51.84 Mbps. SONET uses a 51.84 Mbps STS-1 signal as the basic building block. Higher rate signals are available in direct multiples of STS-1.

Synchronous Test Line

The term "Synchronous Test Line" denotes an arrangement in an end office which performs marginal operational tests of supervisory and ring-tripping functions.

Synchronous Transport Signal - Level (STS1)

The term "Synchronous Transport Signal - Level" denotes a 51.84 Mbps signal that is the electrical equivalent of the SONET optical based signal OC1. An STS1 can carry a DS3 or 28 DS1s when specifically formatted. However, individual DS1s within a DS3 are not accessible within SONET and their performance cannot be guaranteed for this reason. These DS1s may be accessed using the Special Access DS3 to DS1 multiplexing optional service.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Tandem-Switched Transport

The term "Tandem-Switched Transport" denotes switched access transport from the access tandem to an end office subtending that tandem. Tandem-switched transport consists of circuits used in common by multiple access customers from the tandem to the end office.

Terminating Direction

The term "Terminating Direction" denotes the use of Access Service for the completion of calls from a customer premises to an end user premises.

Throughput Class

The attainable data rate (bits per second) on packet switched data calls.

Toll Free Code (TFC)

The term "Toll Free Code" denotes a three-digit Numbering Plan Area (NPA) or Area Code that is specifically assigned by the telecommunications industry for use by Telecommunications Service Providers in the provision of telephone numbers that, unlike traditional telephone numbers and calls, when dialed are toll free to the originating caller. The specific codes assigned and used, or reserved for use, for this purpose are 800, 822, 833, 844, 855, 866, 877, and 888.

Toll Free Code Service Management System

The term "Toll Free Code Service Management System" (TFC SMS) denotes the main operations support system used to create and update TFC service records in the national TFC data base.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Toll Free Code (TFC) Service Provider

The term "Toll Free Code (TFC) Service Provider" denotes a telecommunications company, including local exchange carriers and interexchange carriers, or a reseller of exchange or interexchange services that offers TFC service to end users.

Transmission Measuring (105 Type) Test Line/Responder

The term "Transmission Measuring (105 Type) Test Line/Responder" denotes an arrangement in an end office which provides far-end access to a responder and permits two-way loss and noise measurements to be made on trunks from a near end office.

Transmission Path

The term "Transmission Path" denotes an electrical path capable of transmitting signals within the range of the service offering, e.g., a voice grade transmission path is capable of transmitting voice frequencies within the approximate range of 300 to 3000 Hz. A transmission path is comprised of physical or derived channels consisting of any form or configuration of facilities typically used in the telecommunications industry.

Trunk

The term "Trunk" denotes a communications path connecting two switching systems in a network, used in the establishment of an end-to-end connection.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Trunk Group

The term "Trunk Group" denotes a set of trunks which are traffic engineered as a unit for the establishment of connections between switching systems in which all of the communications paths are interchangeable.

Trunk Side Connection

The term "Trunk Side Connection" denotes the connection of a transmission path to the trunk side of a local exchange switching system.

Two-Wire to Four-Wire Conversion

The term "Two-Wire to Four-Wire Conversion" denotes an arrangement which converts a four-wire transmission path to a two-wire transmission path to allow a four-wire facility to terminate in a two-wire entity (i.e., a central office switch).

Unbundled Network Elements (UNEs)

The term "Unbundled Network Elements" denotes the physical facilities of the network, including the associated features, functions and capabilities, that may be used in the provision of a telecommunications service, made available pursuant to Section 251 of the Telecommunications Act of 1996.

V and H Coordinates Method

The term "V and H Coordinates Method" denotes a method of computing airline miles between two points by utilizing an established formula which is based on the vertical (V) and horizontal (H) coordinates of the two points.

2. General Conditions (Cont'd)

2.6 Definitions (Cont'd)

Virtual Circuit

A communications connection that allows transmission of sequenced data packets through the network. The connection is made up of Logical Channels at the originating and terminating ends of the call as well as intra-network facilities. Transmission bandwidth is only allocated when packets are actually being transmitted.

WATS Serving Office

The term "WATS Serving Office" denotes a telephone company designated serving wire center where switching, screening and/or recording functions are performed.

Window Size

The number of outgoing packets that may be sent before confirmation is received indicating that the previous packets have been successfully received.

Wire Center

The term "Wire Center" denotes a building in which one or more central offices, used for the provision of Telephone Exchange Services, are located.

ACCESS SERVICE

3. RESERVED FOR FUTURE USE

ACCESS SERVICE

4. End User Access Service

4.6 Rate Conditions

(R) The Federal Universal Service Fund (USF) end user charge is designed to recover all contributions made by the Telephone Company to federally mandated universal service support mechanisms.

For end user customers with direct switched dedicated or special access billing, the monthly Federal USF end user charge will be applied at the billing account level. The applicable monthly charge will be determined by multiplying the quarterly USF contribution factor prescribed by the Federal Communications Commission, as set forth below, by the end user's total monthly switched dedicated or special access charges billed under this service guide.

The FCC Contribution factor is subject to change quarterly. The current factor can be found at http://www.fcc.gov/encyclopedia/contribution-factor-quarterly-filings-universal-service-fund-usf-management-support

ACCESS SERVICE

## 5. Ordering Options for Switched and Special Access Service

### 5.1 General

This section sets forth the conditions and order related charges of Access Orders for Switched and Special Access Services. These charges are in addition to other applicable charges as set forth in other sections of this service guide.

An Access Order is an order to provide the customer with Switched Access Service or Special Access Service or to provide changes to existing services.

The rates and charges in this section apply to switched and special access customers served by the Telephone Company, except for customers in competitive serving wire centers formerly known as pricing flexibility Metropolitan Statistical Areas (MSAs) listed in Section 23.3 following. The rates and charges for switched and special access customers in the competitive serving wire centers formerly known as pricing flexibility MSAsare set forth in Section 23.4 following.

#### 5.1.1 Ordering Conditions

A customer may order any number of services of the same type and between the same premises on a single Access Order. All details for services for a particular order must be identical except for those for multipoint service.

The customer shall provide all information necessary for the Telephone Company to provide and bill for the requested service. In addition to the order information required in 5.2 following, the customer must also provide:

- Customer name and premises address(es).
- Billing name and address (when different from customer name and address).
- Customer’s contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

Orders for Switched Access Service must indicate whether the Switched Transport ordered is for Entrance Facilities and Direct-Trunked Transport. For Direct-Trunked Transport, the order must specify the facility Hubs involved, channel type, channel interface, and any options desired.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.1 General (Cont'd)

5.1.2 Provision of Other Services

(A) In addition to Switched and Special Access Services, other services offered under provisions of this service guide shall be ordered with an Access Order or as set forth in (B) following. The rates and charges for these other services, as set forth in other sections of this service guide, will apply in addition to the ordering charges set forth in this section and the rates and charges for the Access Service with which they are associated.

(B) With the agreement of the Telephone Company, other services mentioned in (A) preceding may subsequently be added to an Access order at any time, up to and including the service date for an Access Service. When added subsequently, charges for a design change as set forth in 5.2.3(C) following will apply when an engineering review is required.

(C) Additional Engineering is not an ordering option, but will be applied to an Access Order when the Telephone Company determines that Additional Engineering is necessary to accommodate a customer request. Additional Engineering will only be required as set forth in 13.1 following. When it is required, the customer will be so notified and will be furnished with a written statement setting forth the justification for the Additional Engineering as well as an estimate of the charges. If the customer agrees to the Additional Engineering, a firm order will be established. If the customer does not want the service or facilities after being notified that Additional Engineering of Telephone Company facilities is required, the order will be withdrawn and no charges will apply. Once a firm order has been established, the total charge to the customer for the Additional Engineering may not exceed the estimated amount by more than 10%.

The conditions, rates and charges for Additional Engineering are as set forth in 13.1 following and are in addition to the conditions, rates and charges specified in this section.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.1 General (Cont'd)

5.1.3 Special Construction

The conditions, rates and charges for special construction are set forth in Section 14 following, and are in addition to the conditions, rates and charges specified in this section.

5.1.4 Discontinuance of Service

Orders for discontinuance of service must be received in writing **at least 30 days** in advance of the customer desired disconnect date. The Telephone Company will **ensure** that the service is disconnected on the requested date. No charges will apply after the requested disconnect date, except as defined for minimum periods in 2.4.2 preceding. (C) (C) (T)

5.1.5 Reserved For Future Use

5.2 Access Order

An Access Order is used by the Telephone Company to provide a customer Access Service as follows:

- Switched Access Services as set forth in 6. Following,
- Special Access Services as set forth in 7. Following, and
- Other Services as set forth in 5.1.2 preceding.

When placing an order for Access Service, the customer shall provide, at a minimum, the following information:

- For all Special Access Services, the customer must specify the customer designated premises or Hubs involved, the type of service (e.g., Video, Voice Grade, High Capacity, etc.), the channel interface, technical specification package and options desired. For multipoint services, the channel interface at each premises may, at the request of the customer, be different but all such interfaces shall be compatible.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

- For all Special Access Services, the customer must specify the customer designated premises or Hubs involved, the type of service (e.g., OptiPoint, SONET OC Ring, Ethernet Transport), the channel interface, technical specification package and options desired.

- When a customer desires Switched Access Service to an end office that is a remote switching office, the customer must order to the host office which controls the remote switching office since all traffic to and/or from a remote switching office must be routed through the host office.

Special Access Service may be ordered for connection with Switched Access Service at Telephone Company designated WATS Serving Offices (WSOs) and may be ordered separately by a customer other than the customer which orders the Switched Access Service. For this Special Access Service the customer must also specify the type of calling (i.e., originating only or terminating only) for which the service is to be provided. Additionally, when the necessary screening functions are not provided at the wire center which serves the customer's originating or terminating premises, the Telephone Company will provide the service to the nearest wire center where capacity exists. In these circumstances, the customer will be so notified and the order will be changed to designate the appropriate premises. No charge will apply for the change.

Where the Special Access Service is exempt from the Special Access Surcharge as set forth in 7.4.2 following, the customer shall furnish with the order the certification as set forth in that section.

Customers may place orders for access services directly or through a designated authorized agent. Prior to placing an order for service, the authorized agent must obtain a signed letter of agency from the access customer. The authorized agent must provide a copy of the letter of agency to the Telephone Company at the time the order is placed.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.1 Access Order Service Date Intervals

Access Service is provided with one of the following Service Date Intervals:

- Standard Interval
- Negotiated Interval

To the extent the access service can be made available with reasonable effort, the Telephone Company will provide the access service in accordance with the customer's requested interval, subject to the following conditions:

(A) Standard Interval

The Telephone Company shall publish and make available to all customers a schedule of standard intervals applicable for Switched and Special Access Services. The schedule specifies the services and quantities that can be provided within the published interval. Individual copies of the Telephone Company schedule of Standard Intervals will be made available to customers upon request.

Access service will be installed during the Telephone Company's business day. If a customer requests that installation be done outside of normally scheduled working hours, and the Telephone Company agrees to this request, the customer will be subject to applicable Additional Labor Charges as set forth in 13.2 following.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.1 Access Order Service Date Intervals (Cont'd)

(B) Negotiated Interval

The Telephone Company will negotiate a service date interval with the customer when:

(1) There is no Standard Interval for the service;

(2) The quantity of Access Services ordered exceeds the quantities specified in the standard intervals; or

(3) The customer requests a service date beyond the applicable Standard Interval service date.

The Telephone Company will offer a service date based on the type and quantity of Access Services the customer has requested. The Negotiated Interval may not exceed by more than six months the Standard Interval Service date, or, when there is no Standard Interval, the Telephone Company offered service date.

All part-time Television and Program Audio services are provided with a Negotiated Interval. Each service is subject to a service inquiry. A service inquiry is a request to the Telephone Company to determine if facilities exist to provide the service ordered and to determine the service date on which service can be provided to the customer.

All services for which rates are applied on an individual case basis are provided with the Negotiated Interval.

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.2 Access Order Charge

The Access Order Charge is designed to recover the costs associated with processing the customer's order, and will apply on a per order basis. This charge will be in addition to any other applicable nonrecurring charges as set forth in Sections 6, 7, and/or 13 following.

At the time the Customer places a Access Order with the Telephone Company, the Customer will be informed that if the Access Order is canceled prior to installation of access facilities, where installation of access facilities has commenced, a cancellation charge as set forth in Section 5.2.4(B) will apply.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.2 Access Order Charge (Cont'd)

Access Order Charge
(A) Per Order

| | | Charge |
|---|---|---|
| | | |
| Indiana # | | $30.00 |
| Kansas | | $30.00 |
| Missouri # | | $30.00 |
| New Jersey | | $30.00 |
| North Carolina | | $30.00 |
| Ohio | | $30.00 |
| Pennsylvania | | $30.00 |
| South Carolina | | $30.00 |
| Tennessee | | $30.00 |
| Texas | | $30.00 |
| Virginia | | $30.00 |

# See Section 1.3 preceding.

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.3 Access Order Modifications

The customer may request a modification of its Access Order at any time prior to notification by the Telephone Company that service is available for the customer's use. The Telephone Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours. If the modification cannot be made with the normal work force during normal business hours, the Telephone Company will notify the customer. If the customer still desires the Access Order modification, the Telephone Company will schedule a new service date. All charges for Access Order modifications will apply on a per access order basis.

When Telephone Company personnel are dispatched to install a customer's service on the requested service date, and the customer advises the Telephone Company personnel that service cannot be accepted at that time, the customer shall be responsible for payment of additional labor charges for the time incurred by Telephone Company personnel. The additional labor charges will be applied on per half hour, per technician basis as set forth in 13.2 following.

Any increase in the number of Special Access Service channels or Switched Access Service lines or trunks will be treated as a new Access Order (for the increased amount only).

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.3 Access Order Modifications (Cont'd)

(A) Service Date Change

Access Order service dates for the installation of new services or rearrangements of existing services may be changed, but the new service date may not exceed the original service date by more than 60 calendar days. When, for any reason, the customer indicates that service cannot be accepted for a period not to exceed 60 calendar days, the Telephone Company will accordingly delay the start of service. If the customer requested service date is more than 60 calendar days after the original service date, the order will be canceled by the Telephone Company and reissued with the appropriate cancellation charges applied unless the customer indicates that billing for the service is to commence as set forth in 5.2.4(A) following.

A new service date may be established that is prior to the original date specified by the customer if the Telephone Company determines it can accommodate the customer's request without delaying service dates for orders of other customers.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.3 Access Order Modifications (Cont'd)

(B) Partial Cancellation Charge

Any decrease in the number of ordered Special Access Service channels or Switched Access Service lines or trunks will be treated as a partial cancellation and the charges as set forth in 5.2.4(B) following will apply.

(C) Design Change Charge

The customer may request a design change to the service ordered. A design change is any change to an Access Order which requires engineering review. An engineering review is a review by Telephone Company personnel of the service ordered and the requested changes to determine what changes in the design, if any, are necessary to meet the changes requested by the customer. Design changes include such things as the addition or deletion of optional features or functions or a change in the type of channel interface or technical specification package. Design changes do not include a change of customer premises, end user premises, end office switch, or Special Access Service channel type. Changes of this nature will require the issuance of a new order and the cancellation of the original order with appropriate cancellation charges applied.

The Telephone Company will review the requested change, notify the customer whether the change is a design change, if it can be accommodated and if a new service date is required. If the customer authorizes the Telephone Company to proceed with the design change, a Design Change Charge will apply. The Design Change Charge will apply on a per order per occurrence basis, for each order requiring a design change.

If, as a result of the change, the original service date cannot be met without the Telephone Company incurring additional labor, and the Customer provides authorization to the Telephone Company to proceed, then charges as set forth in Section 13 will apply. If the customer is unwilling to pay such costs, the service date must be changed in accordance with (A) preceding as a result of the design change.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.3 Access Order Modifications (Cont'd)

(C) Design Change Charge
(B) Per Order

| | | Charge |
|---|---|---|
| | | |
| Indiana # | | $16.10 |
| Kansas | | $24.60 |
| Missouri # | | $24.60 |
| New Jersey | | $25.00 |
| North Carolina | | $27.00 |
| Ohio | | $13.90 |

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.3 Access Order Modifications (Cont'd)

(D) Expedited Order Charge

An Expedited Order Charge will apply when a customer requests a service date that is earlier than the standard interval date.

The Telephone Company maintains exclusive right to accept or deny the request to expedite the access service orders. If, upon reviewing availability of equipment and scheduled work load, the Telephone Company agrees to provide service on an expedited basis and the customer accepts this proposal, an expedited order charge will apply.

The request for an earlier service date may be received from the customer prior to the issuance of an access order, or after the access order has been issued but prior to the service date.

If the Telephone Company is subsequently unable to meet an agreed upon expedited service date, no Expedited Order Charge will apply unless the missed service date was caused by the customer.

In the event the customer cancels an expedited access order, the Expedited Order Charge will apply in addition to cancellation charges as described in 5.2.4 following.

An Expedited Order Charge will not apply to access service orders expedited for Telephone Company reasons.

The Expedited Order Charge will apply per access order, per business day improved from the standard interval date to the in-service date. The rate for an Expedited Order Charge is set forth following.

# See Section 1.3 preceding..

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.4 Cancellation of an Access Order

(A) A customer may cancel an Access Order for the installation of service at any time prior to notification by the Telephone Company that service is available for the customer's use. The cancellation date is the date the Telephone Company receives written or verbal notice from the customer that the order is to be canceled. If a customer or a customer's end user is unable to accept Access Service within 30 calendar days of the latest agreed upon service date (i.e. firm order confirmation date), the customer has the choice of the following options:

- The Access Order shall be canceled and charges set forth in (B) following will apply, or

- Billing for the service will commence.

In any event, the cancellation date or the date billing is to commence (depending on which option is selected by the customer) shall be the 31st day beyond the latest agreed upon service date (i.e. firm order confirmation date) of the Access Order.

For all orders placed before the effective date of this service guide, December 2, 2016, the preceding ordering options will be in effect. For all orders placed on or after the effective date of this service guide, December 2, 2016, the following ordering options will be in effect.

A customer may cancel an Access Order for the installation of service at any time prior to notification by the Telephone Company that service is available for the customer's use. The cancellation date is the date the Telephone Company receives written or verbal notice from the customer that the order is to be canceled. The verbal notice must be followed by written confirmation within 10 days. If a customer or a customer's end user is unable to accept Access Service within 30 calendar days of the latest agreed upon service date (i.e. firm order confirmation date), the customer has the choice of the following options:

- The Access Order will be canceled and charges set forth in (B) following will apply if the service has not been fully provisioned; or

- The Access Order will be completed and billing for the service will commence if the service has been fully provisioned or the customer has indicated that billing for the service should begin.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.4 Cancellation of an Access Order (Cont'd)

(B) When a customer cancels an Access Order for the installation of service, a Cancellation Charge will apply as follows:

(1) Costs incurred in conjunction with the provision of Switched or Special Access Service start on the Firm Order Confirmation date.

(2) When the customer cancels an Access Order or portion thereof prior to the Firm Order Confirmation date, no charges shall apply.

(3) When the customer cancels an Access Order on or after the Firm Order Confirmation date, a Cancellation Charge will apply.

(4) Calculation of the Cancellation Charge is as follows:

(a) If the customer has requested a Service Date Change beyond the original service date, the resulting additional installation days are included in the service interval.

(b) When counting the number of days in the service interval or the number of days from the Firm Order Confirmation date through the Access Order Cancellation Date, the Firm Order Confirmation date will count as day one.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.4 Cancellation of an Access Order (Cont'd)

(B) (Cont'd)

(4) (Cont'd)

(c) Except as set forth in (d) following, the Cancellation Charge will be a percentage of all nonrecurring charges associated with the access order, or that part of the order being canceled. This percentage is calculated by dividing the number of days from the Firm Order Confirmation date through the Cancellation Date by the number of days in the agreed to service interval. The Cancellation Charge is then developed by multiplying the nonrecurring charges associated with installation of the canceled service by the calculated percentage.

(d) The cancellation charge for OC3, OC12, OC48 or OC192 services (e.g., OptiPoint Service, SONET OC Ring) will be calculated as a percentage of the Optical Service Charge set forth in 6.8.1 and 7.5.1 following for each node associated with the cancelled order. This percentage is calculated as specified in (c) preceding.

(C) When a customer cancels an order for the discontinuance of service, no charges apply for the cancellation.

(D) If the Telephone Company misses a service date by more than 30 days due to circumstances over which it has direct control (excluding, e.g., acts of God, governmental requirements, work stoppages and civil commotions), the customer may cancel the Access Order without incurring cancellation charges.

ACCESS SERVICE

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.5 Selection Of Facilities For Access Orders

(A) When a customer places an Access Order, it may choose to utilize facilities previously purchased as a facility to a Hub. If the customer has a Special Access Service facility purchased to a Hub, the customer must request that specific channels be used to implement the Access Order. If a facility assignment is not specified by the customer, the Telephone Company will provide the service from available inventory as discussed in 5.3 following.

(B) For all other Access Orders, the option to request a specific transmission path or channel is not provided except as provided for under Special Facilities Routing as set forth in 11. following.

5.2.6 Minimum Period

(A) Except as set forth in (C), 7.4.3 and 13.1.10 following, the minimum period for which Access Service is provided and for which charges are applicable, is one month.

(B) Reserved

(C) The minimum period for part-time Video and Program Audio Special Access Services is one day even though the service will be provided only for the duration of the event specified on the order (e.g., one-half hour, two hours, five hours, etc.).

(D) Service Rearrangements as set forth in 6.7.1(C)(3), 7.4.1(C)(3) and 8.3.4(C) following for Switched, Special and Frame Relay Access Services respectively, may be made without a change in minimum period requirements.

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.6 Minimum Period (Cont'd)

(E) Changes other than those identified in 6.7.1(C)(3), 7.4.1(C)(3) or 8.3.4(C) following will be treated as a discontinuance service. All associated nonrecurring charges will apply for the new service. A new minimum period will be established for the new service. The customer will also remain responsible for all outstanding minimum period obligations associated with the disconnected service.

The changes listed below are those which will be treated as a discontinuance and installation of service and for which a new minimum period will be established.

(1) A change of customer of record (i.e., Access Service is provided to and billed to a different entity).

(2) A move to a different building as set forth in 6.7.5(B) or 7.4.5(B) following.

(3) A change in type of service (i.e., Switched Access to Special Access, one type of Special Access to another).

(4) A change in the type of Special Access Service Channel Termination.

(5) Reserved

(6) Reserved

(7) Change from two-point to multipoint Special Access Service or from multipoint to two-point Special Access Service.

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.7 Minimum Period Charges

When Access Service is disconnected at the customer's request prior to the expiration of the minimum period, charges are applicable for the balance of the minimum period.

The Minimum Period Charge for services provided with a one month minimum period will be determined as follows:

(A) Reserved

(B) For Special Access Service, the charge for a month or fraction thereof is the applicable monthly rates for the service as set forth in 7.5 following.

The Minimum Period Charge for part-time Video and Program Audio Special Access Services is the applicable daily rate for the service as set forth in 7.5 following.

All applicable nonrecurring charges for the service will be billed in addition to the Minimum Period Charge.

Minimum Service Period requirements apply to all DS1 and DS3 services. Early Termination Liability not defined elsewhere for DS1 and DS3 will be 50% of the remaining months of the agreed upon term after the Minimum Service Period.

5. Ordering Options for Switched and Special Access Service (Cont'd)

5.2 Access Order (Cont'd)

5.2.8 Shared Use Facilities

Shared Use (i.e., Switched and Special Access Services provided over the same analog or digital high capacity facilities) is allowed. Shared use facilities to a Hub will be ordered and provided as Special Access Service. While shared use is allowed, individual services utilizing these facilities must be ordered either as Switched Access Service or Special Access Service. When placing the order for the individual service(s), the customer must specify a channel assignment for each service ordered.

5.3 Available Inventory

Available inventory is limited and does not include facilities previously ordered. The Telephone Company will make every reasonable effort to maintain sufficient available inventory to provide Access Service in accordance with customers' requested service date intervals. To the extent that service can be provided, Access Orders will be satisfied from available inventory.

5.4 Reserved For Future Use

ACCESS SERVICE

## 6. Switched Access Service

### 6.1 General

Switched Access Service, which is available to customers for their use in furnishing their services to end users, provides a two-point electrical communications path between a customer's premises and an end user's premises. It provides for the use of switched transport facilities and common subscriber plant of the Telephone Company. Specific references to material describing the elements of Switched Access Service are provided in 6.1.1 and 6.1.2 following.

Rates and charges for Switched Access Service are set forth in 6.8 following. The application of rates for Switched Access Service is described in 6.7 following.

The rates and charges in this section apply to all switched access customers served by the Telephone Company, except for customers ordering dedicated switched transport services (i.e., STS1 entrance facilities and direct-trunked transport; OptiPoint entrance facilities and direct-trunked transport; STS1/DS1 multiplexing; and OptiPoint nodes and cards) in the pricing flexibility Metropolitan Statistical Areas (MSAs) listed in Section 21.3 following. The rates and charges for customers ordering dedicated switched transport services in the pricing flexibility MSAs are set forth in 21.8 following.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories

The following rate category applies to Switched Access Service:

- Switched Transport (described in 6.1.2(B) following)

(B) Switched Transport

The Switched Transport rate category provides the transmission facilities between the customer's premises and the end office switch(es) where the customer's traffic is switched to originate or terminate the customer's communications.

Switched Transport provides a one-way or two-way voice frequency transmission path composed of facilities determined by the Telephone Company which permit the transport of calls in the originating direction and in the terminating direction, though not simultaneously. This voice frequency transmission path may be comprised of any form or configuration of plant capable of, and typically used in, the telecommunications industry for transmitting voice and associated telephone signals within the frequency bandwidth of approximately 300 to 3000 Hz.

Switched Transport is comprised of an Entrance Facility, Direct-Trunked Transport, and various optional features and functions. Descriptions of the Switched Transport components are provided in (1) through (3) following.

Switched Transport is ordered under the Access Order provisions set forth in Section 5 preceding. Ordering provisions as set forth in 2.4.8 preceding will apply when more than one Exchange Telephone Company is involved in the provision of a Switched Transport facility.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Switched Transport (Cont'd)

(1) Entrance Facility

An Entrance Facility provides the communication path between a customer's premises and the Telephone Company's serving wire center for that premises. The Entrance Facility is dedicated to the use of a single customer and is available for use with all line side and trunk side Switched Access services. An Entrance Facility is provided even if the customer's premises and the serving wire center are located in the same building.

The Entrance Facility rate element includes the transmission medium of the facility as well as certain circuit equipment that is used at the ends of the facility and employed to provision the channels on the transmission medium. The Entrance Facility rate element also includes an Interface Group, which defines the technical characteristics and types of signaling capability associated with the connection (i.e., STS1) that comprises the Entrance Facility. The following types of Entrance Facility are available:

(a) Reserved

(b) Reserved

(c) Reserved

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Switched Transport (Cont'd)

(1) Entrance Facility (Cont'd)

(d) STS1 Entrance Facility

Synchronous Transport Signal Level 1 (STS1) channels provide for the SONET transmission of 51.84 Mbps of data. The signal consists of overhead and a Synchronous Payload Envelope (SPE). The overhead portion of the signal is used for controlling, framing and maintaining the signal. The SPE contains the customer information.

STS1 is provisioned over the Telephone Company's SONET network and may be configured as a stand alone two-point service or connected to an OC level SONET service or hubbed to an STS1/DS1 Multiplexer.

Customers ordering STS1 service must specify the interface requested (i.e., STS1 interface or DS3 interface) and how the signal is to be formatted (i.e., STS1, STS1 with VT1.5 mapping, or STS1 with DS3 mapping). An STS1 with VT1.5 mapping can be multiplexed to 28 DS1s using the STS1/DS1 Multiplexing optional feature set forth in 6.1.2(B)(5)(d) following. Virtual Tributary (VT) mapping is a SONET structure designed for the transport of sub-STS1 payloads. A DS1 is mapped into the SONET format using a VT1.5 as a packaging mechanism that is internal to the SONET signal.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Switched Transport (Cont'd)

(1) Entrance Facility (Cont'd)

(d) STS1 Entrance Facility (Cont'd)

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 may be mapped for either one DS3 or 28 DS1s. However, individual DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an STS1 be mapped as a DS3 multiplexed to the DS1 level, a DS3 to DS1 multiplexing arrangement will be required.

STS1 Entrance Facility rates may vary based on distance. The mileage used to determine the monthly rate for entrance facilities located outside a Telephone Company Central Office is the airline distance between the customer's designated premises and the Telephone Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes.

STS1 service is provided where SONET facilities are available with sufficient bandwidth capacity to meet the customer's request.

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Switched Transport (Cont'd)

(1) Entrance Facility (Cont'd)

(e) OptiPoint Entrance Facilities

OptiPoint entrance facilities provide point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities. Detailed service description for OptiPoint service is set forth in 6.2.9 following.

(2) Direct-Trunked Transport

Direct-Trunked Transport provides the communication path between the serving wire center of a customer's premises and an end office or between the serving wire center and an access tandem when transport from the access tandem to the end office is routed on circuits used in common by multiple access customers. Direct-Trunked Transport is dedicated to the use of a single customer and does not require switching at an access tandem. Direct-Trunked Transport is available for use with all line side and trunk side Switched Access services.

Direct-Trunked Transport is not available to end offices that lack recording and measuring capabilities needed to provide Direct-Trunked Transport. Direct-Trunked Transport is also not available for TFC Access Service when the required SSP function is located at the access tandem.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(B) Switched Transport (Cont'd)

(2) Direct-Trunked Transport (Cont'd)

Direct-Trunked Transport provides for the transmission facilities between the Telephone Company's serving wire center and an end office when such facilities are not switched through an access tandem, or between the Telephone Company's serving wire center and the access tandem. This includes the transmission medium itself as well as certain circuit equipment that is used at the ends of the interoffice links and employed to provision the channels on the transmission medium and circuit equipment used within the network to manage the circuits at intermediate locations.

The Telephone Company applies a 50% billing percentage to the Direct-Trunked Transport termination (fixed) rate on jointly-owned circuits, and applies 100% on wholly-owned circuits. When the Direct-Trunked Transport facility is zero (i.e., collocated serving wire centers), neither the Direct-Trunked Transport facility (per mile) rate nor the Direct-Trunked Transport termination (fixed) rate will apply.

Direct-Trunked Transport also provides for the transmission facilities between the Telephone Company's serving wire center and a hub that interconnects facilities for both Tandem-Switched Transmission and Direct-Trunked Transport.

(5) Chargeable Optional Features

(a) Reserved

(b) Reserved

(c) Reserved

(d) Multiplexing

Multiplexing provides for arrangements to convert a single higher capacity or bandwidth circuit for bulk transport to several lower capacity or bandwidth circuits. Multiplexing is only available at Telephone Company designated Hubs (end offices) arranged for multiplexing or at the access tandem trunk on the serving wire center side of the access tandem. All types of multiplexing may not be available at each Hub location.

Listed below are the multiplexing arrangements offered with switched access.

1. STS1/DS1 Multiplexing

An arrangement that provides transport of sub-STS1 payloads by converting an STS1 with VT1.5 mapping to 28 DS1s. The STS1/DS1 Multiplexing feature is available at Telephone Company provided fiber optic terminals equipped with VT1.5 configuration cards.

The rates and charges applicable for the multiplexing options described in (d) preceding are set forth in 6.8.2(D) following.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.2 Rate Categories (Cont'd)

(H) Zone Density Charges

Zone density charges are applicable only to STS1 and OptiPoint switched access services (i.e., Entrance Facility, Direct-Trunked Transport, STS1/DS1 Multiplexing, Configuration Nodes and Cards) provided at the Telephone Company designated exchanges set forth in Section 6.7.17 following. Zone density charges are recurring rates that apply each month or fraction thereof that an STS1 or OptiPoint switched access service is provided. For billing purposes, each month is considered to have 30 days.

6.1.3 Special Facilities Routing

A customer may request that the facilities used to provide Switched Access Service be specially routed. The conditions, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are as set forth in Section 11 following.

6.1.4 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the makeup of the Telephone Company facilities and services provided from the customer's premises to the first point of switching. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

6.1.5 Testing

(A) Acceptance Testing

At the customer's request, the Telephone Company will cooperatively test certain parameters at the time of installation. The customer will not be charged for these tests.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.1 General (Cont'd)

6.1.5 Testing (Cont'd)

(B) In-Service Testing

At the customer's request, the Telephone Company will provide In-Service Testing of Switched Access services after the time of installation. The customer will not be charged for these tests. These In-Service Tests will be provided on an automatic basis (i.e., no Telephone Company or customer technicians involved) or on a cooperative basis (i.e., Telephone Company technician(s) involved at the Telephone Company end office and customer technician(s) involved at the customer's premises). The parameters to be tested include: 1004 Hz loss, c-message noise, and balance (return loss).

In the case of Automatic Testing, the customer shall provide remote office test lines and 105 type test lines with associated responders or their functional equivalent. When Automatic Testing is not available in a Telephone Company end office, Cooperative Testing will be substituted.

The 1004 Hz loss and c-message noise tests will be provided on a quarterly basis, while the balance test will be provided on an annual basis.

Additional tests, for which charges do apply, are described in 13.1.10(A) following. Charges for these additional tests are set forth in 13.2 and 13.3.1(A).

6.1.6 Ordering Options and Conditions

Switched Access Service is ordered under the Access Order provisions set forth in Section 5 preceding. Also, included in that section are other charges which may be associated with ordering Switched Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.).

6.1.7 Reserved For Future Use

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services

(A) Basic Service Description

OptiPoint services provide point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities. There are four levels of OptiPoint services: OptiPoint-3 (OC3) is provided at a terminating bit rate of 155.52 Mbps; OptiPoint-12 (OC12) is provided at a terminating bit rate of 622.08 Mbps; OptiPoint-48 (OC48) is provided at a terminating bit rate of 2488.32 Mbps; and OptiPoint-192 (OC192) is provided at a terminating bit rate of 9953.28 Mbps.

OptiPoint services are provided on a month-to-month basis or for periods of one, three or five years. When a customer orders OptiPoint service, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the OptiPoint circuits.

(1) Entrance Facilities

OptiPoint entrance facility channels may be used to connect the following:

- a customer designated premises to another customer designated premises, configured at wire center locations between the two premises; or

- a customer designated premises to a Telephone Company location where service configuration is performed.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Entrance Facilities (Cont'd)

(a) Based on customer requirements, OC3 service may be provisioned in the following configurations:

(i) OC3 - three Synchronous Transport Signals (STS1) channels which each contain the following:

- one DS3 or STS1 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping; or

(ii) A single concatenated OC3c channel that is STS3c mapped.

(b) Based on customer requirements, OC12 service may be provisioned in the following configurations:

(i) OC12 - twelve STS1 channels which each contain:

- one DS3 or STS1 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping;

(v) Combinations of OC3c, OC12c and OC48c channels subject to utilization of the total OC192 capacity.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Entrance Facilities (Cont'd)

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 channel may be mapped for either one DS3 or 28 DS1s. However, DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an OC3, OC12, OC48 or OC192 service be configured with a combination of DS3 and DS1 channels, a DS3 to DS1 multiplexing arrangementwill be required.

Upon ordering OptiPoint service, the customer is responsible for identifying the STS signal configuration. This information is used in determining the route and connection in the network. If a new configuration is requested subsequent to the initial activation, a service reconfiguration charge will apply on a per service basis, as set forth in Section 6.8.2(D)(11)(a). The service reconfiguration charge is in addition to all applicable configuration node and configuration card charges associated with the new configuration.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Entrance Facilities (Cont'd)

OptiPoint service is provided with electronics that automatically activate in case of failure of the primary electronics. Since OptiPoint is a point-to-point service, SONET ring survivability will not be available. Rates for additional protection options requested by the customer will be quoted on an individual case basis and are in addition to the rates for OC3, OC12, OC48 and OC192 service.

OptiPoint entrance facilities provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. An OptiPoint entrance facility may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OptiPoint entrance facility at the customer's premises location.

OptiPoint entrance facilities will be provided with or without Telephone Company provided terminal equipment at the customer's premises. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Telephone Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to this interface.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Entrance Facilities (Cont'd)

When entrance facilities are ordered in conjunction with special access high capacity services provisioned without terminating equipment at the customer's premises as set forth in Section 7 following, a common interface will be provisioned in accordance with the conditions governing shared use of facilities as set forth in Section 7.4.8 following. (D)

(D)

OC3, OC12, OC48 and OC192 services may be configured for lower bandwidth services, at suitably equipped wire centers, by using appropriate OC3, OC12, OC48 or OC192 configuration nodes as set forth in (2) following.

OptiPoint entrance facilities are available only where facilities and operating conditions permit. The Telephone Company will work cooperatively with the customer to determine if suitable existing Telephone Company SONET based facilities are available to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for OptiPoint. Where facilities and/or operating conditions do not permit the provision of OptiPoint entrance facilities, and the customer desires the Telephone Company to provision OptiPoint service, Special Construction charges, as set forth in Section 14 following, may apply.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration

There are two types of charges associated with a service configuration as described following:

(a) Configuration Node - is an arrangement at the system level that allows an OC3 service bandwidth to add or drop lower level signals up to three DS3s or STS1s or three groups of twenty-eight DS1s. An OC12 service bandwidth can add or drop lower level signals up to four OC3s or twelve DS3s or STS1s or equivalent combinations of OC3s, DS3s, STS1s and DS1s. An OC48 service bandwidth can add or drop lower level signals up to four OC12s, sixteen OC3s, forty-eight DS3s or STS1s or equivalent combinations of OC12s, OC3s, DS3s and STS1s. An OC192 service bandwidth can add or drop lower level signals up to four OC48s, sixteen OC12s, sixty-four OC3s, one hundred ninety-two DS3s or STS1s or equivalent combinations of OC48s, OC12s, OC3s, DS3 and STS1s.

When the customer requests that a DS1 channel be connected to an OC48 or OC192 service terminating at a Telephone Company central office, a DS3 to DS1 or STS1 to DS1 multiplexing arrangement, as set forth in 6.1.2(B)(5)(d) preceding, may be required.

Direct trunked transport can be connected between serving wire centers with configuration nodes at a lower OC-n speed than the channel termination, if the transport is between a lower speed configuration function and one of the following:

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration

(a) (Cont'd)

- another lower speed configuration function; or

- another lower speed channel termination.

All of the above terminations must be provided at the same speed as the transport.

(b) Configuration Card - provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Telephone Company central office. DS1, DS3, OC3 concatenated, and STS-1 level cards are available for interfacing OptiPoint-3 service with lower level signals. DS1, DS3, OC3, OC3 concatenated, OC12 concatenated and STS-1 level cards are available for interfacing with OptiPoint-12 service. DS3, OC3, OC12, OC3 concatenated, OC12 concatenated and STS-1 level cards are available for interfacing with OptiPoint-48 service. DS3, OC3, OC12, OC48, OC3 concatenated, OC12 concatenated, OC48 concatenated and STS-1 level cards are available for interfacing with OptiPoint-192 service. When full OC3, OC12 and OC48 concatenated service is provided, no configuration node is required.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration (Cont'd)

When a customer requests an OptiPoint service configuration, both the applicable node and card rate elements will apply. The rates for the configuration node and associated card(s) apply at the end office, and at each end of the entrance facility when Telephone Company provided terminal equipment is provided at the customer premises.

When the customer elects to furnish its own terminal equipment at the customer premises, the rates for the configuration node and associated card(s) apply only at the end of the entrance facility where Telephone Company equipment is provided.

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between the customer's premises and the Telephone Company serving wire center for that premises. Additional regeneration equipment will only be provided by the Telephone Company when the actual fiber facility distance between the customer's premises and serving wire center exceeds SONET design limits. A monthly recurring SONET Regeneration charge, as set forth in 6.8.2 following, will apply for each regenerator required for the provision of OptiPoint service.

Rates and charges for the configuration node and configuration cards are set forth in 6.8.2 following. Additional labor charges as set forth in Section 13 following will apply to configuration changes for STS level service.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

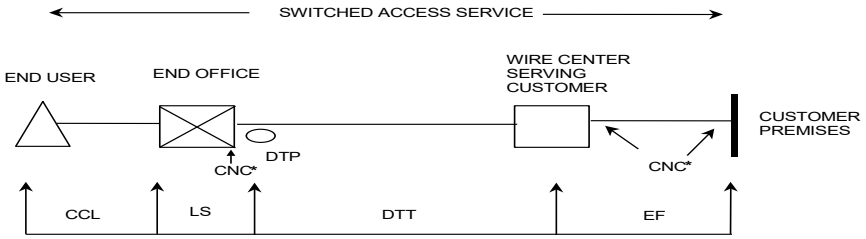

6.2.9 OptiPoint Services (Cont'd)

(B) Conditions

The rates and charges for OptiPoint services are set forth in Section 6.8.2 following and are in addition to any applicable rates and charges set forth in any other sections of this service guide. Nonrecurring charges and monthly recurring rates applicable for OptiPoint service are billed in advance. A nonrecurring service upgrade charge as described in Section 6.7.1(C)(3) following may also apply to OptiPoint services.

(1) Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation of service) and are developed at full cost recovery on a labor hours per labor time basis. For customers who elect the one year commitment period the nonrecurring charge will apply for the installation of the service. However, if at the end of the one year commitment period the customer elects to renew their one year commitment plan, a nonrecurring charge will not apply for the renewal.

(2) Monthly recurring charges are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(B) Conditions (Cont'd)

(3) OptiPoint service is available on a month-to-month basis or for minimum commitment periods of one, three or five years. If the customer requests that service be discontinued prior to the expiration of the one, three or five year minimum commitment period, a 50% penalty will be assessed for the remaining months of the term. For example, if a customer who has selected the three year option terminates service in month 12, they will be charged 50% of the remaining 24 months of billing. Additionally, customers may discontinue service, without penalty, should the monthly recurring rates increase by 10% or more at any one time. Upon expiration of the one, three or five year minimum commitment period, the customer may renew their OptiPoint service at month-to-month service rates. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the one, three or five year service period, the commitment period and OptiPoint rates in effect at the time of expiration will automatically renew. The customer can terminate OptiPoint service at the end of the minimum commitment period with no penalty or obligation to continue the service. Further, if the customer notifies the Telephone Company in writing 90 days prior to the expiration of the one, three or five year service period, the commitment period and OptiPoint rates in effect at the time of expiration will automatically renew.

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(B) Conditions (Cont'd)

(3) The customer can terminate OptiPoint service at the end of the minimum commitment period with no penalty or obligation to continue the service. Further, if the customer notifies the Telephone Company in writing 90 days prior to the expiration date of their minimum commitment period with their intent to not renew their OptiPoint service, the customer will have six (6) months after the expiration date to submit their disconnect order(s). If the customer fails to submit their disconnect order(s), by the end of the six (6) month period, the commitment period in effect at the time of the original expiration period will automatically renew at the current service guideed rates. If the customer submits their disconnect order(s) after the six (6) month period, termination liability charges will apply. Termination liability charges will be calculated at 50 % of the monthly recurring charges for the remaining months of the commitment period up to a maximum of twelve (12) months. Time from the expiration of the original commitment period until the disconnect order(s) are received will apply for calculation of the termination liability charges.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)

6.2.9 OptiPoint Services (Cont'd)

(B) Conditions (Cont'd)

Customers may upgrade OptiPoint service without incurring termination liability charges under the following circumstances*:

(1) The order for the disconnect of the existing OptiPoint and the order for the upgraded OptiPoint must be received at the same time.

(2) The new OptiPoint is provided between the same customer and central office locations as the discontinued service.

(3) The service period of the new OptiPoint is equal to or greater than the service period of the existing OptiPoint service.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Obligations of the Telephone Company

In addition to the obligations of the Telephone Company set forth in Section 2 preceding, the Telephone Company has certain other obligations pertaining only to the provision of Switched Access Service. These obligations are as follows:

6.5.1 Network Management

The Telephone Company will administer its network to insure the provision of acceptable service levels to all telecommunications users of the Telephone Company's network services. Generally, service levels are considered acceptable only when both end users and customers are able to establish connections with little or no delay encountered within the Telephone Company network. The Telephone Company maintains the right to apply protective controls, i.e., those actions, such as call gapping, which selectively cancel the completion of traffic, over any traffic carried over its network, including that associated with a customer's Switched Access Service. Generally, such protective measures would only be taken as a result of occurrences such as failure or overload of Telephone Company or customer facilities, natural disasters, mass calling or national security demands. In the event that the protective controls applied by the Telephone Company result in the complete loss of service by the customer, the customer will be granted a Credit Allowance for Service Interruption as set forth in 2.4.4(B)(3) preceding.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Obligations of the Telephone Company (Cont'd)

6.5.2 Design and Traffic Routing of Switched Access Service

When ordering line side or trunk side Switched Access Services, the customer must, at a minimum, specify the Switched Transport facilities to be used (i.e., Entrance Facility and Direct-Trunked Transport). When specifying the Switched Transport facilities to be used, the customer must indicate if the facilities are new or existing. The customer is also required to specify whether the service should be provided by originating only, terminating only, or two-way trunk groups.

Selection of facilities and equipment and traffic routing of the service are based on standard engineering methods, available facilities and equipment, and the Telephone Company traffic routing plans. If the customer desires routing or directionality different from that determined by the Telephone Company, the Telephone Company will work cooperatively with the customer in determining (1) whether the service is to be routed directly to an end office or through an access tandem switch and (2) the directionality of the service. Additionally, for Feature Group B the customer may order the optional feature Customer Specification of Switched Transport Termination.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.5 Obligations of the Telephone Company (Cont'd)

6.5.3 Provision of Service Performance Data

Subject to availability, end-to-end service performance data available to the Telephone Company through its own service evaluation routines, may also be made available to the customer based on previously arranged intervals and format. These data provide information on overall end-to-end call completion and non-completion performance, e.g., customer equipment blockage, failure results and transmission performance. These data do not include service performance data which are provided under other service guide sections, e.g., testing service results. The charges for providing such data will be determined on an individual case basis.

6.5.4 Reserved For Future Use

6.5.5 Reserved For Future Use

6.6 Obligations of the Customer

In addition to the Obligations of the Customer set forth in Section 2 preceding, the customer has certain specific obligations pertaining to the use of Switched Access Service. These obligations are as follows:

6.6.1 Report Requirements

Customers are responsible for providing the following reports to the Telephone Company, when applicable.

(A) Jurisdictional Reports

When a customer orders Switched Access Service for both interstate and intrastate use, the customer is responsible for providing reports as set forth in 2.3.11 preceding. Charges will be apportioned in accordance with those reports. The method to be used for determining the interstate charges is set forth in 2.3.12 preceding.

(B) Reserved For Future Use

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.6 Obligations of the Customer (Cont'd)

6.6.2 Reserved For Future Use

6.6.3 Reserved For Future Use

6.6.4 Design of Switched Access Services

When a customer orders Switched Access Service on a per line or per trunk basis, it is the customer's responsibility to assure that sufficient access services have been ordered to handle its traffic.

6.6.5 Customer's V&H Location

The Customer shall provide to the Telephone Company at the time services are requested the V&H coordinates of its facilities at the point of termination.

6.7 Rate Conditions

This section contains the specific conditions governing the rates and charges that apply for Switched Access Service.

6.7.1 Description and Application of Rates and Charges

There are three types of rates and charges that apply to Switched Access Service. These are monthly recurring rates (including fixed and per mile), nonrecurring charges, and zone density charges. These rates and charges are applied differently to the various rate elements as set forth in (D) following.

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. Monthly rates may be either distance sensitive (per mile) or non-distance sensitive (fixed). For billing purposes, each month is considered to have 30 days.

(B) Reserved For Future Use

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation or change to an existing service) and are developed at full cost recovery on a labor hours per labor time basis. When service is jointly provided under the Single Bill Method of Multiple Company (Interconnection Point) Billing, the nonrecurring charges reflect the average weighted costs of the exchange telephone companies involved and are applicable to all nonrecurring functions in the provision of Switched Access Service. Under the Multiple Bill Method, the nonrecurring charges reflect only the Telephone Company's costs and are applicable only when the nonrecurring function occurs within its territory. The types of nonrecurring charges that apply for Switched Access Service are: installation of service, installation of optional features and service rearrangements.

(1) Installation of Service

Nonrecurring charges apply to each Switched Access Service installed. The nonrecurring charge for the installation of Entrance Facilities is applied for each point of termination.

(2) Installation of Optional Features

If a separate nonrecurring charge applies for the installation of an optional feature available with Switched Access Service, the charge applies whether the feature is installed coincident with the initial installation of service or at any time subsequent to the initial installation of service.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements

Service rearrangements are changes to existing services installed which do not result in either a change in the minimum period requirements as set forth in 5.2.6 preceding or a change in the physical location of the point of termination at the customer's premises or the customer's end user's premises. Changes which result in the establishment of new minimum period obligations are treated as disconnects and starts. Changes in the physical location of the point of termination are treated as moves and are described and charged for as set forth in 6.7.5 following.

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves an actual physical change to the service.

Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for all outstanding indebtedness for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name—e.g., AT&T-Long Lines to AT&T-Communications),

- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

- Change in billing data (name, address, or contact name or telephone number),
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number,
- Change of jurisdiction

All other service rearrangements will be charged for as follows:

- If the change involves the addition of or a modification to an optional feature which has a separate nonrecurring charge, that nonrecurring charge will apply.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

- The nonrecurring charges associated with upgrades in capacity (i.e., DS1s converting to STS1s or DS3s converting to STS1s) will not apply when the customer maintains the same customer premises location. Requests to add or change optional features will be subject to the nonrecurring charges associated with the features requested.

- A nonrecurring service upgrade charge will apply per DS1, DS3 or STS1 upgraded when converting existing high capacity services to OptiPoint service. The charge does not apply when OptiPoint is ordered as new service and no existing high capacity services are being relocated to the OptiPoint service. For orders for new services submitted after February 5, 2000, the nonrecurring service upgrade charge will apply for each DS1, DS3 or STS1 channel connected to new OptiPoint service when existing DS1, DS3 or STS1 facilities between the same points of termination as the new OptiPoint service are disconnected within 30 days of the order for new services.

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.1 Description and Application of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

- For service rearrangements involving OC3, OC12, OC48 or OC192 switched access services (e.g., OptiPoint Service), a charge equal to one half the Optical Service Charge set forth in 6.8.1 will apply for each node rearranged.

- For all other changes, including the addition of, or modifications to, optional features without separate nonrecurring charges, a charge equal to one half the Switched Transport nonrecurring (i.e., installation) charge will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply (i.e., it will not apply per transmission path).

6.7.2 Minimum Periods

The minimum service period for all switched access services is one month.

6.7.3 Minimum Monthly Charge

Switched Access Service is subject to a minimum monthly charge. The minimum charge applies for the total capacity provided. The minimum monthly charge consists of the following elements:

For flat rated Switched Access services, the minimum monthly charge for the Entrance Facility and Direct-Trunked Transport rate elements is the applicable monthly rate for the service.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.5 Moves

A move involves a change in the physical location of one of the following:

- The point of termination at the customer's premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

(A) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the capacity affected. There will be no change in the minimum period requirements.

(B) Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

When moves to a different building occur simultaneously with rerouting trunks from tandem to end office or from end office to tandem transport, a charge equal to one half of the associated installation charges will apply.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.12 Mileage Measurement

The mileage to be used to determine the rate for Direct-Trunked Transport is calculated based on the airline distance between the end office switch where the call carried by Switched Transport service originates or terminates and the customer's serving wire center, except as set forth in (A) through (M) following. The V&H coordinates method is used to determine mileage. This method is set forth in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4 for Wire Center Information (V&H coordinates).

If the calculation results in a fraction of a mile, always round up to the next whole mile before applying the rates.

Exceptions to the mileage measurement rules are as follows:

(A) When Switched Transport facilities of different capacities are interconnected by a multiplexer at a location other than the serving wire center, mileage is determined using the V&H coordinates method as set forth following:

(1) When only one multiplexer is involved, mileage for Direct-Trunked Transport is measured separately from the serving wire center to the hub where multiplexing (i.e., facilities interconnection) occurs and then measured from the hub to the end office where the call is switched to originate or terminate.

(2) When more than one multiplexer is involved, mileage for Direct-Trunked Transport is measured successively from the serving wire center to the first hub, from the first hub to the second hub, and then from the second hub to the end office where the call is switched to originate or terminate.

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.12 Mileage Measurement (Cont'd)

(A) (Cont'd)

(2) (Cont'd)

If more than two hubs are involved, mileage is measured successively between each intervening hub, with the final measurement being from the last hub to the end office where the call is switched to originate or terminate.

(B) When transport is provided to a host/remote arrangement, Direct-Trunked Transport rates apply depending on the transport service provided from the host/remote arrangement. Mileage is calculated from the V&H coordinates of the Host office and the RSS/RSM.

(C) When Switched Transport is provided to a Class 4/5 switch (i.e., a switch that functions as both an access tandem and end office) for both access tandem routing and end office routing, mileage is calculated using the V&H coordinates method.

Direct-Trunked Transport is measured from the serving wire center to the hub interconnecting the Tandem-Switched Transport and the Direct-Trunked Transport facilities and then measured from the hub to the end office.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.13 Shared Use

Shared use occurs when Switched Access Service and Special Access Service are provided over the same analog or digital high capacity facility through a common interface. The conditions governing the provision of Shared Use Facilities are set forth in 7.4.8 following. (D)

(D)

When a Switched Access service is provided over the same Special Access High Capacity facility through a common interface, the facility will be ordered, provided, and rated only as Special Access Service. Shared Use of Switched Access facilities (i.e., Special Access Services provided over Switched Access facilities) is not allowed. (N) (N)

6.7.14 Reserved For Future Use

6.7.15 Reserved For Future Use

6.7.16 Facility Hubs

A customer has the option of ordering STS1 facilities to a facility Hub for channelizing to individual services requiring lower capacity facilities.

Different locations may be designated as Hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to voice may occur at a different location. When ordering, the customer must specify the desired multiplexing Hub(s) selected from the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. This service guide identifies the type(s) of multiplexing functions which are available and the wire centers at which they are available.

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a Hub. The transmission performance for the end to end service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when an STS1 facility is multiplexed to DS1 channels, the transmission performance of the channelized services will be DS1, not STS1.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rate Conditions (Cont'd)

6.7.16 Facility Hubs (Cont'd)

The Telephone company will commence billing the monthly rate for the facility to the Hub on the date specified by the customer on the service order. Individual services utilizing these facilities may be installed coincident with the installation of the facility to the Hub, or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for an STS1 channel termination, channel mileage (when applicable), and multiplexing at the time the facility is installed. Individual service rates (by service type) will apply for a channel termination and additional channel mileage (as required) for each channelized service. These will be billed to the customer as each individual service is installed.

Cascading multiplexing occurs when an STS1 facility is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, an STS1 facility is de-multiplexed to twenty-eight DS1 facilities, and then one of the DS1 facilities is further de-multiplexed to individual Voice Grade channels.

When cascading multiplexing is performed, whether in the same or a different Hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different Hubbing locations, channel mileage charges also apply between the Hubs.

ACCESS SERVICE

6. Switched Access Service (Cont'd)

6.7 Rates Conditions (Cont'd)

6.7.17 Switched Access Zone Density Plan

The Switched Access Zone Density Plan is applicable only to STS1 and OptiPoint Entrance Facilities, Direct-Trunked Transport, STS1 to DS1 Multiplexing and OptiPoint configuration node and configuration card services as set forth in Section 6.1.2 and 6.2.9 preceding.

The Switched Access Zone Density Plan will become effective concurrent with the first operational Expanded Interconnection arrangement, in the relevant Telephone Company study area.

The Entrance Facility, Direct-Trunked Transport, STS1 to DS1 Multiplexing and OptiPoint Configuration Nodes and Cards subject to the Zone Density Plan are dependent upon the zone in which the Telephone Company serving area is located. Direct-Trunked Transport provided between wire centers in different zones will be assessed the rate for the higher zone. Specific Zone Density Charges are set forth in Sections 6.8 and 21.8 following. The zones for each Telephone Company serving area are identified following:

ACCESS SERVICE

7. Special Access Service

Effective October 18, 2020, the Company offers Dedicated Ethernet, Switched Ethernet, and Wavelength Services on a private carriage basis and reserves the right to make individualized decisions regarding the provision of service to individual customers. The Company may negotiate the specific prices and terms for Dedicated Ethernet, Switched Ethernet, and Wavelength Services for each individual customer. Unless otherwise specified in this section, the general terms and conditions of this Service Guide apply to Dedicated Ethernet, Switched Ethernet, and Wavelength Services. [1]

As of August 1, 2017, Special Access Services were changed to a Competitive or Non-Competitive designation. Non-Competitive End-User Channel Terminations (EUCTs) are filed as part of Tariff F.C.C. No. 4 and remain under Price Cap Regulation. Other Special Access Services required to complete the circuit are covered by this ISG.

The following areas are deemed Non-Competitive for Special Access EUCTs and are covered by Tariff F.C.C. No. 4. Areas not listed are deemed Competitive for Special Access Services and are covered by this ISG.

ACCESS SERVICE

7. Special Access Service

7.1 General

Special Access Service provides a transmission path to connect customer designated premises*, either directly or through a Telephone Company Hub where bridging or multiplexing functions are performed, or to connect a customer designated premises and a WATS Serving Office. Special Access Service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access Service in this service guide are analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

The provision of Special Access in all situations is dependent upon the availability of Telephone Company plant and equipment.

The rates and charges in this section apply to all special access customers served by the Telephone Company, except for customers in the pricing flexibility Metropolitan Statistical Areas (MSAs) listed in Section 22.3 following. The rates and charges for special access customers in the pricing flexibility MSAs are set forth in Section 22.5 following.

* Telephone Company Centrex CO-like switches are considered to be customer premises for purposes of this service guide.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.1 Channel Types

Each type of Special Access Channel has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

The Customer can order a basic channel and select from a list of available transmission parameters, interface combinations, and optional features to design a channel which meets the Customer's specific communications needs.

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a customer's use of the channel nor to imply that the channel is limited to a particular use.

7 Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.1 Channel Types (Cont'd)

Following is a brief description of each type of channel:

Voice Grade [1] - A channel for the transmission of analog signals within an approximate bandwidth of 300-3000 Hz.

Program Audio [1] - A channel for the transmission of audio signals. The nominal frequency bandwidths are from 300 Hz to 2500 Hz, from 200 to 3500 Hz, from 100 to 5000 Hz, from 50 to 8000 Hz, or from 50 to 15000 Hz.

Video [1] - A channel for the transmission of a standard 525 line/60 field monochrome or National Television Systems Committee color video signal and up to four associated 5 or 15 kHz audio signals. The bandwidth for a video channel is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 Mhz.

Digital Data [1] - A channel for the digital transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56.0 or 64.0 kbps.

High Capacity – A channel for the transmission of synchronous transport signals at the rate of 51.84 Mbps (STS1).

Shared SONET Ring - A SONET-based shared ring with bandwidth capacities of 1.544 Mbps (DS1) and 44.736 Mbps (DS3).

OptiPoint - A point-to-point channel providing high speed synchronous optical fiber-based full duplex data transmission capabilities at rates of 155.52 Mbps (OC3), 622.08 Mbps (OC12), 2488.32 Mbps (OC48), or 9953.28 Mbps (OC192).

[1] Effective February 1, 2020, Voice Grade, Program Audio, Analog Video and Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7 Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.1 Channel Types (Cont'd)

SONET OC Ring – A dedicated high capacity network for the transmission of voice, data and video via a self-healing ring topology at bandwidth capacities of 155.52 Mbps (OC3), 622.08 Mbps (OC12), 2488.32 Mbps (OC48), or 9953.28 Mbps (OC192).

Ethernet Transport – A high speed data transport service that provides point-to-point transmission of customer's data communications in a fast packet based Ethernet protocol at transport speeds of 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps, 1 Gbps, 2.5 Gbps*,10 Gbps* and 100 Gbps*.

Ethernet Virtual Private Line – A high speed data transport service that provides the ability to order Ethernet service where a single customer can support multiple applications with varying Quality of Service at transport speeds of 10 Mbps, 30 Mbps, 100 Mbps, 500 Mbps, 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

Detailed descriptions of each of the channel types are provided in 7.2 following.

The customer also has the option of ordering high capacity facilities (e.g., 51.84 Mbps, 155.52 Mbps, 622.08 Mbps, 2488.32 Mbps or 9953.28 Mbps) to a Telephone Company Hub for multiplexing to individual channels of a lower capacity or bandwidth. Descriptions of the types of multiplexing available at the Hubs, as well as the number of individual channels which may be derived from each type of facility are set forth in 7.2 following. Descriptions of the optional features and functions are also set forth in 7.2 following.

* Rates for 2.5 Gbps,10 Gbps and 100 Gbps Ethernet Transport Service may be obtained by contacting your account manager.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.1 Channel Types (Cont'd)

For example, a customer may order a 1.544 Mbps facility from a customer designated premises to a Telephone Company Hub. The 1.544 Mbps facility may be multiplexed at the same or a different Hub to Voice Grade channels or may be extended to other customer designated premises. Optional features may be added to either the 1.544 Mbps or the Voice Grade Channels.

7.1.2 Rate Categories

There are three basic rate elements which apply to Special Access Service:

- Channel Terminations (described in 7.1.2(A) following)
- Channel Mileage (described in 7.1.2(B) following)
- Optional Features and Functions (described in 7.1.2 (C) following)

(A) Channel Termination

The Channel Termination rate category provides for the communications path between a customer designated premises and the serving wire center or WATS Serving Office of that premises. Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the point of termination (POT) and the type of signaling capability if any. The signaling capability itself is provided as a part of this rate category. One Channel Termination charge applies per customer designated premises at which the channel is terminated. Channel Termination charges for DS1 and DS3 High Capacity, STS1, OptiPoint-3, 12, 48 and 192 High Capacity Services may vary based on distance, as set forth in 7.5.8(A) following. Special Access Service used in connection with Switched Access service is provided as set forth in Section 6.1.1 of the CenturyLink Operating Companies Tariff F.C.C. No. 9.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.2 Rate Categories (Cont'd)

(B) Channel Mileage

The Channel Mileage rate category provides for the end office equipment and the transmission channel between the serving wire centers associated with two Customer designated premises, between a serving wire center associated with a Customer designated premises and a Telephone Company hub, between two Telephone Company hubs or between a WATS Serving Office and a Customer serving wire center when the two are not collocated. Channel Mileage rates are made up of the Channel Mileage Facility rate and the Channel Mileage Termination rate. Channel Mileage charges are set forth in Section 7.5.

(1) Channel Mileage Facility (Per Mile)

The Channel Mileage Facility rate recovers the cost for the transmission path which extends between the Telephone Company serving wire centers and/or hub(s) and includes primarily outside plant used to provide the facility.

(2) Channel Mileage Termination (Fixed)

The Channel Mileage Termination rate recovers the cost for end office equipment associated with terminating the facility (i.e., basic circuit equipment and terminations at serving wire centers and hubs). The Telephone Company applies a 50% billing percentage to the channel mileage fixed rate on jointly owned circuits, and applies 100% on wholly owned circuits. When the Channel Mileage Facility is zero (i.e., collocated serving wire centers), neither the Channel Mileage Facility rate nor the Channel Mileage Termination rate will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.2 Rate Categories (Cont'd)

(C) Optional Features and Functions

Optional Features and Functions may be added to a Special Access service to improve its quality or utility to meet the Customer's specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combination of equipment. Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Conditioning
- Bridging
- NetPoint (ISDN PRI Functionality)

Descriptions for each of the available Optional Features and Functions are set forth in 7.2 following.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations

There are two types of service configurations over which Special Access Services are provided: two-point service and multipoint service.

(A) Two-Point Service

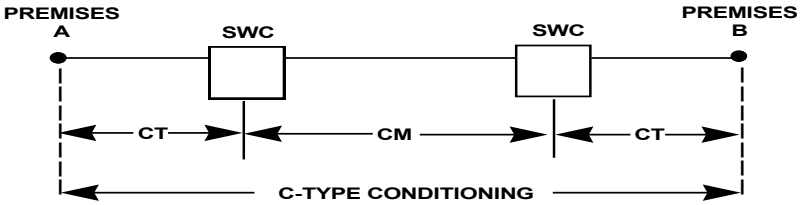

A two-point service connects two customer designated premises, either on a directly connected basis or through a Hub where multiplexing functions are performed, or a customer designated premises and a WATS Serving Office. All types of Special Access Service may be provided as two-point service.

Applicable rate elements are:

- Channel Terminations
- Channel Mileage (as applicable)
- Optional Features and Functions (when applicable)

In addition, a Special Access Surcharge as set forth in 7.4.2 following may be applicable.

The following diagram depicts a two-point Voice Grade service connecting two customer designated premises located 15 miles apart. The service is provided with C-Type Conditioning.

**CT - Channel Termination**
**CM - Channel Mileage**
**SWC - Serving Wire Center**

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(A) Two-Point Service (Cont'd)

Applicable rate elements are:

- Channel Terminations (2 applicable)
- Channel Mileage (1 Termination and 15 Facility)
- C-Type Conditioning Optional Feature

(B) Multipoint Service

Multipoint service connects three or more customer designated premises through a Telephone Company Hub. There is no limitation on the number of mid-links available with multipoint service. However, when more than three mid-links are provided in tandem, the quality of the service may be degraded. A mid-link is a channel between Hubs (i.e., bridging locations). Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in 7.2 following.

Multipoint service utilizing a customized technical specifications package as set forth in 7.2 following will be provided when technically possible. If the Telephone Company determines that the requested characteristics for a multipoint service are not compatible, the customer will be advised and given the opportunity to change the order.

When ordering, the customer will specify the desired bridging Hub(s) selected from the National Exchange Carrier Association, Inc. Service guide F.C.C. No. 4. This service guide identifies the type(s) of bridging functions which are available and the serving wire centers at which they are available.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

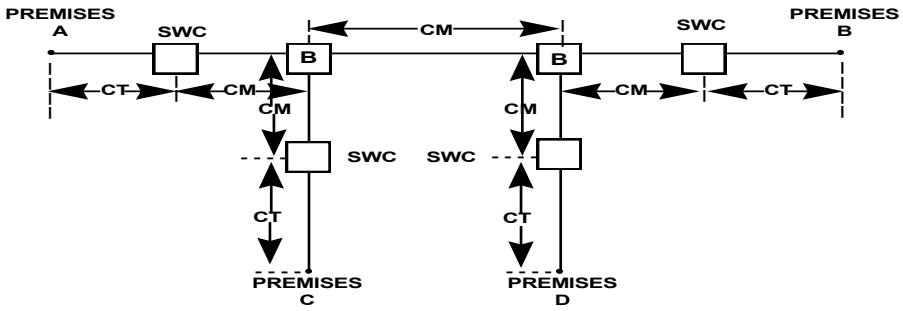

(B) Multipoint Service (Cont'd)

Applicable Rate Elements are:

- Channel Terminations (one per customer designated premises)
- Channel Mileage (as applicable between each designated customer premises and the Hub, and between Hubs)
- Bridging
- Additional Optional Features (when applicable)

In addition, the Special Access Surcharge as set forth in 7.4.2 following may be applicable.

Example: Voice Grade multipoint service connecting four customer premises via two customer specified bridging hubs.

CT - Channel Termination
CM - Channel Mileage
B - Bridging
SWC - Serving Wire Center

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.3 Service Configurations (Cont'd)

(B) Multipoint Service (Cont'd)

Applicable rate elements are:

- Channel Terminations (4 applicable)
- Channel Mileage (5 sections, Termination and Facility as appropriate)
- Bridging (6 applicable, i.e., each bridge port)

(C) Extension Service

Special Access Service utilized for connection with Feature Group A Switched Access Service is available with extensions, i.e., additional terminations of the service at different building(s) in the same or a different exchange. Feature Group A extensions within the same exchange are charged for under the Telephone Company's local and/or general exchange service tariffs. Feature Group A extensions in different exchanges and Voice Grade extensions in the same or different exchanges are charged for as Special Access Service. The rate elements which apply are: Voice Grade Channel Termination, Channel Mileage, if applicable, and Voice Bridging, if applicable. All appropriate monthly rates and nonrecurring charges set forth in 7.5.2 following will apply. Such extensions are ordered as set forth in 5.2 preceding.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.4 Alternate Use

Alternate use occurs when a Customer uses a service for different types of transmission at different times. The Customer may transfer from one type of operation to another at will. A Customer may use transmission services in any privately beneficial way but, where technical or engineering changes are required to effectuate an alternate use, charges set forth in Section 13 of this service guide may be applicable.

The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12, Specialized Service or Arrangements. The customer will pay the stated service guide rates for the Access Service rate elements for the service ordered (i.e., Channel Terminations, Channel Mileage [as applicable] and Optional Features [if any]).

Alternate uses will be allowed provided that such use meets the technical protection parameters as set forth in Section 7.2.

7.1.5 Special Facilities Routing

A customer may request that the facilities used to provide Special Access Service be specially routed. The conditions, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in Section 11 following.

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.6 Design Layout Report

At the request of the customer, the Telephone Company will provide to the customer the make-up of the facilities and services provided under this service guide as Special Access Service to aid the customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the customer at no charge, and will be reissued or updated whenever these facilities are materially changed.

7.1.7 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters:

(A) For Voice Grade Services (VG): loss, 3-tone slope, d.c. continuity and operational signaling, where technically appropriate. Where a four-wire voice transmission interface provides two-wire voice transmission, (i.e., there is a four-wire to two-wire conversion), balance (equal level echo path loss) will also be tested. Additionally, C-notched noise and C-message noise tests will be provided where technically appropriate, as well as frequency response, harmonic distortion, phase jitter, impulse noise and delay distortion for all analog facilities.

(B) All other Special Access Services will be tested to the performance parameters specified for the individual services.

Additional tests may be ordered as set forth in 13.1.10 following. Charges for these additional tests are set forth in 13.2 and 13.3.1(A).

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.1 General (Cont'd)

7.1.8 Ordering Options and Conditions

Special Access Service is ordered under the Access Order provisions set forth in Section 5 preceding. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Access Order Charges, Service Date Change Charges, Design Change Charges, etc.).

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions

For the purposes of ordering, following are the categories of Special Access:

| | |
|---|---|
| Voice Grade [1] | (VG) |
| Program Audio [1] | (AP) |
| Video [1] | (TV) |
| Digital Data [1] | (DA) |
| High Capacity | (HC) |
| Shared SONET Ring | (SSRS) |
| OptiPoint | (OC) |
| SONET OC Ring | (SOCR) |
| Ethernet Transport | (ET) |
| Ethernet Virtual Private Line | (EVPL) |
| Optical Wavelength Service | (OWS) |

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the customer. Each of the components of the service is described in this section.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the customer will be notified whether Additional Labor Charges apply. In such cases, the customer will be given an estimate of the hours to be billed before any further action is taken on the order.

[1] Effective February 1, 2020, Voice Grade, Program Audio, Analog Video and Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

The channel description specifies the characteristics of the basic channel and indicates whether the channel is provided between customer designated premises, between a customer designated premises and a Telephone Company Hub where bridging or multiplexing functions are performed, or between a customer designated premises and a WATS Serving Office.

Information pertaining to the technical specifications packages indicates the transmission parameters that are available with each package. This information is displayed in a matrix with the transmission parameters listed down the left side and the packages listed across the top. Each package is identified by a code, e.g., VGC. The first two letters of the code indicate the category of Special Access Service to which the parameters are applicable. These two letter codes are shown above in parentheses following the category of Special Access Service. The letter "C" following the two letter code indicates the technical specifications package for a customized service. A numeric or alpha-numeric designation following the two letter code indicates the specific predefined package. For a customized service, the customer may select any parameters available with that category of service as long as the parameters are compatible. When appropriate, the Technical Reference which contains detailed specifications for the parameters is shown following the matrix.

Channel interfaces at each point of termination on a two-point service may be symmetrical or asymmetrical. On a multipoint service they may also be symmetrical or asymmetrical. However, communications can only be provided between points of termination with compatible channel interfaces. Only certain channel interfaces are compatible. These are set forth in 7.3.5 following in a combination format.

Only certain channel interface combinations are available with the predefined technical specifications packages. These are delineated in the Technical References set forth in Section 7.2. When a customized channel is requested, all channel interface combinations available with the specified type of service are available with the customized channel.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

The optional features and functions available with each type of Special Access Service are also described in this section. The information indicates with which technical specifications packages the optional features and functions are available. Such information is displayed in a matrix with the optional feature or function listed down the left side and the technical specifications package listed across the top.

The Telephone Company will maintain existing transmission specifications on services installed prior to the effective date of this service guide, except that the existing services with performance specifications exceeding the standard listed in this provision will be maintained at the performance levels specified in this service guide. All services installed after the effective date of this service guide will conform to the transmission specification standards contained in this service guide or in the following Technical Reference Publication for each category of service:

| | |
|---|---|
| Voice Grade | TR-NWT-000335 |
| Program Audio | GR-337 |
| Video | GR-338 |
| Digital Data | TR-NWT-000341 |
| High Capacity | GR-54 and GR-342 |
| SONET | FR-SONET-17 |
| Ethernet Transport | ANSI / IEEE X3.802.3 |
| | ANSI / IEEE X3.802.3u |
| | ANSI / IEEE X3.802.3z |

7.2.1 Reserved For Future Use

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1]

(A) Basic Channel Description

A Voice Grade (VG) channel is a channel which provides voice frequency transmission capability in the nominal frequency range of 300 to 3000 Hz and may be terminated two-wire or four-wire.

(B) Technical Specifications Packages

| | Package VG- | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Parameter | C* | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
| Attenuation Distortion | X | X | X | X | X | X | X | X | X | X | X | X | X |
| C-Message Noise | X | X | X | X | X | X | X | X | X | X | X | X | X |
| Echo Control | X | X | X | X | | X | | X | X | | | X | X |
| Envelope Delay Distortion | X | | | | | | X | X | X | X | X | X | X |
| Frequency Shift | X | | | | | | X | X | X | X | X | X | X |
| Impulse Noise | X | | | | | X | X | X | X | X | X | X | X |
| Intermodulation Distortion | X | | | | | | X | X | X | X | X | X | |
| Loss Deviation | X | X | X | X | X | X | X | X | X | X | X | X | X |
| Phase Hits, Gain Hits, and Dropouts | X | | | | | | | | | | | | |
| Phase Jitter | X | | | | | | X | X | X | X | X | X | |
| Signal-to-C Message Noise | | | | | X | | | | | | | | |
| Signal-to-C Notch Noise | X | | | | | X | X | X | X | X | X | X | X |

* The desired parameters are selected by the customer from the list of available parameters.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(C) Channel Interfaces

The following channel interfaces for Voice Grade service do not require signaling capability: AH, DA, DB, DD, DE, DS, NO, PR and TF.

The following channel interfaces for Voice Grade service require signaling capability: AB, AC, CT, DX, DY, EA, EB, EC, EX, GO, GS, LA, LB, LC, LO, LR, LS, RV and SF.

Compatible channel interfaces are set forth in 7.3.5(B) following.

(D) Optional Features and Functions

(1) Central Office Bridging Capability

- Voice Bridging (two-wire or four-wire): provides for the parallel connection of one voice circuit to another without interrupting the integrity or continuity of the first.

- Data Bridging (two-wire or four-wire): provides for the parallel connection of one data circuit to another without interrupting the integrity or continuity of the first.

- Telephoto Bridging (two-wire or four-wire): provides for the parallel connection of one Telephoto circuit to another without interrupting the integrity or continuity of the first.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(2) Reserved For Future Use

(3) Loopback Capability

Loopback Capability allows transmission tests of circuits to be performed from the serving central office to the customer premises without the assistance of personnel at the customer premises.

(4) Conditioning

Conditioning provides more specific transmission characteristics for Voice Grade services.

More stringent specifications than those provided with C-Type conditioning are available separately for attenuation distortion and envelope delay distortion. The customer has the option of ordering Improved Attenuation Distortion and/or Improved Envelope Delay Distortion in lieu of C-Type conditioning.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(4) Conditioning (Cont'd)

For two-point services, the parameters apply to each point of termination. For multipoint services, the parameters apply to each mid link or end link. C-Type conditioning and Data Capability may be combined on the same service.

(a) C-Type Conditioning

C-Type Conditioning is provided for the additional control of attenuation distortion and envelope delay distortion on data services.

(b) Improved Attenuation Distortion

Improved Attenuation Distortion upgrades the frequency vs. loss response limits.

(c) Improved Envelope Delay Distortion

Improved Envelope Delay Distortion upgrades the frequency vs. delay response limits of the channel.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(4) Conditioning (Cont'd)

(d) Sealing Current Conditioning

Sealing current conditioning is normally provided by the Telephone Company to ensure continuity on four-wire dry metallic facilities, and is primarily associated with channel interface codes DA and NO. In instances where the Telephone Company does not require the addition of sealing current conditioning to maintain service continuity, customers may order this option to achieve a higher standard of reliability. Customer orders are subject to the rates and charges set forth in 7.5.2(D)(2) following.

(e) Customer Specified Premises Receive Level

This option allows the customer to specify the receive level at the Point of Termination. This level must be within a specific range on effective four-wire transmission.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(4) Conditioning (Cont'd)

(f) Improved Termination - On Effective Four-Wire Transmission at Four-Wire Point of Termination (applicable to each two-wire port): Provides for a fixed 600 ohm impedance, variable level range and simplex reversal. Telephone Company equipment is required at the customer's premises where this option is ordered.

(g) Improved Return Loss - On Effective Two-Wire Transmission at Two-Wire Point of Termination: Provides for more stringent Echo Control Specifications. In order for this option to be applicable, the transmission path must be four-wire at one POT and two-wire at the other POT. Placement of Telephone Company equipment may be required at the customer's premises with the two-wire POT.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(4) Conditioning (Cont'd)

(h) DA-Type Conditioning

DA-Type Conditioning provides transmission characteristics suitable for data communications. Specifically, DA-Type Conditioning provides for the control of Signal to C-Notched Noise Ratio and intermodulation distortion. It is available for two-point services or multipoint services.

The Signal to C-Notched Noise Ratio and inter-modulation distortion parameters for DA-Type Conditioning are:

- Signal to C-Notched Noise Ratio is equal to or greater than 32dB
- Intermodulation distortion:
- Signal to second order modulation products (R2) is equal to or greater than 38dB
- Signal to third order modulation products (R3) is equal to or greater than 42dB

When a service equipped with DA-Type Conditioning is used for voice communications, the quality of the voice transmission may not be satisfactory.

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7.2.2 Voice Grade Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(4) Conditioning (Cont'd)

(i) Telephoto Capability

Telephoto Capability provides transmission characteristics suitable for telephotographic communications. Specifically, Telephoto Capability is provided for the control of attenuation distortion and envelope delay distortion on telephotographic services. The attenuation distortion and envelope delay distortion parameters for Telephoto Capability are:

Attenuation Distortion
(1004 Hz Reference)

| Frequency Range (Hz) | Variation (dB) |
|---|---|
| 500-3000 | -0.5 to +1.5 |
| 300-3200 | -1.0 to +2.5 |

Envelope Delay Distortion

| Frequency Range (Hz) | Variation (microseconds) |
|---|---|
| 1000-2600 | ≤ 75 |
| 800-2800 | ≤130 |

[1] Effective February 1, 2020, Voice Grade Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.2 Voice Grade Service [1] (Cont'd)

(E) Four-Wire/Two-Wire Conversions

When a customer requests that an effective four-wire channel be terminated with a two-wire channel interface at the customer designated premises, a four-wire to two-wire conversion is required. The rate for the conversion is included as part of the basic Channel Termination rate.

7.2.3 Program Audio Service [1]

(A) Basic Channel Description

A Program Audio channel is a channel measured in Hertz for the transmission of a complex signal voltage. The actual bandwidth is a function of the channel interface selected by the customer. Only one-way transmission is provided.

[1] Effective February 1, 2020, Voice Grade and Program Audio Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

© Channel Interfaces

The following channel interfaces (Cis) define the bandwidths that are available for a Program Audio channel:

| CI | Bandwidth |
|---|---|
| PG-0 | Nominal frequency from 300 to 2500 Hz |
| PG-1 | Nominal frequency from 50 to 15000 Hz |
| PG-3 | Nominal frequency from 200 to 3500 Hz |
| PG-5 | Nominal frequency from 100 to 5000 Hz |
| PG-8 | Nominal frequency from 50 to 8000 Hz |

Compatible channel interfaces are set forth in 7.3.5© following.

(D) Optional Features and Functions

(2) Central Office Bridging Capability

Provides for the parallel connection of one virtual circuit to another virtual circuit without interrupting the integrity or continuity of the first.

(2) Gain Conditioning

Control of 1004 Hz AML at initiation of service to 0dB ± 0.5dB.

[1] Effective February 1, 2020, Program Audio Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.4 Video Service [1]

(A) Basic Channel Description

(1) Analog Video Service

An analog video (TV) channel is an operational 6.2 Mhz channel with one-way transmission capability for a standard 525 line/60 field monochrome or National Television Systems Committee color video signal and up to four associated 5 to 15 kHz audio signal(s). The associated audio signal(s) may be either diplexed or provided as one or two separate channels. The provision and bandwidth of the associated audio signal(s) is a function of the channel interface selected by the Customer. Analog video service is available where technically feasible.

(2) Digital Video Transport Service

Digital video transport provides for the transport of one way or two way digital video signals to the customer's network interface via a 45 Mbps electrical circuit, with the associated CODEC equipment supplied by the customer. The actual bit rate and framing format for digital video transport is determined by the channel interface selected by the customer. Digital video transport is available where technically feasible, and may not be combined with the analog video services set forth in (1) preceding.

[1] Effective February 1, 2020, Video Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.4 Video Service [1] (Cont'd)

(A) Basic Channel Description (Cont'd)

Video services are available on a monthly, daily, or per event basis. Separate nonrecurring installation, channel termination, and channel mileage (termination and facility per mile) rates, as set forth in Section 7.5.4(following, apply for monthly and daily video service. The per event option is available to customers ordering video service for not more than 10 days, and includes the installation, channel termination and channel mileage charges in a single rate as set forth in Section 7.5.4(C) following. For events exceeding 10 days, the monthly or daily recurring and nonrecurring charges will apply.

When special construction of facilities is required for the provision of video services, the rates and regulations set forth in Section 14 following will apply.

For video services, the standby of technician(s) may be required. The Telephone Company will inform the Customer of standby charges before providing a Firm Order Confirmation Date. Standby charges are set forth in Section 13.2.

[1] Effective February 1, 2020, Video Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.4 Video Service [1] (Cont'd)

(C) Channel Interfaces

The following channel interfaces (CIs) define the bandwidth and the provision of the audio signal(s) associated with a Video channel:

| CI | Audio Bandwidth | Provision |
|---|---|---|
| 2TV6-1 | 15 kHz | 1 Channel, diplexed |
| 2TV6-2 | 15 kHz | 2 Channels, diplexed |
| 2TV7-1 | 15 kHz | 1 Channel, diplexed |
| 2TV7-2 | 15 kHz | 2 Channels, diplexed |
| 4TV6-5 | 5 kHz | 1 Channel, separate |
| 4TV6-15 | 15 kHz | 1 Channel, separate |
| 4TV7-5 | 5 kHz | 1 Channel, separate |
| 4TV7-15 | 15 kHz | 1 Channel, separate |
| 6TV6-5 | 5 kHz | 2 Channels, separate |
| 6TV6-15 | 15 kHz | 2 Channels, separate |
| 6TV7-5 | 5 kHz | 2 Channels, separate |
| 6TV7-15 | 15 kHz | 2 Channels, separate |

Compatible channel interfaces are set forth in 7.3.5(D) following.

7.2.5 Reserved For Future Use

7.2.6 Reserved For Future Use

[1] Effective February 1, 2020, Video Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.7 Digital Data Service [1]

(A) Basic Channel Description

A Digital Data Access (DA) channel is a channel for duplex four-wire transmission of 2.4, 4.8, 9.6, 19.2, 38.4, 56, or 64 kbps. The actual bit rate is a function of the protocol combination selected by the Customer. The channel provides a synchronous service with timing provided through the Telephone Company's facilities to the Customer in the received bit stream. Subrating is not available at the 19.2 kbps speed.

The customer may provide the Channel Service Unit-type equipment or other Network Channel Terminating Equipment associated with the Digital Data channel at the customer premises.

(B) Technical Specifications Packages

| | Package DA- | | | |
|---|---|---|---|---|
| Parameter | 1 | 2 | 3 | 4 |
| Error-Free Seconds | X | X | X | X |

The Telephone Company will provide a channel capable of meeting a monthly average performance equal to or greater than 99.875% error-free seconds while the channel is in service, if it is measured through a CSU equivalent which is designed, manufactured, and maintained to conform with the specifications contained in Technical Reference Publication MDP-326-726.

[1] Effective February 1, 2020, Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.7 Digital Data Service [1] (Cont'd)

(C) Channel Interfaces

The following channel interfaces (CIs) define the bit rates that are available for a Digital Data channel:

| CI | Bit Rate |
|---|---|
| DU-24 | 2.4 kbps |
| DU-48 | 4.8 kbps |
| DU-96 | 9.6 kbps |
| DU-19 | 19.2 kbps |
| DU-38 | 38.4 kbps |
| DU-56 | 56.0 kbps |
| DU-64 | 64.0 kbps |

Compatible channel interfaces are set forth in 7.3.5(G) following.

(D) Optional Features and Functions

(1) Central Office Bridging Capability

Provides for the parallel connection of one virtual circuit to another virtual circuit without interrupting the integrity or continuity of the first. This service is only available from a company-designated digital hub.

(2) Reserved For Future Use

[1] Effective February 1, 2020, Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.7 Digital Data Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

(3) Secondary Channel

A data transmission channel having a lower signaling rate capability than the primary channel in a system in which two channels share a common interface.

Secondary Channel Capability provides for an additional low-speed digital transmission channel within the existing 56.0 kbps primary channels. The Secondary Channel can be used as a communications channel for the controlling and monitoring of the customer's network.

(4) Data Amplification

Provides for data transmission when the customer is located beyond the normal range of 42 decibel (dB) loss for digital data service (56.0 kbps and 64 kbps). The dB loss is determined by the route and length of the cable in addition to the gauge of the cable from the last signaling point (usually, but not always the switching office) to the customer's premise. When the dB loss is greater than 42, a repeater and associated equipment must be installed to regenerate the digital signal for accurate and acceptable data transmission to occur.

[1] Effective February 1, 2020, Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

ACCESS SERVICE

7.2 Service Descriptions (Cont'd)

7.2.7 Digital Data Service [1] (Cont'd)

(D) Optional Features and Functions (Cont'd)

The following table shows the technical specifications packages with which the optional features and functions are available.

| | Available with Technical Specifications Package DA- | | | |
|---|---|---|---|---|
| | 1 | 2 | 3 | 4 |
| Central Office Bridging Capability | X | X | X | X |
| Secondary Channel | | | | X |
| Data Amplification | | | | X |

[1] Effective February 1, 2020, Digital Data Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(A) Basic Channel Description

(1) A High Capacity channel is a channel for the transmission of 51.84 Mbps synchronous transport signals or 1.544 or 44.736 Mbps isochronous serial data transport signals. The actual bit rate and framing format is a function of the channel interface selected by the customer. High capacity services are provided between customer designated premises through serving wire centers or between a customer designated premises and a Telephone Company hub.

The channel termination rate element for DS1, DS3 and STS1 services may vary based on distance. The mileage used to determine the monthly rate for channel terminations located outside a Telephone Company Central Office is the airline distance between the customer's designated premises and the Telephone Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes.

Synchronous Transport Signal Level 1 (STS1) channels provide for the SONET transmission of 51.84 Mbps of data. The signal consists of overhead and a Synchronous Payload Envelope (SPE). The overhead portion of the signal is used for controlling, framing and maintaining the signal. The SPE contains the customer information.

STS1 is provisioned over the Telephone Company's SONET network and may be configured in a two point arrangement (i.e., both ends of the channel are STS1 channel terminations) or connected to an OC level SONET service or hubbed to an STS1/DS1 Multiplexer.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(A) Basic Channel Description (Cont'd)

(1) (Cont'd)

Customers ordering STS1 service must specify the interface requested (i.e., STS1 interface or DS3 interface) and how the signal is to be formatted (i.e., STS1, STS1 with VT1.5 mapping, or STS1 with DS3 mapping). An STS1 with VT1.5 mapping can be multiplexed to 28 DS1s using the STS1/DS1 Multiplexing optional feature set forth in 7.2.8(D)(4) following. Virtual Tributary (VT) mapping is a SONET structure designed for the transport of sub-STS1 payloads. A DS1 is mapped into the SONET format using a VT1.5 as a packaging mechanism that is internal to the SONET signal.

(2) Fractional DS1 channels provide simultaneous, two-way transmission at contiguous bit rates of 128.0, 256.0, and 384.0 kbps. Fractional DS1 channels operate over the combined bandwidth of adjacent channels to create a contiguous bit rate.

Due to technical limitations associated with the provision of Fractional DS1, this service will be offered only in central offices where a compatible channel bank exists and the distance between the central office and the customer designated premises is less than or equal to 12,000 feet.

(B) Technical Specifications Packages

| Parameters | 0 | 1 | 1C | 2 | 3 |
|---|---|---|---|---|---|
| Error-Free Seconds | X | X | | | |

A channel with technical specifications package HC1 will be capable of an error-free seconds performance of 98.75% over a continuous 24 hour period as measured at the 1.544 Mbps rate through a CSU equivalent which is designed, manufactured, and maintained to conform with the specifications contained in Technical Reference Publication GR-54.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(C) Channel Interfaces

The following channel interfaces (CIs) define the bit rates that are available for a High Capacity channel:

| CI | Bit Rate |
|---|---|
| DS-15 | 1.544 Mbps (DS1) |
| DS-44 | 44.736 Mbps (DS3) |
| SO-- | 51.84 Mbps (STS1) |
| SO--, SM-- | 155.52 Mbps (OC3) |
| SO--. SM-- | 622.08 Mbps (OC12) |
| SO--, SM--, SN-- | 2488.32 Mbps (OC48) |
| QB--, SO--, SM--, SN--, SP--, SQ-- | 9953.28 Mbps (OC192) |

Compatible channel interfaces are set forth in 7.3.5(H) following.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(D) Optional Features and Functions

(1) Automatic Loop Transfer

The Automatic Loop Transfer provides protection on a 1xN basis against failure of the facilities between a customer designated premises and the wire center serving that premises. 1xN protection provides one spare channel for up to a maximum of six working channels. Protection is furnished through the use of a switching arrangement that automatically switches to a spare channel when a working channel fails. Spare channel priority is given to the lowest numbered slot based upon slot position. Slot position number one is given highest priority. The spare channel is not included as a part of the option. This option requires compatible equipment at both the serving wire center and the customer premises. The customer is responsible for providing the equipment at its premises. This feature is not available with 1.544 Mbps channels having the B8ZS line code.

(2) Central Office Multiplexing

(a) DS3 to DS1

An arrangement that converts a 44.736 Mbps channel to 28 DS1 channels using digital time division multiplexing.

(b) DS1 to Voice

An arrangement that converts a 1.544 Mbps channel to 24 channels for use with Voice Grade Services. A channel(s) of this DS1 to the Hub can also be used for a Digital Data or Program Audio (PG-0 or PG-3).

(c) DS1 to DS0

An arrangement that converts a 1.544 Mbps channel to 24 64.0 Kbps channels utilizing digital time division multiplexing.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(D) Optional Features and Functions

(3) Clear Channel Capability

Clear Channel Capability (CCC) is an arrangement that alters a DS1/1.544 Mbps signal with unconstrained information bits to meet pulse density requirements outlined in Technical Reference Publications GR-54 and GR 342. This will allow a customer to transport an all zero octet over a DS1/1.544 Mbps High Capacity channel providing an available combined maximum 1.536 Mbps data rate. This arrangement requires the customer signal at the channel interface to conform to Bipolar with 8 Zero Substitution (B8ZS) line code as described in Technical Reference Publications GR-54 and GR-342.

CCC is provided on DS1/1.544 Mbps High Capacity channels between two customer designated premises and is subject to the availability of facilities. This optional feature may be ordered at the same time the DS1/1.544 Mbps High Capacity channel is ordered, or it may be ordered as an additional feature of an existing channel.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(D) Optional Features and Functions (Cont'd)

(4) STS1/DS1 Multiplexing

An arrangement that provides transport of sub-STS1 payloads by converting an STS1 with VT1.5 mapping to 28 DS1s. The STS1/DS1 Multiplexing feature is available at Telephone Company provided fiber optic terminals equipped with VT1.5 configuration cards.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service [1] (DCCS)

(a) General Description

1. Digital Cross Connect Service (DCCS) provides special access customers flexibility in reconfiguring their company provided special access networks.

2. DCCS offers customers with fluctuating transmission requirements the ability to more efficiently utilize their networks by changing designated terminations without circuit changes.

3. DCCS customers may elect to merge various combinations of individual voice grade circuits (64 kbps DS0 channels) into DS1 (1.544 Mbps) circuits.

4. The subrate multiplexing* options offered with DCCS allow DS0 channels to be divided into channels of even less capacity. One 64 kbps DS0 channel can be divided into twenty channels, each having 2.4 kbps capacity; ten channels, each having 4.8 kbps capacity; or five channels, each having 9.6 kbps capacity.

5. Individual 64 kbps DS0 channels can be bridged via an optional bridging arrangement within the digital cross-connect system. Each bridging arrangement

* Effective December 6, 2003, the Digital Cross Connect Service subrate multiplexing optional feature will no longer be available to new customers. There will be no change to arrangements in service or on order prior to December 6, 2003.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(a) General Description (Cont'd)

5. (Cont'd)

can bridge up to 5 digital 64 kbps DS0 channels or up to 30 analog termination channels. Individual digital bridging arrangements can be connected to provide for larger bridging requirements; however, this cascading will require the use of one channel in each bridge for this connection.

(b) Customer Circuits

The basic unit of service for DCCS is a single voice frequency (DS0) channel. Service is also provided for full DS1 (1.544 Mbps) digital circuits or synchronous subrate digital circuits (2.4, 4.8 or 9.6 kbps). Special access circuits associated with DCCS will be provided by the Telephone Company pursuant to the relevant terms and conditions for the type of circuit as outlined elsewhere in Section 7 of this service guide.

(c) Customer Interface

DCCS customers may impose network reconfiguration instructions as follows:

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service (Cont'd)

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(c) Customer Interface (Cont'd)

1. Basic service - the customer submits via normal ordering procedures, requests for changes which are implemented by the Telephone Company through normal service provisioning procedures.

2. Company-controlled - the customer issues verbal commands to the Telephone Company's control center which accesses a Network Management System (NMS) to reconfigure the customer's network. The company-controlled capabilities are only offered where the Telephone Company has a suitable NMS.

(d) Maintenance and Operation

1. When the Telephone Company performs necessary preventative and/or routine maintenance, DCCS may not be available for circuit reconfiguration. Circuits in operation during these times will continue in operation but may not be reconfigured. Upgrades in DCCS software may also require system downtime. Customers will be notified at least 24 hours in advance of outages due to software upgrades.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

(f) Connections (Cont'd)

channels to the DCCS may not be compatible, consequently, certain configuration combinations must be denied. The Telephone Company shall not be responsible for service interruptions, troubles, loss of customer data, etc., resulting from invalid reconfiguration attempts. A channel service compatibility list will be provided to customers upon request.

DS0 and DS1 signals as defined in the Telephone Company's technical references may be terminated on DCCS. Other multiplexing formats must be converted to a standard D4 format. If the Telephone Company determines that the requested technical specifications are not compatible, the customer will be notified and given the opportunity to change the order.

(g) DCCS Options

1. DS3 connections to the digital cross-connect system can be provided in suitably equipped serving wire centers. The customer may elect to merge various DS1 and DS3 services, and in some locations may merge individual DS0 services. All other terms and conditions of DCCS as set forth in this section apply to DS3 connections.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7.2.8 High Capacity Service (Cont'd)

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(g) DCCS Options (Cont'd)

2. Shared DCCS Arrangement

Multiple customers may include circuits with the DCCS option in the same DCCS arrangement, provided that all customers designate in writing the same party to serve as their agent.

The designated agent will be authorized to represent each of the customers in a shared DCCS arrangement in all transactions and communications with the Telephone Company. Such transactions may include reconfigurations, monitoring, ordering of additional special access services and DCCS Service options in the arrangement, and removal of special access services from the arrangement. The Telephone Company will not process customer orders or requests affecting shared DCCS arrangements or circuits included in shared arrangements except those submitted by the agent.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(g) DCCS Options (Cont'd)

2. Shared DCCS Arrangement (Cont'd)

The Telephone Company shall not be liable for any loss to any of the customers in a shared DCCS arrangement caused directly or indirectly by actions of the agent or another customer in the shared arrangement. Each customer in the shared arrangement and the agent shall indemnify the Telephone Company for the costs of any and all claims arising directly or indirectly out of the actions of agent or another customer in the shared arrangement, including, but not limited to, the cost of defending against such claims.

Any customer in a shared DCCS arrangement must give the Telephone Company 30 days prior written notice of its intent to revoke an agent's authority and to remove all its special access services from a shared arrangement. Such notice shall not be effective unless the customer provides the Telephone Company with specific and sufficient directions regarding treatment of the customer's special access services upon revocation of the agent's authority or removal from the shared arrangement.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. (5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(h) Application of Rates

1. For each DCCS, the appropriate Basic Service DCCS connection charge applies. A DCCS connection charge is required for each special access circuit terminating via a digital cross-connect system port.

2. A multipoint bridging charge is applicable for each DS0 channel which is terminated in a bridging arrangement.

3. A subrate multiplexing* charge is applicable for each 2.4 kbps, 4.8 kbps and 9.6 kbps channel which is derived via a subrate multiplexing* arrangement.

4. An NMS data base charge applies for each DCCS arrangement under which company-controlled reconfiguration capability is provided. The per customer nonrecurring charge is applied to the initial data base establishment. The per circuit nonrecurring charge is applied on the initial and all subsequent orders which require adding circuits to or removing circuits from the digital cross-connect system.

* Effective December 6, 2003, the Digital Cross Connect Service subrate multiplexing optional feature will no longer be available to new customers. There will be no change to arrangements in service or on order prior to December 6, 2003.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service (Cont'd)

(D) Optional Features and Functions (Cont'd)

(5) Digital Cross Connect Service (DCCS) [1] (Cont'd)

(h) Application of Rates (Cont'd)

5. The company-performed reconfiguration nonrecurring charge is applicable when the customer chooses to have Telephone Company personnel perform the reconfiguration activities. The Telephone Company will perform the reconfiguration based on instructions from the customer. This charge is applied in increments of thirty (30) minutes for each occurrence.

[1] Effective February 1, 2020, Digital Cross Connect Services are grandfathered. Availability to current customers who are not under contract is limited to circuits already in place at existing locations. Customers under existing contracts will be allowed to place new orders and moves only to the extent permitted by their contracts. Existing contracts will not be renewed. When contracts expire, customers may retain their service on a month-to-month basis and will be limited to in-service circuits at existing locations.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.8 High Capacity Service (Cont'd)

g(D) Optional Features and Functions (Cont'd)

(6) Multiplexed Access Service Connection (MASC)

MASC is an arrangement that allows one channel of a multiplexed Telephone Company service to be configured to one channel of the same bit rate and like signaling of another multiplexed Telephone Company service. For example, the lesser speed may be an OC3 channel between OC12 and OC48 services. MASC will be provided at all Telephone Company locations where multiplexing is performed or between two Telephone Company locations where multiplexing is performed. MASC is available at STS1, OC3 and OC12 levels.

(7) Extended Superframe Format (ESF)

The ESF optional feature is available at suitably equipped end offices, and passes a customer provided framing format for 1.544 Mbps high capacity service. ESF extends the customer's 1.544 Mbps framing structure from 12 to 24 frames and divides the 8 Kbps 193rd bit position pattern into three distinct functionalities: 2 Kbps for frame synchronization, 2 Kbps for cyclic redundancy checking, and 4 Kbps used primarily for performance monitoring information.

7. Special Access Service (Cont'd)

7. Special Access Service (Cont'd)

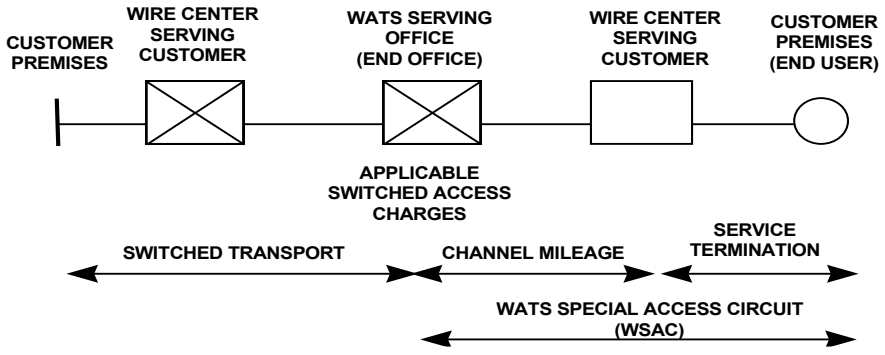

7.2 Service Descriptions (Cont'd)

7.2.9 Special Access Service Utilized for Connection with Switched Access Service

(A) Basic Service Description

A special access service utilized for connection with a switched access service implemented as a voice grade dedicated communications path between the customer's end user and a WATS Serving Office (WSO) equipped with Feature Groups A, B, C or D service, together, form the functional parts that are the major building blocks of the WATS* service. Switched access optional arrangements are available as set forth in Section 6.3 of the CenturyLink Operating Companies Tariff F.C.C. No. 9.. Both of these functional elements are necessary to provide service from the customer's end user to the customer's designated premises.

A WATS special access circuit (WSAC) may be provided as an originating only, terminating only, or two way (originating and terminating) service, at the option of the customer. If a WSO is not capable of implementing a state-mandated restriction, the WSAC will be extended free of charge to the nearest WSO capable of performing the necessary function.

* Use of the Terms "WATS" and/or "WATS like" is descriptive only and is not intended to restrict provision of a WSAC to a specific type of service.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.9 Special Access Service Utilized for Connection with Switched Access Service (Cont'd)

(B) WATS Special Access Circuit (WSAC)

A WATS Special Access Circuit (WSAC) is comprised of a Channel Termination between the customer's end user serving wire center and the customer's end user premises as specified in Section 7.1.2(A). If the WSO and the end user's serving wire center are not the same, Channel Mileage as specified in Section 7.1.2(B) preceding is applicable from the end user's serving wire center to the WSO.

The transmission path is offered as either effective two-wire, effective four-wire, or a high capacity access connection. This service is provided with rotary dial or dual tone multi-frequency address signaling, and with either loop start or ground start signaling. Additionally, other optional features such as improved return loss can be provided.

(C) Voice Grade Service Restrictions

When a WSAC, as described in (B) preceding, is used for multi-jurisdictional access, and when the Telephone Company's intrastate tariff provides for customer billing for these facilities, the Telephone Company will exempt the customer from the intrastate charges related to the WSAC and channel mileage where applicable. All calls carried over a special access line used in conjunction with common switching optional features for multi-jurisdictional access will be passed to the customer for completion except when state restrictions apply or when the end user voluntarily uses a multiple carrier access code (assuming 101XXXX dialing has not been restricted by the customer).

(2) State of Indiana

By order of the Indiana Public Service Commission in Causes 37240, 37250 and 37555, interexchange carriers are not authorized to offer intrastate intraLATA telephone service in Indiana. Interexchange carriers, when authorized by the Indiana Public Service Commission, are allowed to provide resold intrastate intraLATA telephone service. Intrastate intraLATA calling must conform to the rules and regulations of the Indiana Public Service Commission. WATS or "WATS like" calls placed on a WSAC will either be blocked by, or alternatively, passed to the Telephone Company's network for completion, at the customer's option. These options, as described in Sections 6.3(T)(7) or 6.3(T)(8) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge.

(C) Voice Grade Service Restrictions (Cont'd)

(3) State of Kansas

By order of the Kansas Corporation Commission in Docket No. 127,140-U, all 1+ dialed intrastate intraLATA calls are to be completed by the Telephone Company. Intrastate intraLATA calling on a bijurisdictional WSAC must conform to the rules and regulations of the Kansas Corporation Commission. All customer dialed 101XXXX calls will be passed to the carrier identified by the dialed carrier access code; 1+ dialed intrastate intraLATA calls placed on a WSAC will either be blocked by, or alternatively, passed to the Telephone Company's network for completion, at the customer's option. These options, as described in Section 6.3(T)(7) or 6.3(T)(8) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge.

(4) State of New Jersey

By order of the New Jersey Board of Public Utilities in Docket 8312-1126, interexchange carriers are not authorized to offer intrastate intraLATA WATS or "WATS like" service. Intrastate intraLATA calling must conform to the rules and regulations of the New Jersey Board of Public Utilities. Originating intrastate intraLATA calls placed on a WSAC are subject to blocking, either by the interexchange carrier or the Telephone Company or, alternatively, screening and routing over the local exchange carrier network by the serving LEC, as directed or allowed by the New Jersey Board of Public Utilities. These options, as described in Section 6.3(T)(7) or 6.3(T)(8) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge. Terminating intrastate intraLATA (TFC) calls should be returned by the interexchange carrier to the Telephone Company for completion, or if this is not possible due to technical limitations and such calls are completed, billing information should be returned to the Telephone Company to bill such calls as its own traffic.

(C) Voice Grade Service Restrictions (Cont'd)

(5) State of North Carolina

By order of the North Carolina Utilities Commission in Docket P-100, Sub 96, bi-jurisdictional WSACs were found to be in the public interest. All local, "1+" and "0" intrastate intraLATA traffic originated on a WSAC will be screened and automatically routed by the serving local exchange carrier which shall complete such traffic using its facilities or facilities of such other LECs as are necessary. Intrastate intraLATA calling must conform to the rules and regulations of the North Carolina Utilities Commission. Unauthorized intraLATA calls completed through the use of WSACs are subject to the Commission's intraLATA compensation plan. This required option, as described in Section 6.3(T)(8) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge.

ACCESS SERVICE

7. Special Access Service (Cont'd)

(6) State of South Carolina

By order of the Public Service Commission of South Carolina in Docket No. 87-29-C, Order Nos. 87-982 and 88-968, the use of bi-jurisdictional WSACs were found to be in the public interest. All 1+ and 0+ intrastate intraLATA traffic originated on a bi-jurisdictional WSAC will be screened and routed by the serving local exchange carrier which shall complete such traffic using its facilities. Intrastate IntraLATA Access Screening, as described in Section 6.3.(T)(8) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge. Intrastate intraLATA calling must conform to the rules and regulations of the Public Service Commission of South Carolina.

Additionally, interexchange carriers that provide bi-jurisdictional WSACs must furnish to the Telephone Company the percentage of originating and terminating minutes on traffic served by offices lacking measurement capabilities.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

(C) Voice Grade Service Restrictions (Cont'd)

(7) State of Tennessee

By order of the Tennessee Public Service Commission in Docket No. U-87-7491, interexchange carriers are not authorized to offer intrastate WATS or "WATS like" service jointly with interstate access sharing the same WSAC. Intrastate calling must conform to the rules and regulations of the Tennessee Public Service Commission. Originating intrastate WATS calls are subject to blocking by the Telephone Company, as directed by the Tennessee Public Service Commission. This option, as described in Section 6.3(T)(6) of the CenturyLink Operating Companies Tariff F.C.C. No. 9, will be provided by the Telephone Company at no charge.

(8) State of Texas

By order of the Texas Public Utility Commission in Docket Nos. 5113 and 7020, all 1+ dialed intrastate intraLATA calls are to be completed by the Telephone Company. The rules, regulations and charges associated with intrastate intraLATA usage on a multi-jurisdictional WSAC are specified in Section 1, Subsection 1.2.3 of the Telephone Company's IntraLATA Services Tariff. All customer dialed 101XXXX calls will be passed to the carrier identified by the dialed carrier access code. 1+ dialed Intrastate intraLATA calls placed on a WSAC will either be blocked or alternatively passed to the Telephone Company's network for completion, at the customer's option. These options, as described in Sections 6.3(T)(7) or 6.3(T)(8), will be provided by the Telephone Company at no charge.

7.2.13 OptiPoint Services

Effective March 1, 2022 OptiPoint Services with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

OptiPoint-192 Point-to-Point configurations are grandfathered as of February 11, 2019 and will no longer be available for new service requests. This does not impact Multipoint or Ring configurations.

(A) Basic Service Description

OptiPoint services provide point-to-point high speed synchronous optical fiber-based full duplex data transmission capabilities. There are four levels of OptiPoint services: OptiPoint-3 (OC3) is provided at a terminating bit rate of 155.52 Mbps; OptiPoint-12 (OC12) is provided at a terminating bit rate of 622.08 Mbps; OptiPoint-48 (OC48) is provided at a terminating bit rate of 2488.32 Mbps; and OptiPoint-192 (OC192) is provided at a terminating bit rate of 9953.28 Mbps.

OptiPoint services are provided on a month-to-month basis or for periods of one, three or five years. When a customer orders OptiPoint service, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the OptiPoint circuits.

(1) Channel Termination

OptiPoint channel terminations may be used to connect the following:

- a customer designated premises to another customer designated premises, configured at wire center locations between the two premises; or

- a customer designated premises to a Telephone Company location where service configuration is performed.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Channel Termination (Cont'd)

(a) Based on customer requirements, OC3 service may be provisioned in the following configurations:

(i) OC3 - three Synchronous Transport Signals (STS1) channels which each contain the following:

- one DS3 or STS1 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping; or

(ii) A single concatenated OC3c channel that is STS3c mapped.

(b) Based on customer requirements, OC12 service may be provisioned in the following configurations:

(i) OC12 - twelve STS1 channels which each contain:

- one DS3 or STS1 that is STS1 mapped;
- up to 28 DS1s that are VT mapped;
- an STS1 channel without constraint to payload mapping;

(v) Combination of OC3c, OC12c and OC48c channels subject to utilization of the total OC192 capacity.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Channel Termination (Cont'd)

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 channel may be mapped for either one DS3 or 28 DS1s. However, DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an OC3, OC12, OC48 or OC192 service be configured with a combination of DS3 and DS1 channels, a DS3 to DS1 multiplexing arrangement will be required.

Upon ordering OptiPoint service, the customer is responsible for identifying the STS signal configuration. This information is used in determining the route and connection in the network. If a new configuration is requested subsequent to the initial activation, a service reconfiguration charge will apply on a per service basis, as set forth in Section 7.5.8(C)(7)(a). The service reconfiguration charge is in addition to all applicable configuration node and configuration card charges associated with the new configuration.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Channel Termination (Cont'd)

OptiPoint service is provided with electronics that automatically activate in case of failure of the primary electronics. Since OptiPoint is a point-to-point service, SONET ring survivability will not be available. Rates for additional protection options requested by the customer will be quoted on an individual case basis and are in addition to the rates for OC3, OC12, OC48 and OC192 service.

OptiPoint channel terminations provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. An OptiPoint entrance facility may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OptiPoint entrance facility at the customer's premises location.

OptiPoint channel terminations will be provided with or without Telephone Company provided terminal equipment at the customer's premises. When a customer elects to furnish its own terminal equipment at the customer's premises, the customer will work cooperatively with the Telephone Company to provide a compatible physical interface, and will identify approved equipment types for use in conjunction with Telephone Company provided equipment. The customer is responsible for providing all facilities and cabling necessary to connect customer provided equipment to this interface.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Channel Termination (Cont'd)

OC3, OC12, OC48 and OC192 services may be configured for lower bandwidth services, at suitably equipped wire centers, by using appropriate OC3, OC12, OC48 or OC192 configuration nodes as set forth in (2) following.

OptiPoint channel terminations are available only where facilities and operating conditions permit. The Telephone Company will work cooperatively with the customer to determine if suitable existing Telephone Company SONET based facilities are available to provide the service. The Telephone Company will not provision this service on facilities which are not suitable for OptiPoint. Where facilities and/or operating conditions do not permit the provision of OptiPoint service, and the customer desires the Telephone Company to provision OptiPoint service, Special Construction charges, as set forth in Section 14 following, may apply.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration

There are two types of charges associated with a service configuration as described following:

(a) Configuration Node - is an arrangement at the system level that allows an OC3 service bandwidth to add or drop lower level signals up to three DS3s or STS1s or three groups of twenty-eight DS1s. An OC12 service bandwidth can add or drop lower level signals up to four OC3s or twelve DS3s or STS1s or equivalent combinations of OC3s, DS3s, STS1s and DS1s. An OC48 service bandwidth can add or drop lower level signals up to four OC12s, sixteen OC3s, forty-eight DS3s or STS1s, or equivalent combinations of OC12s, OC3s, DS3s and STS1s. An OC192 service bandwidth can add or drop lower level signals up to four OC48s, sixteen OC12s, sixty-four OC3s, one hundred ninety-two DS3s or STS1s or equivalent combinations of OC48s, OC12s, OC3s, DS3s and STS1s.

When the customer requests that a DS1 channel be connected to an OC48 or OC192 service terminating at a Telephone Company central office, a DS3 to DS1 or STS1 to DS1 multiplexing arrangement may be required.

Channel mileage can be connected between serving wire centers with configuration nodes at a lower OC-n speed than the channel termination, if the channel mileage is between a lower speed configuration function and one of the following:

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration

(a) (Cont'd)

- another lower speed configuration function;
- another lower speed channel termination; or
- a lower speed Shared SONET Ring.

All of the above terminations must be provided at the same speed as the transport.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration (Cont'd)

(b) Configuration Card - provides for the interface at which a channelized or lower speed service terminates or originates from an OptiPoint optical line terminated at a customer designated premises or a Telephone Company central office. DS1, DS3, OC3 concatenated, STS-1, 10 Mbps, 20 Mbps, 50 Mbps and 100 Mbps level cards are available for interfacing OptiPoint-3 service with lower level signals. DS1, DS3, OC3, OC3 concatenated, OC12 concatenated, STS-1, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps and 450 Mbps level cards are available for interfacing with OptiPoint-12 service. DS3, OC3, OC12, OC3 concatenated, OC12 concatenated, OC48 concatenated, STS-1, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 mbps, 450 Mbps, 600 Mbps and 1 Gbps level cards are available for interfacing with OptiPoint-48 service. DS3, OC3, OC12, OC48, OC3 concatenated, OC12 concatenated, OC48 concatenated, STS-1, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps and 1 Gbps level cards are available for interfacing with OptiPoint-192 service. When full OC3 and OC12 and OC48 concatenated service is provided, no configuration node is required.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.13 OptiPoint Service (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Service Configuration (Cont'd)

When a customer requests an OptiPoint service configuration, both the applicable node and card rate elements will apply. The rates for the configuration node and associated card(s) apply at each end of the channel termination when Telephone Company provided terminal equipment is provided at the customer premises.

When the customer elects to furnish its own terminal equipment at the customer premises, the rates for the configuration node and associated card(s) apply only at the end of the channel termination where Telephone Company equipment is provided.

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between the customer's premises and the Telephone Company serving wire center for that premises. Additional regeneration equipment will only be provided by the Telephone Company when the actual fiber facility distance between the customer's premises and serving wire center exceeds SONET design limits. A monthly recurring SONET Regeneration charge, as set forth in 7.5.8 following, will apply for each regenerator required for the provision of OptiPoint service.

Rates and charges for the configuration node and configuration cards are set forth in 7.5.8 following. Additional labor charges as set forth in Section 13 following will apply to configuration changes for STS level service.

7.2.14 SONET OC Ring

Effective March 1, 2022 the SONET OC Ring Rate Plan with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

(A) Service Description

SONET OC (optical connection) Ring is a dedicated high capacity network (bandwidth) designed to provide the customer reliable functionality for the transmission of voice, data, and video via a self-healing ring topology between multiple customer designated locations and Telephone Company central offices. OC3, OC12, OC48 and OC192 SONET OC Ring will be offered using 2-fiber unidirectional path switch ring (UPSR) or 2-fiber bidirectional line switched ring (BLSR) topology. The SONET OC Ring network will consist of fiber optic facilities routed through local, alternative central office, internodal, and/or interoffice channel facilities that transmit DS1, DS3, STS1, OC3, OC3c, OC12, OC12c, OC48 and OC48c channel services simultaneously over primary and alternative diverse paths between customer designated locations and Telephone Company central offices. Continuous monitoring of the DS1, DS3, STS1, OC3, OC3c, OC12, OC12c, OC48 and/or OC48c service quality will occur. Detection of a failure within the system will result in automatic self-healing around the point of failure to ensure that the DS1, DS3, STS1, OC3, OC3c, OC12, OC12c, OC48 and/or OC48c services between locations within the SONET OC Ring network will continue.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1]

(A) Service Description

Current SONET standards do not provide for asynchronous DS3 to DS1 multiplexing. An STS1 channel may be mapped for either one DS3 or 28 DS1s. However, DS1s within a DS3 are not accessible within the SONET architecture, and their performance cannot be guaranteed for this reason. When the customer requests that an OC3, OC12, OC48 or OC192 service be configured with a combination of DS3 and DS1 channels, a DS3 to DS1 or STS1 to DS1 multiplexing arrangement will be required.

SONET OC Ring is provided on a month-to-month basis or for a period of one, three or five years. When ordering SONET OC Ring, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the SONET OC Ring. The customer ordering SONET OC Ring must order a minimum of two nodes, one of which must be a customer node and one of which must be a central office node. The maximum number of nodes will be determined by the technical characteristics and capability of the ring configuration requested.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(A) Service Description (Cont'd)

Customers of SONET OC Ring will need to provide the Telephone Company with a matrix detailing the configuration interface assignments desired among the nodes on the dedicated ring. The matrix must provide detail by node, by STS group. This matrix will assist the Telephone Company in ensuring that node to node channels are linked appropriately. Customers must provide suitable floor space, controlled environment, and source of non-switched suitable power to support the service.

Where the customer provides two separate entrance facility cable routes for SONET OC Ring, the primary and alternate entrance facilities will be separate and will enter the customer node over such different routes. When the customer requests a connection at a customer node via two local channels and Telephone Company facilities do not exist for the second local channel, the Telephone Company may provide an equivalent second local channel via an existing alternate route. When facilities become available for the second local channel, the Telephone Company may rearrange the alternate route at any time at no charge to the customer.

(B) Service Components

(1) Customer Node

Customer nodes provide ring switching capabilities at customer designated locations other than the Telephone Company central offices that are part of SONET OC Ring. This rate element offers OC3, OC12, OC48 and OC192 network capacities and is provided with or without Telephone Company provided equipment. Customer node equipment provided by the customer must be compatible with that of the Telephone Company. When a customer elects to furnish its own node equipment at the customer's premises, the Telephone Company will install a cross-connect device on the Telephone Company side of the demarcation point, allowing the customer to connect their node equipment.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(1) Customer Node (Cont'd)

When the customer requests that a DS1 channel be connected to an OC48 or OC192 service terminating at a Telephone Company central office, a DS3 to DS1 or STS1 to DS1 multiplexing arrangement will be required.

(2) Customer Configuration Interface

A customer configuration interface provides DS1, DS3 and STS1 electrical channelization and/or OC3, OC3c, OC12, OC12c, OC48, OC48c, 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps and 1 Gbps optical channelization that may take place at each customer node of SONET OC Ring. The customer configuration interface rate element applies for every interface capacity that originates or terminates at a customer node. However, when the customer elects to furnish its own terminal equipment at the customer node, the rate for the customer configuration interface does not apply.

(3) Central Office Node

Central office nodes provide ring switching capabilities at Telephone Company central offices that are part of SONET OC Ring. This rate element offers OC3, OC12, OC48 and OC192 network capacities.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(4) Central Office Configuration Interface

A central office configuration interface provides DS1, DS3 and STS1 electrical channelization and/or OC3, OC3c, OC12, OC12c, OC48, OC48c, 10 Mbps, 20 Mbps, 50 Mbps. 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps and 1 Gbps optical channelization that may take place at each central office node located on SONET OC Ring. The central office configuration interface rate element applies for every interface capacity that originates or terminates at a central office node.

(5) Local Channel

The local channel provides for the communications path between a customer node and the serving wire center of the premises where the customer node is located. One local channel rate element will apply per customer designated premises for each local channel terminated.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(5) Local Channel (Cont'd)

Monthly recurring rates for local channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile except when the customer designated premises and the serving wire center are located in the same Telephone Company building, or where both customer designated premises are in the same building. In those instances, the intraoffice channel charge, as set forth in (9) following, will apply in lieu of the one-mile minimum local channel charge.

(6) Alternate Central Office Channel

The alternate central office channel provides for the communications path between a customer node and an alternate central office. The primary central office node and any alternate central office node and applicable configuration interfaces must be associated with the same SONET OC Ring. Monthly recurring rates for alternative central office channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(7) Interoffice Channel

The interoffice channel provides for the communications path between directly connected Telephone Company central offices located on a SONET OC Ring. This rate element does not apply where central office nodes are adjacently connected in the same central office on the same SONET OC Ring for the purposes of providing additional node capacity. Monthly recurring rates for interoffice channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

/(8) Internodal Channel

The internodal channel provides for the communications path between two directly connected customer nodes of a given SONET OC Ring located (a) in the same serving wire center area, (b) in the same office park /campus environment or contiguous property located in contiguous serving wire center areas, or (c) in different serving wire center areas. Monthly recurring rates for internodal channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(9) Intraoffice Channel

The intraoffice channel provides for the communications path when the customer designated premises and the serving wire center are located in the same Telephone Company building, or where both customer designated premises are in the same building. Flat rated monthly recurring rates apply for each intraoffice channel.

(10) Central Office Node Configuration Interface Capacity Reallocation

Central office configuration interface capacity reallocation allows the customer to request that the Telephone Company reallocate central office configuration interfaces at each central office node subsequent to the initial service installation.

(11) Customer Node Configuration Interface Capacity Reallocation

Customer node configuration interface capacity reallocation allows the customer to request that the Telephone Company reallocate customer node configuration interfaces at each Telephone Company provided customer node subsequent to the initial service installation.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(B) Service Components (Cont'd)

(12) SONET Regeneration

Due to the technical limitations of SONET facilities, additional regeneration equipment may be required for essential detection and retransmission of SONET signals between nodes. Additional regeneration equipment will only be provided by the Telephone Company when the actual fiber facility distance between the nodes exceeds SONET design limits. A monthly recurring SONET Regeneration charge, as set forth in 7.5.8 following, will apply for each regenerator required for the provision of SONET OC Ring.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

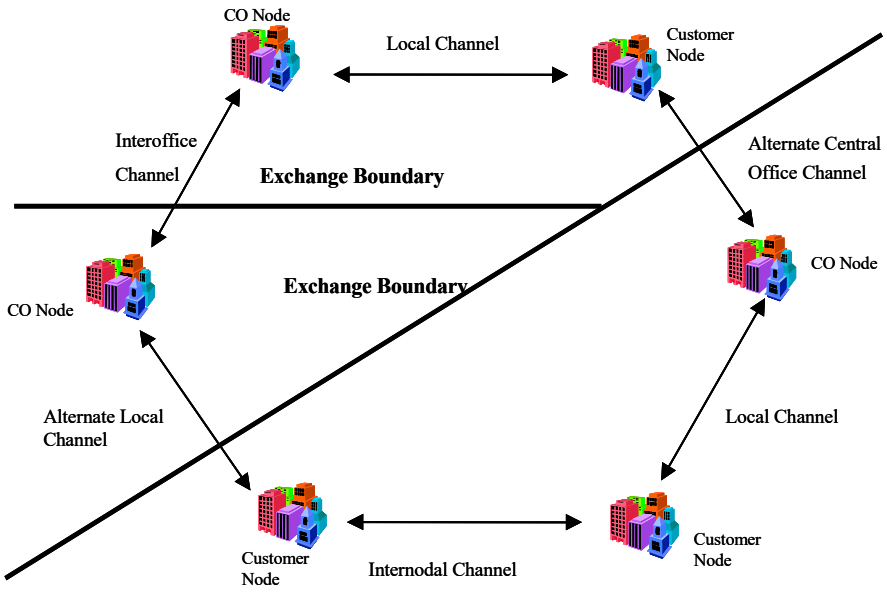

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring (Cont'd)

(B) Service Components (Cont'd)

The following diagrams depict generic views of SONET OC Ring:

Six-node SONET OC Ring

A customer configuration interface or company configuration interface may apply at each node. The rate element applies for capacity that originates or terminates at a node. Configuration interfaces provide for electrical (DS1, DS3, STS1, OC3c, OC12c) or optical (OC3 and OC12) channelization.

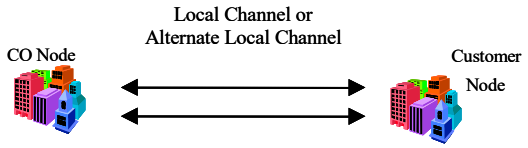

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring (Cont'd)

(B) Service Components (Cont'd)

Two-node SONET OC Ring

A customer configuration interface or company configuration interface may apply at each node. The rate element applies for capacity that originates or terminates at a node. Configuration interfaces provide for electrical (DS1, DS3, STS1, OC3c, OC12c) or optical (OC3 and OC12) channelization.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.14 SONET OC Ring [1] (Cont'd)

(C) Subtending Rings

SONET OC Ring customers may order subtending rings which utilize bandwidth on an existing primary ring. Subtending rings are available at OC3 and OC12 levels on an OC48 primary ring and at an OC3 level on an OC12 primary ring. The subtending ring must be ordered by the same customer that ordered the primary SONET OC Ring.

Subtending rings do not require both a central office node and customer node, since at least one node will be shared with the primary ring. When nodes are shared on the primary and subtending rings, SONET OC Ring node charges will not apply for the subtending ring. When multiple nodes are shared on the primary and subtending rings, SONET OC Ring channel charges between the shared nodes will not apply for the subtending ring.

Subtending rings are provided for a period of one, three or five years. When ordering subtending rings, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the subtending ring.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.15 Ethernet Transport

(A) Basic Service Description

Ethernet Transport (ET) service is a high speed data transport service that provides point-to-point transmissions of customers' data communications that customers deliver to the Telephone Company in a fast packet based ethernet protocol. ET is available at nine transport speeds: 10 Mbps, 20 Mbps, 50 Mbps, 100 Mbps, 150 Mbps, 300 Mbps, 450 Mbps, 600 Mbps, 1 Gbps, 2.5 Gbps*, 10 Gbps* and 100 Gbps*.

ET is provided on a month-to-month basis or for periods of one, three or five years. ET service at 2.5 Gbps, 10 Gbps and 100 Gbps is only available for periods of three or five years. When a customer orders ET, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the ET circuits.

(1) Ethernet Transport Channel Termination

ET channel terminations may be used to connect the following:

- a customer designated premises to the serving wire center of that premises.

* Rates for 2.5 Gbps, 10 Gbps and 100 Gbps Ethernet Transport Service may be obtained by contacting your account manager.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.15 Ethernet Transport (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Ethernet Transport Channel Termination (Cont'd)

The ET channel termination rate element may vary based on distance. The mileage used to determine the monthly rate for channel terminations located outside a Telephone Company Central Office is the airline distance between the customer's designated premises and the Telephone Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes.

Upon ordering ET, the customer is responsible for identifying the STS signal configuration. This information is used in determining the route and connection in the network. Since ET is a point-to-point service, SONET ring survivability will not be available.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.15 Ethernet Transport (Cont'd)

(A) Basic Service Description (Cont'd)

(1) Ethernet Transport Channel Termination (Cont'd)

ET channel terminations provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. An ET channel termination may not be split between premises or terminated in multiple locations within a premises. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the ET channel termination at the customer's premises location.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.15 Ethernet Transport Service (Cont'd)

(A) Basic Service Description (Cont'd)

(2) Ethernet Transport Channel Mileage

Ethernet Transport channel mileage provides transport between two Telephone Company serving wire centers. Air mileage is measured using V&H coordinates between the Telephone Company serving wire centers. The ET channel mileage rates are made up of the Channel Mileage Facility rate and the Channel Mileage Termination rate.

Rates and charges for ET are set forth in 7.5.16 following.

(B) Technical Specifications

The technical specifications for the protocols transmitted over Ethernet Transport service are delineated in the following technical publications:

| Protocol | Publication |
|---|---|
| 10 Mbps Ethernet | ANSI / IEEE X3.802.3 |
| 100 Mbps Ethernet | ANSI / IEEE X3.802.3u |
| 1 Gbps Ethernet | ANSI / IEEE X3.802.3z |

7.2 Service Descriptions (Cont'd)

7.2.15 Ethernet Transport Service (Cont'd)

(C) Service Components

The following diagram depicts a generic view of the components of Ethernet Transport service:

Ethernet Transport Service

CT - Channel Termination
CM - Channel Mileage
SWC - Serving Wire Center

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line

(A) Basic Service Description

Ethernet Virtual Private Line (EVPL) service provides the ability to order Ethernet service where a single customer connection can support multiple applications with varying Quality of Service (QoS). EVPL is available at transport speeds of: 10 Mbps, 100 Mbps, 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

EVPL is provided on a monthly basis, under a Term Discount Plan for periods of one, two, three or five years as set forth in 7.4.20(C) following or under a Fixed Rate Term Plan (FRTP) for a period of seven years or as specified and set forth in 7.4.20(D) following. When a customer orders EVPL, the customer and the Company will work cooperatively to plan, engineer, provision and manage the EVPL circuits. EVPL is only available where facilities and operating conditions exist.

EVPL provides customer capabilities to support different Quality of Service (QoS) (i.e., Gold, Silver and Best Effort) as described in (E) following over the same connection and offers customers increased flexibility to match bandwidth to their real needs for voice, data and video applications on each connection. The customer orders the portion of their EVPL bandwidth that will be allocated for each quality of service.

For each EVPL, the customer's bandwidth will be rate limited or policed to a fixed speed for each QoS level specified in the QoS profile selected for the Ethernet Virtual Connection (EVC).

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

EVPL service is available 24 hours per day, 7 days per week, except for preventive maintenance. Due to the nature of EVPL it will be necessary to perform preventive maintenance and software updates. This will mean that the EVPL service will be unavailable during the period of time when preventive maintenance is being performed. The Company will provide notice to customers of such maintenance.

(1) User to Network (UNI) Port Connection

The User to Network (UNI) Port Connection is the physical interface or port that is the demarcation between the customer and the service provider. The UNI Port Connection is always provided by the service provider. The UNI Port Connection in a Carrier Ethernet Network (CEN) is a physical Ethernet Interface at operating speeds of 10 Mbps, 100 Mbps, 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

(2) Network to Network (NNI) Port Connection

The Network to Network (NNI) Port Connection is the interface between distinct CENs operated by one or more customers. The NNI Port Connection is available at operating speeds of 10 Mbps, 100 Mbps, 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

(3) External Network to Network (E-NNI) Port Connection

The External Network to Network (E-NNI) Port Connection is the interface between two Operator CENs that are operated separately. The E-NNI Port Connection is available at operating speeds of 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

21.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

(4) Operator Virtual Connection (OVC)

The OVC is associated with an ENNI port type. Customers may order more than one OVC per port. The Company will bill a monthly OVC charge per port that the OVC terminates on. The OVC is available at speeds of 3 Mbps, 5 Mbps, 7 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps, 100 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1000 Mbps (1 Gbps).

(5) Ethernet Virtual Connection (EVC)

The EVC connects two or more customer UNI port connections. The EVC prevents data transfer between locations that are not part of the same EVC. The EVC is available at speeds of 3 Mbps, 5 Mbps, 7 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps, 100 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1000 Mbps (1 Gbps).

EVC reconfigurations performed by the core network under normal operating conditions should occur without packet loss. An EVC is capable of interconnecting with other EVCs of equal bandwidth in the same metropolitan area.

(6) Quality of Service

The Quality of Service (QoS) is the ability to provide different priority to the various applications of EVPL in order to guarantee a certain level of performance to a data flow. The QoS is available at speeds of 3 Mbps, 5 Mbps, 7 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps, 100 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 700 Mbps and 1000 Mbps (1 Gbps) and is available in 3 different priority levels described following:

- Gold: The Gold QoS is supported by a low latency queue. The Low Latency Queuing (LLQ) feature in the Ethernet network is used for support of real-time service and is configured for strict priority queuing allowing latency sensitive applications, such as voice, to be sent first. Gold QoS will be marked for expedited handling within the EVPL network.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

(6) Quality of Service (Cont'd)

- Silver: The Silver QoS supports interactive video applications. The Silver QoS is policed to a maximum bandwidth.

- Best Effort: This QoS is the default QoS for other traffic that is not defined as Gold or Silver. Traffic that does not match any other QoS will be mapped as Best Effort. Traffic with the Best Effort QoS will have the lowest priority on the network and will support lower priority data applications, such as email and file transfer protocol (FTP).

EVPL reporting is available to customers who purchase the Gold or Silver QoS EVPL service. EVPL reporting allows customers to view their EVPL network via the use of a web interface and secure connection. EVPL reporting provides alarm surveillance, service level agreement reporting and performance report for the various network components that comprise the customer's EVPL network.

For each EVPL arrangement, the customer must decide the mix of applications that will be supported on that EVPL, the QoS mix that the EVPL must support and the bandwidth to be assigned for each QoS. The customer's bandwidth will be limited to the fixed speed associated with each QoS level. Therefore, total bandwidth available to support transmission of a specific QoS will depend upon the size of the customer's EVPL and the specific QoS bandwidth the customer selected for that EVPL.

A customer may select different QoS profiles for different EVPL connections that share the same network LAN, or EVPL network arrangement. However, technical limitations exist that limit the total number of different QoS profiles that can be utilized in a single EVPL network arrangement.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

(7) EVPL Reconfiguration

An EVPL Reconfiguration charge, as set forth in 7.5.18 following, will apply for each Ethernet Virtual Connection (EVC) or Quality of Service (QoS) established initially or when the customer requests the EVC or QoS be reconfigured after the initial set up. The EVPL Reconfiguration charge is in addition to all applicable charges associated with the new configuration. The EVPL Reconfiguration charge will not apply to customers who purchase EVPL under a 7 year Fixed Rate Term Plan (FRTP).

(8) OAM EVC

The Operations, Administration and Maintenance (OAM) EVC order in increments of 5 Mbps only and may order up to 5 each. The OAM EVC is available for the High Volume Based Plan only. The OAM EVC will be used solely by the customer for the purposes of their own testing of traffic to determine the operational capability of the circuit that is provisioned to/from a specific location.

Rates and charges for EVPL are set forth in 7.5.18, 7.5.19, 22.5.19 and 22.5.19 following.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

(9) ICO NNI Arrangement (ICO Trunking Arrangement)

In some cases, the Company and another Incumbent Local Exchange Carrier (ILEC), sometimes also referred to as an Independent Company or ICO, may agree to jointly provide an Ethernet service where such service will be provided to locations in both the Company's and the other ILEC's serving territories within the same LATA. In such cases, the Company and the other ILEC may mutually agree to meet at a location (i.e., meet point) within the LATA utilizing facilities suitable for delivery of EVPL service.

The rates and charges for EVPL are applicable for the Company provided portion of such service. The Company is responsible for the ordering, provisioning, billing and maintenance of EVPL up to the meet point.

Service Level Agreement (SLA) credits in 7.4.20 (E), following, will apply for the portion of the service the Company provides.

SLA reporting does not include traffic to or from any ICO NNI Trunking Arrangement

The ICO NNI Arrangement provides a shared trunk connection from the EVPL Switch to the meet point that is then connected to the ILEC or ICO Ethernet switch, for purposes of providing multiple Ethernet Virtual Connections (EVCs) for the same or different customers over this shared facility. The ICO Trunk Connection charge is applied to each EVC that is transported on the ICO NNI Trunking Arrangement.

7. Special Access Service (Cont'd)

7.2 Service Descriptions (Cont'd)

7.2.16 Ethernet Virtual Private Line (Cont'd)

(A) Basic Service Description (Cont'd)

(10) Channel Mileage/ICO NNI Additional Mileage

Channel mileage and additional mileage charges are applicable only to the Bandwidth Based Plan. Channel mileage charges apply to EVPL service based on the service speed and when the total distance associated with the data channel exceeds 65 miles between Company serving wire centers. EVPL channel mileage provides transport between two Company serving wire centers. Air mileage is measured using V&H coordinates between the Company serving wire centers. The EVPL channel mileage rate element will be applied on a per mile basis for each mile exceeding the first 65 miles of transport.

The Additional Mileage charge is based on the distance measured from the EVPL switch to the meet point for mileage that exceeds 10 miles and is applicable to each ICO Trunking Arrangement EVC transported across the shared facility.

(B) Technical Specifications

The technical specifications for the protocols transmitted over EVPL service are delineated in the following technical publications:

| Protocol | Publication |
|---|---|
| 10 Mbps Ethernet | ANSI / IEEE X3.802.3 |
| 100 Mbps Ethernet | ANSI / IEEE X3.802.3u |
| 1 Gbps Ethernet | ANSI / IEEE X3.802.3z |
| | IETF RFC 4090 |
| | ITU-TY.1731 |

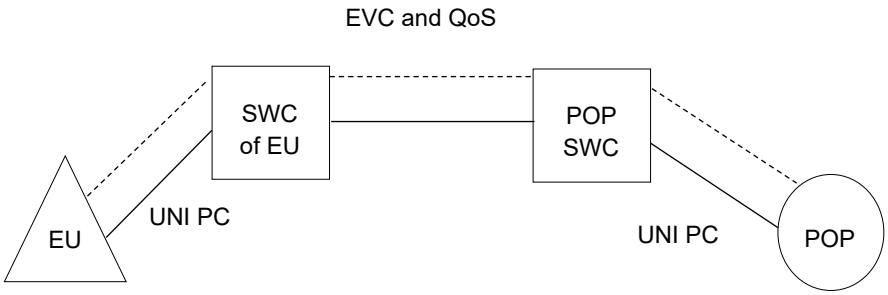

7. Special Access Service (Cont'd)

C. Service Components

The following diagrams depict generic views of the components of EVPL service.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Description of Special Access (Cont'd)

7.2.17 Optical Wavelength Service (OWS)

Optical Wavelength Service (OWS) is a high speed data transport service that provides point-to-point transmissions of' data communications that customers deliver to the Telephone Company utilizing shared Dense Wave Division Multiplexing (DWDM) technology available at speeds of: 1 Gbps, 2.5 Gbps, 10 Gbps, 40 Gbps and 100 Gbps.

OWS is provided on a month-to-month basis or for periods of one, three or five years. When a customer orders OWS, the customer and the Telephone Company will work cooperatively to plan, engineer, provision and manage the OWS circuits. OWS is only available where facilities and operating conditions exist. .There are two basic rate categories which apply to Special Access Service:

- Channel Terminations
- Channel Mileage

(A) OWS Channel Termination

OWS channel terminations may be used to connect the following:

- a customer designated premises to the serving wire center of that premise.

The OWS channel termination rate element may vary based on distance. The mileage used to determine the monthly rate for channel terminations located outside a Telephone Company Central Office is the airline distance between the customer's designated premises and the Telephone Company serving wire center. The mileage measurement is determined by utilizing exchange maps and mileage tables located in designated Telephone Company offices for such purposes

OWS channel terminations provided to a customer's designated premises will be installed in a single, common space under Telephone Company control. One Channel Termination charge applies per customer designated premises at which the channel is terminated. This charge will apply even if the customer designated premises and the serving wire center are collocated in a Telephone Company building. An OWS channel termination may not be split between premises or terminated in multiple locations within a premise. The customer must provide suitable floor space, environmental controls and non-switched AC power to support the OWS channel termination at the customer's premises location. The Channel Termination is the interface located at the Central Office that allows OWS to connect to the following Company services: SONET, ET, or EVPL.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.2 Description of Special Access (Cont'd)

7.2.17 Optical Wavelength Service (OWS) (Cont'd)

(B) OWS Channel Mileage

OWS channel mileage provides transport between two Telephone Company serving wire centers. Air mileage is measured using V&H coordinates between the Telephone Company serving wire centers. The OWS channel mileage rates are made up of the Channel Mileage Facility (per mile) rate and the Channel Mileage Termination (fixed) rate.

Available in the following interfaces:

- 10 Gbit LAN Channel
- 10 Gbit WAN Channel
- Gbit Ethernet Channel
- SONET Channel (OC3, OC12, OC48, OC192)
- 10.709 Gbit OTU2 Channel
- 2.666 Gbit OTU1 Channel
- 111.810 Gbit OTU4 Channel
- 100GbE Ethernet Channel
- 43.018 Gbit OTU3 Channel

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes

Network Channel Codes are comprised of four characters. The first and second characters describe the technical specifications package within the service type. The third and fourth characters describe and specify options associated with the service. The Telephone Company abides by nationally accepted standards in its use of Network Channel Codes and are available from the Telephone Company upon request.

Channel Interface Codes describe the electrical characteristics of the interface at the customer's premises. Compatible Channel Interface codes for the requested service must be specified by the customer when ordering the services. Channel Interface codes for each category of Special Access Service can be found in the Technical Reference Publications set forth in 7.2 preceding.

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options

| Code | | Option | Definition |
|---|---|---|---|
| AB | - | | accepts 20 Hz ringing signal at customer's point of termination |
| AC | - | | accepts 20 Hz ringing signal at customer's end user's point of termination |
| CT | - | | Centrex Tie Trunk Termination |
| CM | - | | SONET ADM Termination |
| DA | - | | data stream in VF frequency band at customer's end user's point of termination |
| DB | - | | data stream in VF frequency band at customer's point of termination |
| DC | - | | direct current or voltage |
| | - | 1 | monitoring interface with series RC combination (McCulloh format) |
| | - | 2 | Telephone Company energized alarm channel |

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | | Option | Definition |
|---|---|---|---|
| DS | - | | digital hierarchy interface |
| | - | 15 | 1.544 Mbps (DS1) format plus D4 |
| | - | 15B | 1.544 Mbps (DS1) format plus D4 with B8ZS clear channel capability |
| | - | 15E | 8-bit PCM encoded in one 64 kbps of the DS1 signal |
| | - | 15F | 8-bit PCM encoded in two 64 kbps of the DS1 signal |
| | - | 15G | 8-bit PCM encoded in three 64 kbps of the DS1 signal |
| | - | 15H | 14/11-bit PCM encoded in six 64 kbps of the DS1 signal |
| | - | 15J | 1.544 Mbps format |
| | - | 15K | 1.544 Mbps format plus extended framing format |
| | - | 15L | 1.544 Mbps (DS1) with SF signaling |
| | - | 15S | 1.544 Mbps using B8ZS line code and extended framing format |
| | - | 44 | 44.736 Mbps (DS3) |
| | - | 44L | 44.736 Mbps (DS3) with SF signaling |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | | Option | Definition |
|---|---|---|---|
| DU | - | | digital access interface |
| | - | 24 | 2.4 kbps |
| | - | 48 | 4.8 kbps |
| | - | 56 | 56.0 kbps |
| | - | 64 | 64.0 kbps |
| | - | 96 | 9.6 kbps |
| | - | A | 1.544 Mbps format |
| | - | B | 1.544 Mbps format plus D4 |
| | - | C | 1.544 Mbps format plus extended framing format |
| | - | D | 1.544 Mbps format plus D4 with B8ZS clear channel capability. |
| | - | S | 1.544 Mbps using B8ZS line code and extended framing format |
| DX | - | | duplex signaling interface at customer's point of termination |
| DY | - | | duplex signaling interface at customer's end user's point of termination |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | Option | Definition |
|---|---|---|
| EA | E | Type I E&M Lead Signaling. Customer at POT or customer's end user at POT originates on E Lead. |
| EA | M | Type I E&M Lead Signaling. Customer at POT or customer's end user at POT originates on M Lead. |
| EB | E | Type II E&M Lead Signaling. Customer at POT or customer's end user at POT originates on E Lead. |
| EB | M | Type II E&M Lead Signaling. Customer at POT or customer's end user at POT originates on M Lead. |
| EC | | Type III E&M signaling at customer POT |
| EX | A | tandem channel unit signaling for loop start or ground start and customer supplies open end (dial tone, etc.) functions |
| EX | B | tandem channel unit signaling for loop start or ground start and customer supplies closed end (dial pulsing, etc.) functions |
| FC | | Fiber Optic Interface |
| GO | | ground start loop signaling - open end function by customer or customer's end user |
| GS | | ground start loop signaling - closed end function by customer or customer's end user |
| IA | | E.I.A. (25 pin RS-232) |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | | Option | Definition |
|---|---|---|---|
| KD | - | A | Ethernet at 10 Mbps, full duplex LAN |
| | - | B | Ethernet at 10 Mbps, half duplex LAN |
| KE | - | A | Ethernet at 100 Mbps, full duplex LAN |
| | - | B | Ethernet at 100 Mbps, half duplex LAN |
| KF | - | L | Ethernet at 1000 Mbps, LAN |
| KR | - | A1 | Ethernet Rate - Adjustable 1 Gbps, 100 Mbps, full duplex |
| | - | A3 | Ethernet Rate – Adjustable 1 Gbps, 300 Mbps, full duplex |
| | - | A6 | Ethernet Rate – Adjustable 1 Gbps, 600 Mbps, full duplex |
| | - | AB | Ethernet Rate – Adjustable 1 Gbps, 150 Mbps, full duplex |
| | - | AK | Ethernet Rate – Adjustable 1 Gbps, 450 Mbps, full duplex |
| KQ | - | A2 | Ethernet Rate – Adjustable 1 Gbps, 20 Mbps, full duplex |
| | - | B2 | Ethernet Rate – Adjustable 1 Gbps, 20 Mbps, half duplex |
| | - | A5 | Ethernet Rate – Adjustable 1 Gbps, 50 Mbps, full duplex |
| | - | B5 | Ethernet Rate – Adjustable 1 Gbps, 50 Mbps, half duplex |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | | Option | Definition |
|---|---|---|---|
| LA | - | | end user loop start loop signaling - Type A OPS registered port open end |
| LB | - | | end user loop start loop signaling - Type B OPS registered port open end |
| LC | - | | end user loop start loop signaling - Type COPS registered port open end |
| LO | - | | loop start loop signaling - open end function by customer or customer's end user |
| LR | - | | 20 Hz automatic ringdown interface at customer POT with Telephone Company provided PLAR |
| LS | - | | loop start loop signaling - closed end function by customer or customer's end user |
| NO | - | | no signaling interface, transmission only |
| PG | - | | program transmission - no dc signaling |
| | - | 0 | nominal frequency from 300 to 2500 Hz |
| | - | 1 | nominal frequency from 50 to 15000 Hz |
| | - | 3 | nominal frequency from 200 to 3500 Hz |
| | - | 5 | nominal frequency from 100 to 5000 Hz |
| | - | 8 | nominal frequency from 50 to 8000 Hz |
| PR | - | | protective relaying* |

* Available only for the transmission of audio tone protective relaying signals used in the protection of electric power systems during fault conditions.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.1 Glossary of Channel Interface Codes and Options (Cont'd)

| Code | | Option | Definition |
|---|---|---|---|
| QB | - | | central office manual cross connect termination with no subrating capability |
| RV | - | 0 | reverse battery signaling, one way operation, originate by customer |
| | - | T | reverse battery signaling, one way operation, terminate function by customer or customer's end user |
| SF | - | | single frequency signaling with VF band at either customer POT or customer's end user POT |
| SM | - | | SONET Terminal Multiplexer |
| SN | - | | SONET Terminal Multiplexer |
| SO | - | | SONET Optical |
| SP | - | | SONET Multiplexer supporting drops of OC48, OC12 and/or OC3 |
| SQ | - | | SONET Multiplexer supporting drops of OC48, OC12, OC3 and STS1 |
| ST | - | | Synchronous Transmission Signal |
| TD | - | | 270 Mbps Digital Video Broadcasting Service (DVB-ASI) |
| TDA | - | | 270 Mbps Serial Digital Video Transport Service (SDI) |
| TF | - | | telephotograph interface |
| TM | - | | 1.485 Gbps High Definition Video |
| TT | - | | teletypewriter interface at either customer POT or customer's end user POT |
| TT | - | 2 | 20.0 milliamperes |
| | - | 6 | 62.5 milliamperes |
| TV | - | | television interface |
| | - | 1 | combined (diplexed) video and one audio signal |
| | - | 2 | combined (diplexed) video and two audio signals |
| | - | 5 | video plus one (or two) audio 5 kHz signal(s) or one (or two) two wire |
| | - | 15 | video plus one (or two) audio 15 kHz signal(s) |

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.2 Impedance

The nominal reference impedance with which the channel will be terminated for the purpose of evaluating transmission performance:

| Value (ohms) | Code(s) |
|---|---|
| 100 | 0 |
| 150 | 1 |
| 600 | 2 |
| 900 | 3 |
| 1200 | 4 |
| 135 | 5 |
| 75 | 6 |
| 124 | 7 |
| Variable | 8 |
| 100 | 9 |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.3 Digital Hierarchy Channel Interface Codes

Customers selecting the multiplexed four-wire DSX-1 or higher facility interface option at the customer designated premises will be requested to provide subsequent system and channel assignment data. The various digital bit rates in the digital hierarchy employ the channel interface codes and speed options indicated below:

| Interface Code and Speed Options | Nominal Bit Rate (Mbps) | Digital Hierarchy Level |
|---|---|---|
| 4DS9-15 | 1.544 | DS1 |
| 4DS6-44 | 44.736 | DS3 |
| 4ST6.A, 4QB6.S1 | 51.84 | STS1 |
| 2SMF, 2SOF, 4SMF, 4SOF | 155.52 | OC3 |
| 2SMF, 2SOF, 4SMF, 4SNF, 4SOF | 622.08 | OC12 |
| 2SMF, 2SOF, 2SNF | 2488.32 | OC48 |
| 2QBF, 2SMF, 2SNF, 2SOF, 2SPF, 2SQF, 4QBF, 4SMF, 4SNF, 4SOF, 4SPF, 4SQF | 9953.28 | OC192 |

7. Special Access Service (Cont'd)

7.3 Channel Interface and Network Channel Codes (Cont'd)

7.3.4 Service Designator/Network Channel Code Conversion Table

The purpose of this table is to show the relationship between the service designator codes (e.g., VGC, DA1, etc.) and the network channel codes that are used for various administrative purposes.

| | Service Designator Code | Network Channel Code |
|---|---|---|
| Voice | | |
| | VGC | UQ |
| | VG1 | LB |
| | VG2 | LC |
| | VG3 | LD |
| | VG4 | LE |
| | VG5 | LF |
| | VG6 | LG |
| | VG7 | LH |
| | VG8 | LJ |
| | VG9 | LK |
| | VG10 | LN |
| | VG11 | LP |
| | VG12 | LR |

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions

This section contains the specific regulations governing the rates and charges that apply for Special Access Service.

7.4.1 Types of Rates and Charges

Following are the types of rates and charges. These are monthly rates, deaily rates, nonrecurring charges, and zone density charges. The rates and charges are described as follows:

(A) Monthly Rates

Monthly rates are flat recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(B) Daily Rates

Daily rates are flat recurring rates that apply to each 24 hour period or fraction thereof that a Program Audio or Video Special Access Service is provided for part-time or occasional use. For purposes of applying daily rates, the 24 hour period is not limited to a calendar day.

The application of daily rates during a consecutive 30 day period will be capped at an amount equal to the monthly rate.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The Telephone Company does not apply nonrecurring charges to the channel mileage (fixed or per mile) elements. When service is jointly provided under the Single Bill Method of Multiple Company (Interconnection Point) Billing, the nonrecurring charges are applicable to all nonrecurring functions in the provision of Special Access Service. Under the Multiple Bill Method, the nonrecurring charges are applicable only when the nonrecurring function occurs within the Telephone Company's territory. The types of nonrecurring charges that apply for Special Access Service are: installation of service, installation of optional features and functions, and service rearrangements.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(1) Installation of Service

Nonrecurring charges apply to each service installed. The nonrecurring charges for the installation of service are set forth in 7.5 following as a nonrecurring charge for the Channel Termination rate element.

(2) Installation of Optional Features and Functions

Nonrecurring charges apply for the installation of some of the optional features and functions available with Special Access Service. The charge applies whether the feature or function is installed coincident with the initial installation of service or at any time subsequent to the installation of the service.

The optional features and functions for which nonrecurring charges apply are set forth in 7.5.8 following.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements

Service rearrangements are changes to existing (installed) services which do not result in either a change in the minimum period requirements as set forth in 5.2.6(E) preceding or a change in the physical location of the point of termination at a customer designated premises. Changes in the type of service or service termination are treated as disconnects and starts. Changes in the physical location of the point of the termination are treated as moves and are described and charged for as set forth in 7.4.5 following.

The nonrecurring charges associated with upgrades in capacity (i.e., DS1s converting to STS1s or DS3s converting to STS1s) will not apply when the customer maintains the same customer premises location. Requests to add or change optional features will be subject to the nonrecurring charges associated with the features requested.

A nonrecurring service upgrade charge, as set forth in Section 7.5.8 following, will apply per DS1, DS3 or STS1 upgraded when converting existing high capacity services to OptiPoint service. The charge does not apply when OptiPoint is ordered as new service and no existing high capacity services are being relocated to the OptiPoint service. For orders for new services submitted after February 5, 2000, the nonrecurring service upgrade charge will apply for each DS1, DS3 or STS1 channel connected to new OptiPoint service when existing DS1, DS3 or STS1 facilities between the same points of termination as the new OptiPoint service are disconnected within 30 days of the order for new services.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

The charge to the customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves actual physical change to the service.

Administrative changes will be made without charge(s) to the customer. Such changes require the continued provision and billing of the Access Service to the same entity (i.e., customer remains responsible for the Access Service). Administrative changes are as follows:

- Change of customer name (i.e., the customer of record does not change but rather the customer of record changes its name—e.g., AT&T-Long Lines to AT&T Communications),
- Change of customer or customer's end user premises address when the change of address is not a result of a physical relocation of equipment,
- Change in billing data (name, address, or contact name or telephone number)
- Change of agency authorization,
- Change of customer circuit identification,
- Change of billing account number,
- Change of customer test line number,
- Change of customer or customer's end user contact name or telephone number, and
- Change of jurisdiction.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

All other service rearrangements will be charged for as follows:

- If the change involves the addition of another leg to an existing multipoint service, the nonrecurring charge for the channel termination rate element will apply. The charge will apply only for the leg that is being added.

- If the change involves changing the type of signaling on a Voice Grade service, a charge equal to the Voice Grade channel termination rate element nonrecurring charge will apply. The charge will apply per channel termination affected.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(C) Nonrecurring Charges (Cont'd)

(3) Service Rearrangements (Cont'd)

- For service rearrangements involving OC3, OC12, OC48 or OC192 special access services (e.g., OptiPoint Service, SONET OC Ring), a charge equal to one half the Optical Service Charge set forth in 7.5.1 will apply for each node rearranged.

- For all other changes, including the addition of optional features without separate nonrecurring charges, a charge equal to one half the nonrecurring installation charges associated with the month-to-month rates for the service will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.1 Types of Rates and Charges (Cont'd)

(D) Zone Density Charges

Zone density charges are applicable only to DS1, DS3, STS1, OC3, OC12, OC48 and OC192 special access services provided at the Telephone Company designated exchanges set forth in Section 7.4.10 following. Zone density charges are flat recurring rates that apply each month or fraction thereof that a special access service is provided. For billing purposes, each month is considered to have 30 days.

7.4.2 Surcharge for Special Access Service

(A) General

In addition to the rates and charges described in 7.4.1 preceding, there is a monthly surcharge that applies to Special Access Service. The Special Access Surcharge compensates the Telephone Company for use of the local exchange network when Special Access Service is connected to a PBX or equivalent device which is capable of interconnecting the Special Access Service with local exchange service.

The Telephone Company will automatically bill the surcharge on each Special Access Service installed irrespective of whether the interconnection capability exists in the customer's premises equipment or in a Centrex-CO type switch unless written certification is received from the customer certifying exemption status as set forth in (B) following.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(B) Special Access Surcharge Exemptions

The Special Access Service will be exempted from the surcharge if the customer provides the Telephone Company written certification that the Special Access channel termination is one of the following:

(1) an open-end termination in a Telephone Company switch of an FX line, including CCSA and CCSA-equivalent ONALs; or

(2) an analog termination that is used for radio or television program transmission; or

(3) a termination used for TELEX service; or

(4) a termination that by the nature of its operating characteristics could not make use of Telephone Company common lines; or

(5) a termination that interconnects either directly or indirectly to the local exchange network where the usage is subject to Carrier Common Line charges such as, where the Special Access Service accesses only FGA and no local exchange lines, or Special Access Service between customer points of termination or Special Access Service connecting CCSA or CCSA-type equipment (inter-machine trunks); or

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(B) Special Access Surcharge Exemptions (Cont'd)

(6) a termination that the customer certifies to the Telephone Company is not connected to a PBX or other device capable of interconnecting the special access facility to a local exchange subscriber line.

(C) Exemption Certification

(1) Special Access Services which are terminated as set forth in (B) preceding will be exempted from the Special Access Surcharge if the customer provides the Telephone Company with a written notification certifying exemption. Such notification shall be provided by the customer (1) at the time the Special Access Service is ordered or installed; (2) at such time as the Special Access Service is reterminated to a device not capable of interconnecting to the local exchange network, or (3) at such time as the Special Access Service becomes associated with a Switched Access Service that is subject to Carrier Common Line charges.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(C) Exemption Certification (Cont'd)

(2) If written certification is not received at the time the Special Access Service is obtained, the surcharge will be applied. Exempt status will become effective on the certification date indicated by the customer, subject to the conditions in (D) following.

(3) The exemption certification is to be provided by the customer ordering the service. The certification must be signed by the customer or authorized representative and include the category of exemption, as set forth in (B) preceding, for each termination, and the date which the exemption is effective.

(4) The customer shall also notify the Telephone Company when an exempted Special Access Service is changed or reterminated such that the exemption is no longer applicable.

(5) The Telephone Company will work cooperatively with the customer to resolve any questions regarding the exemption certification. In addition, the Telephone Company may withhold exemption of the service until the questions are resolved.

(D) Crediting the Surcharge

The Telephone Company will cease billing the Special Access Surcharge when certification is received that the Special Access Service has become exempt from the surcharge, as set forth in (B) preceding. If the status of the Special Access Service was changed prior to receipt of the exemption certification, the Telephone Company will credit the customer's account, not to exceed ninety (90) days, based on the effective date of the change specified by the customer in the letter of certification.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(E) Application of Rates

(1) The monthly Special Access Surcharge applies to Special Access Services arranged, as set forth in (A) preceding, on a per voice grade equivalent basis as shown in the following example.

| Special Access Service | Voice Grade Equivalent | | Surcharge | Monthly Charge |
|---|---|---|---|---|
| Voice Grade | 1 | X | $25 | $25.00 |
| High Capacity | | | | |
| DS1 | 24 | X | $25 | $600.00 |
| DS3 | 672 | X | $25 | $16,800.00 |
| OC3 | 2336 | X | $25 | $58,403.00 |

The preceding example illustrates the maximum number of surcharges applicable to a DS1. If the customer claims exemption(s) as set forth in 7.4.2(C) preceding, or is not utilizing all available voice grade equivalents and has spare capacity, the number of surcharges would be reduced accordingly.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.2 Surcharge for Special Access Service (Cont'd)

(E) Application of Rates (Cont'd)

(2) In the case of multipoint Special Access Service, one Special Access Surcharge will apply for each termination at a customer designated premises except that no surcharge applies at the customer designated premises at which the Access Service is connected to Interstate Service.

(3) The Telephone Company will bill the surcharge to the customer who orders the Special Access Service unless the Service is exempt as set forth in (B) preceding.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.3 Minimum Periods

The minimum service period for all special access services, except part-time and occasional Video and Program Audio services and Gateway SONET Ring Service, is one month. The minimum service period for part-time and occasional Video and Program Audio Services is one day (i.e., a continuous 24 hour period, not limited to a calendar day).

Additional Minimum Periods on other services, Minimum period charges and associated termination liability charges are described in Section 5 preceding.
.

7.4.4 Reserved For Future Use

7.4.5 Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the customer's premises
- The customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.5 Moves (Cont'd)

(A) Moves Within the Same Building

Moves within the same building will be considered a rearrangement, and the associated nonrecurring charges will apply. There will be no change in the minimum period requirements.

(B) Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The customer will also remain responsible for satisfying all outstanding minimum period charges for the disconnected service.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.6 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage Facility rate element is calculated on the airline distance between the serving wire centers involved, i.e., the serving wire centers associated with two Customer designated premises, a serving wire center associated with a Customer designated premises and a Telephone Company hub, or two Telephone Company hubs or between the serving wire center associated with a Customer designated premises, and a WATS serving office. The serving wire center associated with a Customer designated premises is the serving wire center from which the Customer designated premises would normally obtain dial tone. The V & H coordinates method is used to determine mileage. This method is explained in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. If the method results in fractional miles, the fractional miles are rounded up to the nearest whole number before determining the rate to be billed. The serving wire center and hub V & H coordinates are also included in that service guide. When hubs are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., Customer designated premises serving wire center to hub, hub to hub and/or hub to Customer designated premises serving wire center. However, when any service routed through a hub for purposes other than Customer specified bridging or multiplexing (e.g., the Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the Customer designated premises.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.7 Facility Hubs

A customer has the option of ordering Voice Grade service or High Capacity services to facility hub for channelizing to individual services requiring lower capacity facilities (e.g., Voice, Program Audio, DS1, DS3 etc.).

A Hub is a Telephone Company designated serving wire center at which bridging or multiplexing functions are performed. The bridging functions performed are to connect three or more customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize digital facilities to individual services requiring a lower capacity or bandwidth.

Different locations may be designated as hubs for different facility capabilities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. When placing an Access Order the customer will specify the desired hub. Serving wire centers, and hub locations, and the type of multiplexing functions available are identified in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from digital to voice frequency channels

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.7 Facility Hubs (Cont'd)

Point to point services may be provided on channels of these services to a hub. The transmission performance for the point to point service provided between customer designated premises will be that of the lower capacity or bit rate. For example, when a 155.52 Mbps (OC3) channel is multiplexed to DS3 channels, the transmission performance of the channelized service will be DS3 High Capacity, not OC3.

The Telephone Company will commence billing the monthly rate for the service to the hub on the date specified by the customer on the Access Order. Individual channels utilizing these services may be installed coincident with the installation of the service to the hub or may be ordered and/or installed at a later date, at the option of the customer. The customer will be billed for a Voice Grade or High Capacity Channel Termination, Channel Mileage (when applicable), and the multiplexer at the time the service is installed. Individual service rates (by service type) will apply for a Channel Termination and additional Channel Mileage (as required) for each channelized service. These will be billed to the customer as each individual service is installed.

Cascading multiplexing occurs when a High Capacity or SONET level service is de-multiplexed to provide channels with a lesser capacity and one of the lesser capacity channels is further de-multiplexed. For example, an OC3 OptiPoint configuration node is de-multiplexed to 3 DS3 channels and then one of the DS3 channels is further de-multiplexed to 28 individual DS1 Channels.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.7 Facility Hubs (Cont'd)

When cascading multiplexing is performed, whether in the same or a different hub, a charge for the additional multiplexing unit also applies. When cascading multiplexing is performed at different hubbing locations, Channel Mileage charges also apply between the hubs.

The Telephone Company will designate hubs for Video Services. Full-time or part-time service may be provided between customer designated premises or between a customer designated premises and a hub and billed accordingly at the rates set forth in 7.5.4 following for a Channel Termination, Channel Mileage and Optional Features and Functions, as applicable.

At the request of a customer, the full-time and/or part-time services provided to the Hub may be connected together in the following configurations: full-time to full-time, full-time to part-time or part-time to part-time. The customer will be charged for each such connection made at the rates for Additional Labor as set forth in 13.2 following. The rates that apply for the service between each customer designated premises and the Hub are a Channel Termination and Channel Mileage, if applicable. In addition, for Program Audio services, rates for optional features and functions may be applicable.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.8 Shared Use of Digital High Capacity Service

(N)

Shared use occurs when Special Access Service and Switched Access Service are provided over the same Special Access facility through a common interface. The Special Access monthly rate for the Channel Termination, Channel Mileage, if applicable, and multiplexer will apply, regardless of whether any individual channels of the Shared Special Access facility are used for Special Access Service, Switched Access Service, or any other type of service. The practice known as "ratcheting" (to apply non-Special Access rates on a proportional basis) shall not apply in any circumstance. (N)

7.4.10 High Capacity Zone Density Plan

The High Capacity Zone Density Plan is applicable to DS1 and DS3 high capacity services, STS1 high capacity services, OC3, OC12, OC48 and OC192 OptiPoint services, OC3, OC12, OC48 and OC192 SONET OC Ring and Ethernet Transport services as set forth in Sections 7.2.8, 7.2.13, 7.2.14 and 7.2.15 preceding. The Zone Density Plan will become effective concurrent with the first operational Expanded Interconnection arrangement, as described in Section 17.1 following, in the relevant Telephone Company study area.

The channel termination and channel mileage (fixed and per mile) rates applicable for high capacity services subject to the Zone Density Plan are dependent upon the zone in which the Telephone Company serving area is located. Channel mileage provided between wire centers in different zones will be assessed the rate for the higher zone. Specific Zone Density Charges for DS1 and DS3 charges, high capacity STS1 and OptiPoint service are set forth in Sections 7.5.8 and 22.5.8 following. SONET OC Ring provided under zone density pricing is set forth in Sections 7.5.15 and 22.5.15 following. Ethernet Transport services provided under zone density pricing are set forth in Sections 7.5.16 and 22.5.16 following.
Term Discount Plans available for services provided under zone density pricing are set forth in Sections 7.5.10 and 22.5.10 following. Premier Term Discount Plans available for services provided under zone density pricing are set forth in Sections 7.5.14 and 22.5.14 following. The zones for each Telephone Company serving area are identified following:

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan - GRANDFATHERED

(A) General

The Special Access Term Discount Plan (TDP) applies to Special Access High Capacity STS1 (51.84 Mbps) services and STS1/DS1 Multiplexing, Special Access Digital Data Service (56.0 and 64.0 kbps), High Capacity DS1 (1.544 Mbps) and DS3 (44.736 Mbps) services, DS3 to DS1 and DS1 to DS0 Multiplexing, and Shared SONET Ring Service. The TDP provides the customer with discounted rates for the services listed. The customer agrees to a minimum service commitment per service on a state or national basis when the TDP is established.

In order for a circuit to be eligible for TDP pricing, the customer must commit a channel termination and/or multiplexer, or if not provided by the Telephone Company, the portion of the circuit (i.e., interoffice mileage) that is provided by the Telephone Company to a TDP. The commitment level for a circuit will be based on this information. For purpose of determining the term discount plan commitment level for Shared SONET Ring Service (SSRS), a Ring Connection equates to a Special Access Channel Termination. Customers may disconnect or move channel terminations and/or multiplexers within the committed area (i.e., state or nation) and not be subject to termination liability charges as long as the commitment levels are maintained.

(B) Commitment Level

All eligible special access rate elements for a given circuit (channel termination, channel mileage termination (fixed), channel mileage facility (per mile) or multiplexing) must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a TDP by committing all or a portion of their in-service circuits to a minimum term of 3 years up to maximum term of 5 years. During the term of the selected TDP, the customer must maintain an in-service commitment threshold of not less than 90% nor more than 130% of the committed circuits.

Effective October 1, 2020 the Special Access Term Discount Plan will be grandfathered until the expiration date of the current term. Term renewals will not be offered on these plans going forward as of this effective date. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(B) Commitment Level (Cont'd)

As long as a customer's actual in-service level of circuits remains within the commitment threshold, the customer will be billed the TDP rate for all eligible rate elements. Additionally, if a customer's in-service level exceeds the initial in-service level by no more than 30%, the customer will be billed the TDP rates for all eligible rate elements. For example, the customer has 200 STS1 circuits and elects to commit 150 circuits to a 3 year TDP. The customer will be billed TDP rates as long as the in-service level of circuits is equal to or greater than 135 (90% minimum threshold) but not more than 195 (130% maximum threshold).

If the customer's in-service request exceeds the initial service level by more than 30%, the customer will be billed the month-to-month rate for all facilities above the upper limit of the commitment threshold. If the customer's in-service level falls below the minimum commitment threshold, the customer will be billed termination liability charges for the number of circuits below the minimum commitment threshold, and the customer's commitment level will be decreased to 110 percent of the customer's current in-service level. For example, a customer whose minimum commitment threshold is 135 circuits (90% of 150), but only has 125 in-service, will be billed termination liability charges for 10 circuits, and the customer's commitment level will be decreased to 138 (110% of 125).

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(B) Commitment Level (Cont'd)

Although the commitment level is based upon circuits, the following rate elements will receive TDP rates:

Channel Mileage Facility (per mile)
Channel Mileage Termination (fixed)
Multiplexing
Channel Termination
Ring Connection
Ring Transport

(C) Ordering Provisions

The customer must order a TDP in writing to the Telephone Company. A TDP may be ordered based on the following plan options.

3 Years
5 Years

The customer must specify the plan and the length of the service commitment period and commitment level. The customer agrees to a minimum service commitment level per service per committed area (i.e., state or nation) in effect at one time. For example, a customer that has a state specific or nationwide 3 year plan in effect for STS1 service may not establish a second 3 year STS1 TDP for that area until the current TDP expires. Once the plan is established, and commitment levels are agreed upon, standard access ordering procedures will be followed.

When a customer converts to a TDP, no access order charges are applied toward facilities in-service at that time. If a customer moves from a month to month plan to a TDP, or upgrades from one TDP to another, no access order charges are applied.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(D) Service Rearrangements

When a circuit committed to a TDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 preceding, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

(E) 90 Day Review Period

No adjustments in monthly billing for a TDP, for being above or below the commitment threshold described in (B) preceding, will take place until 90 days after Telephone Company written notification to the customer that the commitment threshold has been exceeded or has not been met. This will ensure that customers will not be penalized for aberrations in channel termination and/or multiplexer counts caused by timing differentials in disconnection and installation.

Customer's bills will not be adjusted for being outside the threshold described in 7.4.11(B) preceding during the 90 day review period. Additionally, customers will continue to be billed the adjustments (following the 90 day review period) for being outside the described threshold until the commitment level is met or re-established. A new 90 day review period will be initiated if the customer's actual in-service level subsequently falls outside the described threshold.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(F) Increasing the TDP Commitment Level

Customers may increase their commitment level at any time by notifying the Telephone Company in writing. An increase in the commitment level will not change the expiration date of the TDP.

When a commitment level is increased, the actual in-service channel termination and/or multiplexer level at the time of the increase will be used to calculate the new commitment threshold as described in Section 7.4.11(B) preceding.

Upon written notification to the Telephone Company, customers may elect to have all future channel terminations and/or multiplexers installed during a commitment period automatically placed on the designated TDP.

Customers may request, upon written notification to the Telephone Company, that the Telephone Company automatically increase the customer's TDP commitment level when the 130% commitment threshold, as set forth in 7.4.11(B) preceding, is exceeded. The adjusted commitment level will be the actual channel terminations and/or multiplexers in service under the TDP at the time the 130% threshold is exceeded. The expiration date of the customer's TDP will not be affected by this change.

The customer may rescind its request to automatically add future channel terminations and/or multiplexers, or to automatically increase its commitment level when the 130% threshold is exceeded, by notifying the Telephone Company in writing.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(G) Decreasing the TDP Commitment Level and Termination Liabilities

Customers may only decrease their commitment level by paying termination liability charges on the number of channel terminations and/or multiplexers by which the commitment level is decreased. Termination liabilities will apply to applicable services covered by the TDP. For example, a customer has a commitment level of 150 channel terminations and/or multiplexers. The customer then decreases its commitment level to 125. The customer must pay a termination liability on the most recently disconnected 25 facilities, inclusive of all associated rate elements as listed above.

If a customer disconnects any portion of their TDP service prior to the expiration of the commitment period, the customer will be billed 50% of the monthly TDP charges for the remaining portion of the committed term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(H) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by a TDP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the TDP. If a Telephone Company initiated rate increase causes a customer's rates to increase by 10% or more at any one time, the customer may cancel the TDP without incurring termination liability charges.

Extension of a TDP Commitment Period

A customer has two options for extending their TDP commitment period as described following:

(1) A 3 year TDP commitment period can be extended by the customer at any time during the term of the plan, up to a maximum of 5 years. The number of months accrued in the current 3 year plan will apply toward the new 5 year plan selected. For example, a customer having completed 15 months of a 3 year commitment can extend the commitment to 5 years and no additional charges will be assessed. The first payment will be considered the 16th payment under the new 5 year plan; or

(2) Upon completion of a 3 or 5 year TDP commitment period, the customer may extend their plan for an additional 12 months at the rates, terms and conditions currently in effect for the 3 or 5 year term commitment. Customers who wish to take advantage of the 12 month extension must notify the Telephone Company in writing within 60 days prior to the expiration of their original 3 or 5 year TDP.

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(J) Upgrading a TDP Service

When a customer upgrades a digital data service being billed TDP rates to a DS1 service, the digital data TDP commitment level will be reduced at the customer's request (up to a maximum of 24) and no termination liability charge will apply. If the same customer has a TDP for DS1 service, the DS1 TDP commitment level will be increased if the customer requests that it be increased. When a customer upgrades a DS1 service being billed TDP rates to a DS3 service with the same termination points, the customer's DS1 TDP commitment level will be reduced at the customer's request (up to a maximum of 28) and no termination liability charge will apply.

When a customer upgrades a DS1 service being billed TDP rates to an STS1 service with the same termination points, the customer's DS1 TDP commitment level will be reduced at the customer's request (up to a maximum of 28) and no termination liability charge will apply.

When a customer upgrades a DS1, DS3 or STS1 service being billed TDP rates to a SONET level service offered by the Telephone Company, the customer's DS1, DS3 or STS1 TDP commitment level will be reduced at the customer's request by an amount equal to the number of DS1, DS3 or STS1 special access circuits that are migrated to the other SONET level service offered by the Telephone Company. Termination liability charges will not apply to upgrades if the other SONET level service commitment period is greater than or equal to the existing TDP commitment period.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(J) Upgrading a TDP Service (Cont'd)

When a customer upgrades a DS1, DS3 or STS1 being billed TDP rates to Ethernet Transport (ET) or Ethernet Virtual Private Line (EVPL) service, the customer's DS1, DS3 or STS1 TDP commitment level will be reduced at the customer's request as set forth following:

- for every 100 Mbps of ET or EVPL, the customer's STS1 commitment level will be reduced by 1 STS1 (e.g., STS1 can upgrade to 100 Mbps of ET or EVPL, 5 STS1s can upgrade to 500 Mbps of ET or EVPL, etc.)

- for every 10 Mbps of ET or EVPL , the customer's DS1 commitment level will be reduced by 5 DS1s (e.g., 5 DS1s can upgrade to 10 Mbps ET or EVPL, 10 DS1s can upgrade to 20 Mbps ET or EVPL, etc.)

- for every 100 Mbps of ET or EVPL, the customer's DS3 commitment level will be reduced by 1 DS3 (e.g., 1 DS3 can upgrade to 100 Mbps ET or EVPL, 5 DS3s can upgrade to 500 Mbps ET or EVPL, etc.)

The customer must commit to a new ET three (3) or five (5) year minimum commitment period or EVPL Term Discount Plan for periods of three (3) or five (5) years or to an EVPL Fixed Rate Term Plan for a period of seven (7) years. Termination liability charges will not apply to upgrades if the ET or EVPL commitment period is greater than or equal to the existing TDP commitment period.

When a disconnect order for a DS1, DS3 or STS1 is submitted to the Telephone Company, the customer must note on the disconnect order that the DS1, DS3, or STS1 circuit to be disconnected is being or has been upgraded to ET or EVPL service.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.11 Special Access Term Discount Plan – GRANDFATHERED (Cont'd)

(K) Renewal of a TDP

At the end of the TDP service commitment period, the customer may subscribe to a new TDP at the prevailing rates set forth in Section 7.5.10 following. If the customer does not select a new TDP, the rates will convert to the prevailing month-to-month digital data, DS1, DS3, STS1 or Shared SONET Ring rates set forth in Section 7.5.7, 7.5.8 and 7.5.11 following. The customer will have up to 12 months (365 days) grace period to renew their TDP before month-to-month rates will be assessed.

(L) Cancellation Charges

When a customer cancels an order for special access services being provided under a TDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.12 Shared SONET Ring Service (SSRS)

The rates and charges for SSRS are as set forth in Sections 7.5.10 and 7.5.11 following, and are in addition to any applicable rates and charges set forth in other sections of this service guide. There are two types of rates and charges that may apply to SSRS. These are monthly recurring rates and nonrecurring charges, both of which are billed in advance.

(A) Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

(B) Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation). Nonrecurring charges may apply to each SSRS installed.

(C) The minimum service period for SSRS is one month. Customers may migrate existing DS1 and DS3 special access services to the SSRS without incurring service rearrangement charges. Once existing DS1 and DS3 special access services are migrated to SSRS, customers will be billed for SSRS and will no longer be billed for DS1 and DS3 special access once the DS1 and DS3 special access services have been ordered to be disconnected.

(D) The service performance maintenance guarantee, as set forth in Section 2.4.4(B)(7) preceding, also applies to SSRS.

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.12 Shared SONET Ring Service (SSRS) (Cont'd)

(E) When SSRS is used for both interstate and intrastate traffic, the SSRS is to be classified as 100% interstate when the lines carry more than a de minimis amount of interstate traffic. Interstate traffic is deemed to be de minimis when the interstate traffic amounts to ten percent (10%) or less of the total traffic on an SSRS. The certification requirements set forth in Section 2.3.13 preceding also apply to SSRS.

(F) Term discount plans are available for DS1 and DS3 services offered under SSRS. For purposes of determining the term discount plan commitment level, an SSRS ring connection equates to a special access channel termination. The rates and charges for SSRS term discount plans are set forth in Section 7.5.10 following.

(G) In situations where facilities do not exist for the provision of SSRS within the available serving areas, special construction charges, as set forth in Section 14 following, may apply.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.13 Multiplexed Access Service Connection (MASC)

Multiplexed Access Service Connection (MASC) will be charged per connection per central office where the service is performed. If MASC is provided between two Company offices where multiplexing is performed, channel mileage (termination and per mile) for the lower speed service will apply between the two central offices, along with one MASC charge per connection per central office

If two customers are involved, one customer will be responsible for the entire billing of the MASC. The responsible customer must obtain a Letter of Authorization (LOA) from the second customer and submit it to the Company along with the channel assignment information for the lower speed services being connected.

7.4.14 Reserved For Future Use

7.4.15 OptiPoint Service

Effective March 1, 2022 OptiPoint Services with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

OptiPoint-192 Point-to-Point configurations are grandfathered as of February 11, 2019 and will no longer be available for new service requests. This does not impact Multipoint or Ring configurations.

The rates and charges for OptiPoint service are set forth in Section 7.5.8 following and are in addition to any applicable rates and charges set forth in any other sections of this service guide. Nonrecurring charges and monthly recurring rates applicable for OptiPoint service are billed in advance. A nonrecurring service upgrade charge as described in Section 7.4.1(C)(3) preceding may also apply to OptiPoint services.

(A) Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation of service) and are developed at full cost recovery on a labor hours per labor time basis. For customers who elect the one year commitment period the nonrecurring charge will apply for the installation of the service. However, if at the end of the one year commitment period the customer elects to renew their one year commitment plan, a nonrecurring charge will not apply for the renewal.

(B) Monthly recurring charges are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.15 OptiPoint Service [1] (Cont'd)

(C) OptiPoint service is available on a month-to-month basis or for a minimum commitment period of one, three or five years. If the customer requests that service be discontinued prior to the expiration of the one, three or five year minimum commitment period, a 50% penalty will be assessed for the remaining months of the term. For example, if a customer who has selected the three year option terminates service in month 12, they will be charged 50% of the remaining 24 months of billing. Additionally, customers may discontinue service, without penalty, should the monthly recurring rates increase by 10% or more at any one time. The Federal Government and its authorized agents are exempt from the 50% penalty charge if service is discontinued prior to the expiration of the one, three or five year minimum commitment period. Penalty charges will not apply to customers who elect to upgrade to Gateway SONET Ring Service if the minimum commitment period selected is equal to or greater than their OptiPoint minimum commitment period. Upon expiration of the one, three or five year minimum commitment period, the customer may renew their OptiPoint service at the month-to-month service rates. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the one, three or five year service period, the month-to-month OptiPoint rates in effect at the time of expiration will automatically renew. The customer can terminate OptiPoint service at the end of the minimum commitment period with no penalty or obligation to continue the service. Further, if the customer notifies the Telephone Company in writing 90 days prior to the expiration date of their minimum commitment period with their intent to not renew their OptiPoint service, the customer will have six (6) months after the expiration date to submit their disconnect order(s).

[1] Effective March 1, 2022 OptiPoint Services with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.15 OptiPoint Service [1] (Cont'd)

(C) (Cont'd)

If the customer fails to submit their disconnect order(s), by the end of the six (6) month period, **services** will automatically renew at the current service guide rates. If the customer submits their disconnect order(s) after the six (6) month period, termination liability charges will apply. Termination liability charges will be calculated at 50 % of the monthly recurring charges for the remaining months of the commitment period up to a maximum of twelve (12) months. Time from the expiration of the original commitment period until the disconnect order(s) are received will apply for calculation of the termination liability charges.

Customers may upgrade OptiPoint service without incurring termination liability charges under the following circumstances*:

(1) The order for the disconnect of the existing OptiPoint and the order for the upgraded OptiPoint must be received at the same time.

(2) The new OptiPoint is provided between the same customer and central office locations as the discontinued service.

(3) The service period of the new OptiPoint is equal to or greater than the service period of the existing OptiPoint service.

[1] Effective March 1, 2022 OptiPoint Services with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan– GRANDFATHERED

(A) General

The Premier Term Discount Plan (PTDP) applies to Special Access Voice Grade Service, monthly Program Audio Service, Digital Data Service, High Capacity Fractional DS1 Service, and High Capacity DS1 (1.544 Mbps) and DS3 (44.736 Mbps) Service and Special Access STS1 (51.84 Mbps) Service. The PTDP provides the customer with discounted rates for the services listed. The customer agrees to commit 100% of their existing and future special access services ordered from the Telephone Company on a national basis for a five year commitment period when the PTDP is established.

The following rate elements will be eligible for PTDP rates:

Channel Termination
Channel Mileage Termination (fixed)
Channel Mileage Facility (per mile)
Multiplexing

The commitment level will be based on special access circuit quantities determined by the Telephone Company's billing records and mutually agreed upon by the Telephone Company and the customer. The commitment level will be based on DS1 equivalent circuits, by state, and updated annually. If the customer's circuit quantity falls below 95% of the state specific commitment level in a consecutive 60 day period, a shortfall penalty as set forth in (C) following is applicable.

Effective October 1, 2020 the Premier Term Discount Plan will be grandfathered until the expiration date of the current term. Term renewals will not be offered on these plans going forward as of this effective date. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(A) General (Cont'd)

Customers who currently subscribe to the Telephone Company Term Discount Plan (TDP), set forth in section 7.4.11 preceding, may convert to a PTDP without termination liability penalty under their existing TDP. Customers may disconnect or move special access circuits and not be subject to termination liability charges as long as the commitment levels are maintained.

(B) Commitment Level

All eligible special access rate elements for a given circuit (channel termination, channel mileage termination (fixed), channel mileage facility (per mile) and multiplexing) must be ordered for the same commitment period with the same service date for the same customer. A customer establishes a PTDP by committing all of their in service circuits eligible for the discount to a five year term. All future special access circuits ordered from the Telephone Company will be included in the plan. Circuits added to the PTDP after the plan is established will carry the plan effective date.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(B) Commitment Level (Cont'd)

The customer makes a commitment in terms of DS1 equivalent circuits based on the quantity of special access circuits in service, by state, when the plan is ordered. For purposes of the plan, DS1 equivalents will be calculated based on the following conversion table:

| Service | DS1 Equivalent Ratio |
|---|---|
| High Capacity DS1 | 1:1 |
| Voice Grade | 24:1 |
| Digital Data | 24:1 |
| High Capacity DS3 | 1:28 |
| Fractional DS1 128.0 kbps | 12:1 |
| Fractional DS1 256.0 kbps | 6:1 |
| Fractional DS1 384.0 kbps | 4:1 |
| Monthly Program Audio | 24:1 |
| High Capacity STS1 | 1:28 |

The commitment level is adjusted annually on the anniversary date of the PTDP. The adjusted commitment level must be equal to or greater than the initial PTDP commitment level.

When a customer has no Telephone Company provided special access circuits in service in a given state when the customer's PTDP is initially ordered, the DS1 equivalent commitment level for that state will be equal to the DS1 equivalents in service on the customer's next PTDP annual adjustment date. The shortfall penalty set forth in (C) following will not apply in that state until after the DS1 equivalent commitment level has been established.

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(B) Commitment Level (Cont'd)

During the PTDP five year term, the customer must maintain a minimum threshold of 95% of the current DS1 equivalent circuit commitment, by state. As long as the customer's actual in service level of circuits remains at or above 95% of the current commitment level, the customer will be billed the PTDP rates for all eligible rate elements. A shortfall charge, as set forth in 7.5.14(D) following, will be assessed if the customer's in service level falls below the required minimum commitment threshold.

The customer will not be penalized for circuits converting to OptiPoint or SONET OC Ring. The DS1 equivalent commitment levels will be adjusted without penalty when a customer converts to OptiPoint or SONET OC Ring.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(B) Commitment Level (Cont'd)

The customer will not penalized for circuits converting to Ethernet Transport (ET) or Ethernet Virtual Private Line (EVPL) service provided by the Telephone Company. The DS1 equivalent commitment levels will be adjusted without penalty when a customer converts to ET or EVPL as set forth following:

- for every 10 Mbps of ET or EVPL, the customer's DS1 equivalent commitment level will be reduced by 5 DS1 equivalent circuits.

Termination liability charges will not apply to upgrades if the ET or EVPL commitment period is greater than or equal to the existing PTDP commitment period.

When a disconnect order for an DS1, DS3 or STS1 is submitted to the Telephone Company, the customer must note on the disconnect order that the DS1, DS3, STS1 circuit to be disconnected is being or has been upgraded to ET or EVPL service.

Services provided to the customer on an Individual Case Basis will not be included in the PTDP commitment quantity. Shared use facilities will not receive the discount for the switched access portion of the circuit. Adjustments will be made to the commitment level for circuits that convert to OptiPoint, SONET OC Ring, ET or EVPL after the PTDP is established

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(C) Shortfall Penalty

A customer's DS1 equivalent circuit quantities will be monitored monthly. A shortfall penalty will be applicable if the circuit quantities fall below 95% of the state specific commitment level for two consecutive months. When a shortfall exists for this period, the customer will be assessed a shortfall charge for each equivalent DS1 the customer is short of the commitment. The shortfall penalty will be applied monthly until the commitment level is achieved or the customer's PTDP is terminated as set forth in (E) following. The following states are excluded from the shortfall penalty:

- Kansas

The shortfall penalty will be calculated for each state by subtracting the actual DS1 circuit quantity from the DS1 equivalent commitment level. The shortfall penalty will be equal to the DS1 equivalent shortfall quantity multiplied by the shortfall charge, as set forth in 7.5.14(D) following.

For example, a customer has committed 1,000 DS1 equivalent circuits to a PTDP. The customer has fallen below 95% of their commitment for two consecutive months, and now has 940 DS1 equivalents. The shortfall of 60 DS1 equivalents, multiplied by the shortfall charge of $327, equals the monthly shortfall penalty of $19,620. The customer will continue to be billed PTDP rates for their remaining special access circuits on the PTDP.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(C) Shortfall Penalty (Cont'd)

The shortfall penalty will be assessed on the 60th day in which a shortfall exists, and will be applied to the customer's bill in the first available bill cycle following the shortfall period. The customer's account will be monitored monthly for continued shortfall status.

(D) Ordering Provisions

The customer must order a PTDP in writing to the Telephone Company. The completed PTDP order form should include the following information:

- PTDP effective date.
- All customer Access Carrier Name Abbreviations (ACNAs) participating in the plan.
- Initial DS1 equivalent commitment levels, by state.

Once the PTDP is established, standard access ordering procedures will be followed. When a customer converts existing special access services to a PTDP, no access order charges are applicable for facilities in-service at that time.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(E) Termination Liability Penalty

A termination liability penalty will be assessed if the customer cancels the PTDP prior to the expiration date of the PTDP five year commitment.

A termination liability penalty will be calculated by multiplying the customer's DS1 equivalent commitment level times the remaining months in the PTDP, times the termination liability charge set forth in 7.5.14(E) following.

For example, a customer has 1,000 DS1 equivalent circuits committed to a PTDP and terminates service in month 48. The customer will be charged the remaining 12 months times the 1000 DS1 equivalent circuits committed, times the termination liability charge of $164, for a termination liability penalty of $1,968,000.

(F) Rate Changes

In this section, the term "rate" refers to the charges associated with the entire circuit covered by the PTDP. Rate increases or decreases will automatically be applied to the monthly term plan rates for the remaining term of the plan. If a Telephone Company initiated rate increase causes PTDP rates to increase by more than 10% at any one time, the customer may cancel the PTDP without incurring termination liability charges.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(G) Renewal of a PTDP

At the end of the PTDP service commitment period, the customer will have up to 12 months (365 days) to subscribe to a new PTDP at the prevailing rates set forth in Section 7.5.14 following. If the customer does not select a new PTDP, the rates will convert to the prevailing month-to-month special access rates set forth in Section 7.5 following, and will be effective as of the expiration date of the PTDP.

(H) Service Rearrangements

When a circuit committed to a PTDP is rearranged as set forth in 7.4.1(C)(3) preceding, the nonrecurring rearrangement charge associated with the month-to-month rates for that service will apply. Changes in the type of service or service termination are treated as disconnects and starts, and the nonrecurring installation charge associated with the month-to-month rates for that service will apply. Changes in the physical location of the point of termination are treated as moves, as described in 7.4.5 preceding, and will be assessed the nonrecurring charge associated with the month-to-month rates for that service.

Cancellation Charges

When a customer cancels an order for special access service being provided under a PTDP, cancellation charges, as set forth in 5.2.4 preceding, will be calculated using the nonrecurring charges associated with the month-to-month rates for the service being cancelled.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions Cont'd)

7.4.16 Premier Term Discount Plan – GRANDFATHERED (Cont'd)

(J) Extension of a PTDP Commitment

Upon completion of the 5 year PTDP commitment period, the customer may extend their PTDP plan for an additional 12 months at the rates, terms and conditions in effect for the 5 year PTDP term commitment. Customers who wish to take advantage of the 12 month extension must notify the Telephone Company in writing within 60 days prior to the expiration of their original 5 year PTDP.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.17 SONET OC Ring [1]

The rates and charges for SONET OC Ring are set forth in Section 7.5.15, following, and are in addition to any applicable rates and charges set forth in other sections of this service guide. The applicable rates for SONET OC Ring include monthly recurring rates and nonrecurring charges, both of which are billed in advance.

(A) Monthly rates are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

Monthly recurring rates for local, alternative central office, interoffice, and internodal channels apply for each air mile increment of the channel. Air mileage is measured using V&H coordinates between nodes. Fractions of an airline mile are rounded up to the next mile. The minimum charge is one airline mile, except when the customer designated premises and the serving wire center are collocated in the Telephone Company building, or where both customer designated premises are in the same building. In those instances, the intraoffice channel monthly recurring rate would apply rather than the initial one mile minimum.

For internodal channels, monthly recurring charges apply, as appropriate, for the same serving wire center area or contiguous serving wire center areas. Monthly recurring rates for customer and central office nodes apply per node and are based upon the capacity of the ring configuration.

Monthly recurring rates for customer configuration interfaces apply for each origination and each termination of an activated DS1, DS3, STS1, OC3, OC3c, OC12, OC12c, OC48 and/or OC48c at the customer node.

1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.17 SONET OC Ring [1] (Cont'd)

(B) Nonrecurring charges apply for the central office node, customer node with Telephone Company provided termination equipment, and central office and customer node configuration interface capacity reallocation rate elements. For customers who elect the one year commitment period, the nonrecurring charge for the central office node and customer node with Telephone Company provided termination equipment will apply for the installation of the service. However, if at the end of the one year commitment period the customer elects to renew their one year commitment plan, a nonrecurring charge will not apply for the renewal.

(C) SONET OC Ring is available on a month-to-month basis or for a period of one, three or five years. All SONET OC Ring arrangements will begin in month one. If the customer requests that service be disconnected prior to the expiration of the one, three or five year service period selected, a 50% penalty will be assessed for the remaining months of the term. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 50% of the remaining 24 months of billing. The Federal Government and its authorized agents are exempt from the 50% penalty charge if service is discontinued prior to the expiration of the one, three or five year minimum commitment period.

Customers may upgrade SONET OC Ring without incurring termination liability charges under the following circumstances:

(1) The order for the disconnect of the existing SONET OC Ring and the order for the upgraded SONET OC Ring must be received at the same time.

(2) The new SONET OC Ring is provided between the same customer and central office locations as the discontinued service.

(3) The service period of the new SONET OC Ring is equal to or greater than the service period of the existing SONET OC Ring.

[1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.17 SONET OC Ring [1] (Cont'd)

(C) (Cont'd)

Additionally, customers may disconnect SONET OC Ring, without penalty, should the total of the monthly recurring rates associated with the SONET OC Ring increase. The customer must notify the Telephone Company in writing within 90 days after the effective date of the rate increase if they elect to discontinue service.

Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service period. Upon expiration of the one, three or five year minimum commitment period, the customer may renew their SONET OC Ring service at the month-to-month service rates. If the customer does not specify renewal terms in writing 90 days prior to the expiration of the one, three or five year period, the commitment period and SONET OC Ring rates in effect at the time of expiration will automatically renew. The customer can terminate SONET OC Ring at the end of the minimum commitment period with no penalty or obligation to continue the service. Further, if the customer notifies the Telephone Company in writing 90 days prior to the expiration date of their minimum commitment period with their intent to not renew their SONET OC Ring, the customer will have six (6) months after the expiration date to submit their disconnect order(s). If the customer fails to submit their disconnect order(s), by the end of the six (6) month period, the commitment period in effect at the time of the original expiration period will automatically renew at the current service guide rates. If the customer submits their disconnect order(s) after the six (6) month period, termination liability charges will apply. Termination liability charges will be calculated at 50 % of the monthly recurring charges for the remaining months of the commitment period up to a maximum of twelve (12) months. Time from the expiration of the original commitment period until the disconnect order(s) are received will apply for calculation of the termination liability charges.

1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.17 SONET OC Ring [1] (Cont'd)

(D) Special Construction charges, as set forth in Section 14 following, may apply where facilities and/or operating conditions do not permit the provision of SONET OC Ring and the customer desires the Telephone Company to provision the SONET OC Ring.

Customers may be required to pay special construction charges when a four fiber optical service configuration is requested in lieu of the two fiber UPSR topology or two fiber BLSR topology for OC3, OC12, OC48 and OC192 SONET OC Ring.

Where dual entrance facilities currently exist to a customer premises, special construction charges will not be assessed when the customer requests connection at both entrance facilities.

1] Effective March 1, 2022 SONET OC Ring with terms of 36 or 60 months will be grandfathered until the expiration date of the current term. As of this effective date, 36 and 60 month term renewals will not be offered on this plan. Upon expiration of the current term, rates will revert to month-to-month.

7.4.18 Ethernet Transport

The rates and charges for Ethernet Transport (ET) service are set forth in Section 7.5.16 following and are in addition to any applicable rates and charges set forth in any other sections of this service guide. Nonrecurring charges and monthly recurring rates applicable for ET service are billed in advance.

(A) Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation of service) and are developed at full cost recovery on a labor hours per labor time basis. For customers who elect the one year commitment period, the nonrecurring charge will apply for the installation of the service. For customers who elect 2.5 Gbps*, 10 Gbps* or 100 Gbps* at a three or five year commitment period, a nonrecurring charge will apply for the installation of service. However, if at the end of the one year commitment period, the customer elects to renew their one year commitment plan or revert to the month-to-month rates, a nonrecurring charge will not apply.

(B) Monthly recurring charges are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

* Rates for 2.5 Gbps, 10 Gbps and 100 Gbps Ethernet Transport Service may be obtained by contacting your account manager.

7.4.20 Ethernet Virtual Private Line

The rates and charges for Ethernet Virtual Private Line (EVPL) service are set forth in Sections 7.5.18 and 22.5.18 following and are in addition to any applicable rates and charges set forth in any other sections of this service guide. Monthly recurring rates and nonrecurring charges applicable for EVPL service are billed in advance.

(A) Monthly Recurring Charges

Monthly recurring charges are flat recurring rates that apply each month or fraction thereof that a specific rate element is provided regardless of the amount of usage. For billing purposes, each month is considered to have 30 days.

(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for a specific work activity (i.e., installation of service or change to an existing service) and are developed at full cost recovery on a labor hours per labor time basis. In addition, an EVPL Reconfiguration charge, as set forth in 7.5.18 and 22.5.18 following, will apply for each Ethernet Virtual Connection (EVC), Operator Virtual Connection (OVC) or Quality of Service (QoS) established initially or when the customer requests the EVC, OVC or QoS be reconfigured after the initial set up. The EVPL Reconfiguration charge is in addition to all applicable charges associated with the new configuration. The EVPL Reconfiguration charge will not apply to customers who purchase EVPL under a 7 year Fixed Rate Term Plan (FRTP).

Special construction charges, as set forth in Section 14 following, may apply when technical limitations and/or lack of facilities exist, or if it is necessary to construct facilities to satisfy service requests.

(C) Term Discount Plan

The Service Element Term Plan is a Term Discount Plan (TDP) available for EVPL service and applies to UNI and NNI port connections, EVC/OVC connections, ICO NNI Trunk Connection Charge and QoS. A TDP provides the customer discounted rates for the rate elements listed.

The customer has the option of ordering EVPL under a term commitment period of 1, 2, 3 or 5 years. The customer must notify the Company in writing the length of its selected term commitment period. In order for a circuit to be eligible for TDP pricing, the customer must commit a UNI and/or NNI port connection to a TDP. All committed ports must be ordered for the same term commitment period (i.e., all 3 years or all 5 years) and remain in-service at the same bandwidth capacity throughout the entire term commitment period. UNI or NNI port connections installed after the establishment of the customer's TDP may be ordered on a month-to-month basis or added as additional committed ports to a customer's existing term commitment period as described in (1) following.

The monthly rates for EVPL service under a TDP are set forth in 7.5.18 and 22.5.18 following.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

Although the customer commits the UNI and NNI port connections to the TDP, the following rate elements will receive TDP rates:

UNI Port Connection
NNI Port Connection
EVC/OVC Connections
ICO NNI Trunk Connection Charge
QoS

Since there is no bandwidth or minimum commitment levels required for the UNI or NNI port connections under the TDP, disconnection of or change in the number or bandwidth capacities for these elements do not affect the customer's TDP.

Except as specified in (1) through (3) following, termination liability charges will apply when the customer fails to satisfy the term commitment period or the in-service requirements for their committed port connections.

Rate increases or decreases will automatically be applied to the monthly recurring rates for the remaining term of the TDP. If a Company initiated rate increase causes a customer's rate to increase by 10% or more at any one time, the customer may cancel their TDP without incurring termination liability charges.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

At the end of the term commitment period, the customer may subscribe to a new TDP commitment period or to month-to-month rates. If the customer does not notify the Company in writing within 60 calendar days prior to the expiration of their 1, 2, 3 or 5 year term commitment period, the term commitment period and TDP rates and conditions in effect at the time of expiration will automatically renew.

(1) Addition of UNI/NNI Port Connection

When the customer requests the addition of a port connection, the customer will choose one of the following options when ordering a new port connection during its existing term commitment period:

(a) Add the new port connection to its existing TDP, provided the customer commits to retain the newly installed port connection in-service at the same bandwidth capacity for the remainder of the existing term commitment period. The term commitment period of the customer's existing TDP will continue uninterrupted.

(b) Convert the existing TDP in its entirety with a new TDP as described in (3) following.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(2) Upgrading a Committed UNI/NNI Port Connection

(a) A TDP customer may upgrade a committed port connection without incurring termination liability charges, as set forth in (4) following, provided:

(1) the bandwidth capacity of the upgraded committed port connection is greater than the bandwidth capacity of the original committed port connection; and

(2) the customer commits to retain the upgraded committed port connections in-service for the remainder of the existing term commitment period; and

(3) the customer purchased the original committed port connection to offer to third party end users and the end user is the same for both the original committed port connection and the upgraded committed port connection. In the case of a move to a different building, the end user must be the same at the old and the new location.

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(3) Converting a TDP

(a) The customer may convert an existing TDP with a Fixed Rate Term Plan (FRTP) described in (D) following without incurring termination liability charges provided the bandwidth capacity of the committed FRTP port connections meets the minimum bandwidth capacity requirement of the FRTP.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(4) Termination Liability

Except as provided for in (2) and (3) preceding, termination liability charges will apply as follows:

(a) the customer disconnects a committed TDP port connection prior to the end of the term commitment period;

(b) the customer discontinues an existing TDP in its entirety prior to the end of the term commitment period; or

(c) the customer converts an existing TDP to a new TDP that does not satisfy the requirements specified in (3) preceding.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(4) Termination Liability (Cont'd)

The termination liability charge will be equal to 50% of the total monthly recurring rates for each committed TDP port connection included in the customer's TDP for each month remaining in the term commitment period.

The following examples illustrate how the Company will calculate the applicable termination liability charges.

Example 1

A customer discontinues its existing TDP in its entirety in the 20th month of a 3 year term commitment period. The customer included three 100 Mbps committed port connections when they established their initial term plan commitment.

Using an illustrative monthly rate of $300.00 for the 100 Mbps committed port connection, the Company would bill the customer termination liability charges totaling $7,200.00 (i.e., $300.00 x 50% x 3 port connections x 16 months remaining in the term commitment period).

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(4) Termination Liability (Cont'd)

Example 2

A customer discontinues one of the four 30 Mbps committed port connections included in their TDP in the 39th month of a 5 year term commitment period. The customer included all four of these port connections when they established their initial TDP.

Using an illustrative monthly rate of $100.00 for a 30 Mbps committed port connection, the Company would bill the customer termination liability charges totaling $1,050.00 for the disconnection of the one port connection (i.e., $100.00 x 50% x 21 months remaining in the term commitment period).

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(C) Term Discount Plan (Cont'd)

(5) Termination Liability - Downgrades

The customer may subsequently decrease existing speed or capacity for EVPL port connections, QoS and EVC/OVC (i.e., 100 Mbps to 50 Mbps; 1 Gbps to 100 Mbps) as low as the previously configured speed without being assessed termination liability. If the customer chooses to decrease the existing speed or capacity to a lower bandwidth than what was on the previous order prior to the expiration date of the fixed period service rate plan, termination liability will apply. However, if the customer commits to a new term discount plan and if the total monthly recurring revenue of the new service is equal to or greater than 115% of the remaining value of the existing Term Discount Plan, no termination liability will apply.

The customer must note on the order that the speed or capacity is being downgraded.

The new service due date must be within 30 days of the due date of the disconnection of the old service, unless the installation is delayed due to Company reasons; and

New minimum service period applies to the new service; and

The customer agrees to pay all outstanding recurring and nonrecurring charges (these charges will not be included in the new service pricing plan); and

Applicable nonrecurring charges apply and are the charges in effect at the time the service is changed.

Example: 5 year Term Discount Plan: Previous Order: 1000Mb UNI Port @ $800.00 + 50Mb EVC/OVC @ $530/ea + Gold 50MB QoS @$470.00 = $1,800.00. Total monthly recurring revenue over 5 years is $108,000.00. Customer decreases from 50Mb EVC/OVC in month 24, to a 20Mb EVC @ $420 and decreases to Silver 20MB QoS @ 51.00 along with original 1000MB UNI Port @ $800.00 = $1,271.00. The customer must commit the circuit to a new 5 year term for a total monthly recurring revenue over 5 years of $76,260.00. The remaining value of the previous order (36 months) is $64,800. The new 5 year commitment is greater than the required 115% of the remaining value ($64,800) of the existing term plan, so no termination liability applies.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans

The following Fixed Rate Term Plans (FRTPs) are available for EVPL service. These plans are described in detail in 7.4.20 (D) (5), (6), (7) and (8):

Service Element Term Plan – 7 Year Term
Bandwidth Profile – Monthly and 12, 24, 36 and 60 Month Terms
High Volume Based Plan – 7 Year Term
Low Volume Based Plan – 7 Year Term

The Service Element Term Plan is available for customers who generally have only one EVC/OVC. The Bandwidth Profile is available for customers who want a pricing advantage to order multiple EVC/OVC's. The High Volume Based Plan is available for customers who purchase a minimum of 1,896 locations during the first calendar year. The Low Volume Based Plan is available for customers who purchase a minimum of 100 locations during the first calendar year.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

The customer may move the EVPL circuit and replace it with another EVPL circuit at a different location during the term commitment without early termination liability charges provided (1) the customer agrees to retain the new EVPL circuits at the new location for the remainder of the term period; (2) the relocated EVPL circuit is of equal or greater value than the one being removed; (3) customer submits the orders for the disconnection of the existing EVPL circuit and the installation of the new EVPL circuit at the new location at the same time; and (4) the new EVPL must be ordered under the same term plan as the existing circuit being disconnected.

If the provisions set forth in the previous paragraph are not met, then termination liability charges, set forth in (3) following, will apply for the customer's failure to satisfy the term commitment period requirement for their committed port connections.

Nonrecurring charges will not apply to EVPL arrangements installed under the High Volume and Low Volume Based Plans. Monthly rates for the entire term commitment period of the FRTP will not be increased by the Company for the term commitment period for each EVPL arrangement.

At the end of the term commitment period, the customer may subscribe to a new EVPL commitment period or to month-to-month rates. If the customer does not notify the Company in writing within 60 calendar days prior to the expiration of their term commitment period, the commitment period, rates and conditions in effect at the time of expiration will automatically renew.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(1) Upgrades

Customers who subscribe to a term discount plan (TDP) or premier term discount plan (PTDP) under 7.4.11 and 7.4.16 preceding or an EVPL TDP in (C) preceding may upgrade those services to an EVPL Fixed Rate Term Plan (FRTP) without incurring termination liability charges. The time in service under the TDP, PTDP or EVPL TDP will count toward the minimum term commitment period of the FRTP. For example, if a customer upgrades their PTDP after 24 months to the 7 Year FRTP, they will have 60 months remaining in the FRTP. The customer must upgrade to a minimum circuit bandwidth capacity of 50 Mbps.

Customers may upgrade existing speed or capacity for EVPL port connections, QoS and EVC/OVC (i.e., 50 Mbps to 100 Mbps; 100 Mbps to 1 Gbps) without incurring termination liability charges and time in service under the existing EVPL service will count toward the term commitment period for the new EVPL arrangement.

(2) Downgrades

The customer may subsequently decrease existing speed or capacity for EVPL port connections, QoS and EVC/OVC (i.e., 100 Mbps to 50 Mbps; 1 Gbps to 100 Mbps) as low as the previously configured speed without being assessed termination liability. If the customer chooses to decrease the existing speed or capacity to a lower bandwidth than what was on the previous order prior to the expiration date of the FRTP, termination liability will apply. However, if the total monthly recurring revenue of the new service is equal to or greater than 115% of the remaining value of the existing term plan, no termination liability will apply.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(2) Downgrades (Cont'd)

The customer must note on the order that the speed or capacity is being downgraded.

The new service due date must be within 30 days of the due date of the disconnection of the old service, unless the installation is delayed due to Company reasons;

New minimum service period applies to the new service,

The customer agrees to pay all outstanding recurring and nonrecurring charges (these charges will not be included in the new service pricing plan); and

Applicable nonrecurring charges apply and are the charges in effect at the time the service is changed.

Example: 7 year High Volume Based Plan: Previous Order: 1000Mb UNI Port @ $3,726.00 + 4 – 100Mb EVCs @ $25/ea = $3,826.00. Total monthly recurring revenue over 7 years is $321,384.00. Customer decreases from 1000Mb port in month 24, to a 700Mb UNI Port @ $3,145 + 4 – 100Mb EVCs @ $25/ea = $3,245.00. The customer must commit the circuit to a new 7 year term for a total monthly recurring revenue over 7 years of $272,580. The remaining value of the previous order (60 months) is $229,560. The new 7 year commitment is greater than the required 115% of the remaining value ($229,560) of the existing term plan, so no termination liability applies.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(3) Termination Liability

Except where termination liability is waived as set forth in this section, if during the term of the Fixed Rate Term Plan (FRTP) the customer disconnects an EVPL arrangement prior to the expiration of the 7 Year minimum commitment period, termination liability charges will apply as follows:

(a) an amount equal to 100% of monthly recurring charges for each EVPL arrangement disconnected for the months remaining for year 1 of the 7 year term commitment period of the FRTP, if any, plus

(b) an amount equal to 50% of monthly recurring charges for each EVPL arrangement disconnected for the months remaining in year 2 through year 5 of the 7 year term commitment period of the Fixed Rate Term Plan (FRTP), if any, plus

(c) an amount equal to 20% of monthly recurring charges for each EVPL arrangement disconnected for the months remaining in year 6 through year 7 of the 7 year term commitment period of the FRTP.

The following example illustrates how the Company will calculate the applicable termination liability charges.

Example:

A customer discontinues an EVPL arrangement committed to the FRTP in month 20 of the 7 year minimum term commitment period. Using an illustrative monthly recurring rate of $1800.00 for the EVPL arrangement, the Company would bill the customer termination liability charges totaling $44,640.00.

$1800.00 @ 50% = $900.00 x 40 months = $36,000.00

$1800.00 @ 20% = $360.00 x 24 months = $8,640.00

$36,000.00 + $8,640.00 = $44,640.00

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(3) Termination Liability (Cont'd)

Should the customer choose to discontinue fixed period service prior to completion of the minimum service period of the Bandwidth Profile, termination charges will apply. The termination charge is 100% of the minimum billing level for the remaining months of the minimum service period, plus 40% for EVPL, of the remaining portion of the fixed period service. Should the customer choose to discontinue fixed period service after the completion of the minimum service period, termination charges equal to 40% for EVPL, of the minimum billing level for the remaining portion of the fixed period service will apply. For example, if an EVPL customer discontinues a service after completing 17 months of a 36-month term, the termination charge will be the minimum billing level for the service, multiplied by 40%, multiplied by 19 months.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(4) Chronic Interruption

For purposes of the Fixed Rate Term Plan (FRTP), a Chronic Interruption is defined as (1) an interruption in service due to a failure on the core portion of the EVPL network on four (4) or more separate occasions of five (5) minutes or more each, or twenty-four (24) hours or more in the aggregate, in any calendar month; or (2) both EVC/OVCs do not meet network latency, jitter or packet delivery performance standards provided in 7.4.20(E)(2) following in any three (3) separate months during any period of six (6) consecutive months.

When a customer orders EVPL under a FRTP and a Chronic Interruption occurs with respect to EVPL, the Company will provide to the customer, within ten (10) calendar days of the last interruption or within a month after any failure to meet the network latency, jitter or packet delivery performance standards, a detailed report with respect to such interruptions on the EVPL service that will include the root causes of such interruptions, remedial actions being taken to prevent similar future interruptions and timelines for the completion of such actions. The Company will provide bi-weekly written updates on the progress of such remedial actions until completed to the reasonable satisfaction of the customer. The timeline for the completion of such remedial actions will not exceed thirty (30) days. If after the completion of such remedial actions an interruption or performance failure occurs on the same EVPL service, or the Company fails to complete such remedial action within such thirty (30) day period, the customer may terminate the affected EVPL service without incurring early termination liability charges, upon providing written notice of such termination to the Company within twelve (12) months of the date of the last interruption or failure to meet the network latency, jitter or packet delivery performance standards triggering a Chronic Interruption.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans

(5) Service Element Term Plan

A Service Element Term Plan is available for EVPL service and applies to UNI and NNI port connections, EVC/OVC connections and QoS. This plan provides the customer discounted rates for the rate elements listed below.

The customer orders the EVPL Service Element Term Plan under a term commitment period of 7 years. In order for a circuit to be eligible for Service Element Term Plan pricing, the customer must commit a UNI and/or NNI port connection to the Service Element Term Plan. All EVPL circuits ordered under the Service Element Term Plan will begin in month one.

The monthly rates for EVPL service under a Service Element Term Plan are set forth in 7.5.18 and 22.5.18 following.

Although the customer commits the UNI and NNI port connections to the Service Element Term Plan, the following rate elements will receive Service Element Term Plan rates:

UNI Port Connection
NNI Port Connection
External NNI Port Connection (E-NNI)
EVC/OVC Connection
QoS
ICO NNI Trunking Arrangement

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(6) Bandwidth Profile (BWP)

The Bandwidth Profile is the standard EVPL offering which uses the native Ethernet protocol to connect multiple enterprise locations with the customer's premises.

A monthly rate is assessed per Bandwidth Profile (BWP) subscribed to and the term plan chosen (12, 24, 36 and 60 month) as set forth in 7.5.19, following. Customers may subscribe to the following:

a. Customer Premises Network Interface (NI) - The Company network interface is the point of interconnection between Company communications facilities and terminal equipment or other customer-provided facilities. The network interface is the point of demarcation on the customer's premises where the Company's responsibility for the provision of EVPL Service ends.

b. EVPL Port - A nonrecurring charge applies per new EVPL Port. A nonrecurring charge for an EVPL Port will also be assessed when an electrical port is changing to an optical port or an optical port is changing to an electrical port. Exception: there will be no charge if a customer goes from one electrical port to another electrical port or from one optical port to another optical port. Customers may choose to connect to an electrical 10/100 port or an electrical or optical 1,000 Mbps port or 10,000 Mbps on the Company network.

The following options are available:

• 10 Mbps Ports: 3 Mbps, 5 Mbps, 7 Mbps and 10 Mbps

• 100 Mbps Ports: 3 Mbps, 5 Mbps, 7 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps and 100 Mbps

• 1,000 Mbps Ports: 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps, 100 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1,000 Mbps (1 Gbps)

• 10,000 Mbps Ports: 2 Gbps, 3 Gbps, 4, Gbps, 5 Gbps, 6 Gbps, 7 Gbps, 8 Gbps, 9 Gbps and 10 Gbps (Available where facilities exist)

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(6) Bandwidth Profile (BWP) (Cont'd)

c. Network to Network (NNI) Port Connection - The Network to Network (NNI) Port Connection is the interface between distinct CENs operated by one or more customers. The NNI Port Connection is available at operating speeds of 1000 Mbps (1 Gbps) and 10000 Mbps (10 Gbps).

d. Ethernet Virtual Connections (EVCs) or Operator Virtual Connections (OVCs) - Each EVPL Port provided by the Company will come standard with the capability to provide an Ethernet Virtual Connection (EVC) or Operator Virtual Connection (OVC). An EVC is associated with a UNI port type, an OVC is associated with an ENNI port type. Customers may order more than one EVC or OVC per port. The Company will bill a monthly EVC or OVC charge per port that the EVC or OVC terminates on, at rates set forth in 7.5.19.B.3, following.

e. Quality of Service (QoS) - Quality of Service (QoS) allows customers to prioritize their traffic managed through the Company's EVPL Service. Rates are set forth in 7.5.18 and 22.5.18, following

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(7) High Volume Based Plan

The High Volume Based Plan is available for EVPL service and requires the customer to purchase a minimum of 1,896 locations of EVPL service from the CenturyLink Operating Companies during the first calendar year they participate in the plan. The High Volume Based Plan includes the UNI Bandwidth Port, NNI Port and Gold QoS Service. EVC's are a separate rate and are offered on a 7 year term. The rates in effect when a circuit is installed are the rates that apply for the entire 7 year term, rate changes that occur after the installation of a circuit do not apply to existing circuits. The rates apply only to the customer locations specified in this service guide. The High Volume Based Plan provides the customer discounted rates for the rate elements listed below.

The customer orders the EVPL High Volume Based Plan under a term commitment period of 7 years. In order for a circuit to be eligible for High Volume Based Plan pricing, the customer must commit the UNI Bandwidth Port and NNI Port to the plan. All EVPL circuits ordered under the High Volume Based Plan will begin in month one.

The monthly rates for EVPL service under the High Volume Based Plan are set forth in 7.5.19 and 22.5.19 following.

Although the customer commits the UNI Bandwidth Port and NNI Port to the High Volume Based Plan, the following rate elements will receive the High Volume Based Plan rates:

UNI Bandwidth Port (includes Gold QoS)

NNI Port (no charge)
EVC Connection
OAM EVC
ICO NNI Trunking Arrangement

An example of the pricing is included in Section 7.4.20 (D). The customer will order the total UNI Bandwidth and the total EVC's to split the bandwidth between.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(D) Fixed Rate Term Plans (Cont'd)

(8) Low Volume Based Plan

The Low Volume Based Plan is available for EVPL service and requires the customer to purchase a minimum of 100 locations of EVPL service from the CenturyLink Operating Companies during the first calendar year they participate in the plan. Special construction charges may apply. The Low Volume Based Plan includes the UNI Bandwidth Port, NNI Port and Gold QoS Service. EVC's are a separate rate and are offered on a 7 year term. The rates in effect when a circuit is installed are the rates that apply for the entire 7 year term, rate changes that occur after the installation of a circuit do not apply to existing circuits. The rates apply only to the customer locations specified in this service guide. The Low Volume Based Plan provides the customer discounted rates for the rate elements listed below.

The customer orders the EVPL Low Volume Based Plan under a term commitment period of 7 years. In order for a circuit to be eligible for Low Volume Based Plan pricing, the customer must commit the UNI Bandwidth Port and NNI Port to the plan. All EVPL circuits ordered under the Low Volume Based Plan will begin in month one.

The monthly rates for EVPL service under the Low Volume Based Plan are set forth in 7.5.19 and 22.5.19 following.

Although the customer commits the UNI Bandwidth Port and NNI Port to the Low Volume Based Plan, the following rate elements will receive the Low Volume Based Plan rates:

UNI Bandwidth Port (includes Gold QoS)

NNI Port
EVC Connection
ICO NNI Trunking Arrangement

An example of the pricing is included in Section 7.4.20 (D). The customer will order the total UNI Bandwidth and the total EVC's to split the bandwidth between.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement

Service Level Agreements (SLAs) will be applied on a per Quality of Service (QoS) basis for Ethernet Virtual Connections (EVCs); traffic representing the different QoS (i.e., Gold, Silver or Best Effort) transported across the same EVC (measured between two NIDs) will have different SLAs. Details of the technical measurements and performance results methodologies for each commitment are provided in the Technical Publications set forth in 7.2.16(B) preceding.

In accordance with 7.4.20 (E)(4) following, credits are available for missed commitments to customers who purchase EVPL. Credits only apply for portions of the service provided by the Company.

- Repair Commitment

The Repair Commitment is measured on a per occurrence basis for each EVC for all QoS. A Fault Report is produced through the Company reporting system that aids identification of potential outage durations upon which credits may be provided.

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

- Network Service Level Commitments

The Network Service Level Commitments are measured on the monthly performance of the EVPL network during a specific calendar month by QoS. A SLA report is produced through the Company reporting system that provides details of missed Network Service Level Commitments by QoS upon which credits may be provided upon a specific calendar month's performance results.

The Company's performance measurement data for the Repair Commitment and Network Service Level Commitments will be collected and calculated utilizing the Company's internal processes. The Company's calculation of its performance will be consistent with the Company's obligations to provide a credit for a missed performance commitment set forth following for SLA credits.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(1) SLA Definitions

Time to Repair

Time to Repair measures the duration of the interruption on the customer's EVPL for all QoS. This measurement will require the customer to report the problem to the Company. For EVPL, an interruption is defined as a condition that renders an EVPL circuit completely unavailable for use by the customer (i.e., the network is incapable of accepting and delivering customer data).

The repair interval will start with the time the trouble ticket is created and end when the fault is remediated. The SLA measurement will be based on each individual trouble ticket for a customer's connection. Time for scheduled maintenance windows as set forth in 7.2.16(A) preceding does not count towards SLA threshold.

The SLA will be calculated for each individual interruption. An example of the calculation is displayed below:

Example: Based on 15 hours of interruption

Total MRC of $1,200.00 * 3/30 = Credit amount of $120.00

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(1) SLA Definitions (Cont'd)

Network Availability

Network Availability measures the percentages of time by QoS during a calendar month that the customer's service is available.

The SLA will be calculated by QoS by taking the total number of minutes in a day times the number of calendar days in a month, minus the number of minutes of interruption during the month divided by the number of minutes in a day times the number of calendar days in the month. The Company will not round up to the next nearest percent in order to meet the Network Availability service level commitment of 99.995%. Excluded from the outage time and service time are scheduled maintenance windows, set forth in 7.2.16(A) preceding, and the time the network was unavailable due to circumstances outside of Company's control, as set forth in 7.4.20(E)(3) following. An example of the calculation is displayed below:

Example: 1440 * 30 = 43200; 43200 – 1200 = 42000,
42000 / 43200 = 97.222%

Total MRC of $1,200.00 * 3/30 = Credit amount of $120.00

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(1) SLA Definitions (Cont'd)

Network Latency

Network Latency measures average two-way delay (including link insertion delays, propagation delays and queuing delays in the network) in milliseconds within the EVPL access service area.

This SLA will be calculated for each QoS, except for Best Effort, by averaging the measured latency of "in-band" test frames for each eligible QoS within the EVPL network (i.e., between each pair of connections on a NID to NID basis) during a calendar month. An example of the calculation is displayed below:

Example: Monthly average was 12 ms (round-trip).

Total MRC of $1,200 * 3/30 = Credit amount of $120.00

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(1) SLA Definitions (Cont'd)

Jitter

Jitter measures the variance in frame delay (in milliseconds) between two performance test frames as measured at the ingress and egress NIDs for Gold and Silver QoS.

This SLA will be calculated for the Gold and Silver QoS by averaging the measured jitter of "in-band" test frames for each of the customer's eligible QoS queue within the EVPL (i.e., between each pair of connections) during a calendar month. An example of the calculation is displayed below:

Example: Monthly average was 5 ms.

Total MRC of $1,200 * 3/30 = Credit amount of $120.00

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(1) SLA Definitions (Cont'd)

Packet Delivery

Packet Delivery measures the percentage of packets conforming to the committed EVC bandwidth successfully delivered across the network (i.e. NID to NID) without being dropped or lost.

This SLA will be calculated for each QoS, except for Best Effort, by averaging the measured packet delivery of "in-band" test frames for eligible QoS within the EVPL network (i.e., between each pair of connections) during a calendar month. An example of the calculation is displayed below:

Example: Monthly average was 98%

Total MRC of $1,200 * 3/30 = Credit amount of $120.00

(2) The Company's Service Level Commitments for EVPL are as follows:

Time to Repair

- Best Effort QoS – Not applicable
- Silver QoS – 4 hours or less
- Gold QoS – 4 hours or less

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(2) (Cont'd)

Network Availability

- Best Effort QoS – Not Applicable
- Silver QoS – 99.95% or greater
- Gold QoS – 99.995% or greater

Latency (two-way)

- Best Effort QoS – Not Applicable
- Silver QoS – 20 milliseconds or less
- Gold QoS:

  - 10 ms or less (routes up to 225 one-way air miles)
  - 12 ms or less (routes of 225 to 315 one-way air miles)
  - 14 ms or less (routes of 316 to 405 one-way air miles)
  - Increase by 2 ms for every 90 one-way air miles exceeding 405 miles.

Jitter

- Best Effort QoS – Not Applicable
- Silver QoS – 4 milliseconds
- Gold QoS – 1 millisecond or less

Packet Delivery

- Best Effort QoS – Not Applicable
- Silver QoS – 99.95% or greater
- Gold QoS – 99.995% or greater

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(3) SLA Obligations

The Company SLAs are defined in (1) and (2) preceding and are in addition to the following:

- A customer must subscribe to the Gold or Silver QoS that is provided with reporting to receive credits for missed service level commitments; and

- Credits are not provided for a partial month service; and

- A customer's account must be current to receive a credit.

(a) When an SLA Credit Does Not Apply

SLA credits do not apply when any stated objective is not met because the Company does not have control over the circumstances causing the objective to be missed or when the missed objective is not caused by the Company's negligence or fault. Situations over which the Company does not have control, include, but are not limited to, the following:

- any negligence or willful misconduct on the part of the customer, its agents or contractors;

ACCESS SERVICE

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(3) SLA Obligations (Cont'd)

(a) (Cont'd)

- labor difficulties, governmental orders, civil commotions, acts of civil or military authority, embargoes, epidemics, declared National Emergencies, criminal actions against the Company, war, terrorist acts, riots, insurrections, fires, explosions, nuclear accidents, power blackouts, acts of God (including, but not limited to, earthquakes, floods or unusually severe weather) or other circumstances beyond the Company's control;

- when it is necessary for the Company to perform preventive maintenance and software upgrades and the EVPL service will be unavailable during the period of time when the preventive maintenance is being performed;

- the customer's premises equipment, including customer owned power and environmental conditions, located on the customer's premises; and

- unavailability of the customer's facilities caused by the customer or any third party.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(3) SLA Obligations (Cont'd)

(b) When an SLA Credit Applies

When the Company has not provided a SLA credit, the customer may request a SLA credit. A customer request for a Network Service Level SLA credit must be submitted on a standard request form issued by the Company that includes the month the SLA commitment was missed, accurate identifications of the affected circuit and the observed measurement of the specific SLA that was missed. A customer request for a Repair SLA credit must be submitted on a standard request form issued by the Company that includes the month the SLA commitment was missed, accurate identification of the affected circuit and the trouble ticket number of the repair request.

The Company will investigate customer requests for any SLA credits to determine the cause of any performance failures reported by the customer. The Company will investigate the customer's request over a period of up to 45 calendar days. The 45-day period will begin when the customer makes the request for credit with the Company representative.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(4) SLA Credits for Ethernet Virtual Connections (EVCs) with Reporting

The following credits will apply when the Company misses a SLA on any single QoS as described following. A maximum of one credit for each SLA will be applied monthly per EVC for a SLA not met for any QoS that is supported by the customer's QoS profile.

Time to Repair:

- 0 to 4 hours per incident: no credit.
- Over 4 hours to 24 hours per incident: a credit equal to 3/30 of the monthly recurring charges for all the rate elements associated with the affected EVC.
- Each additional 24-hour period, per incident: credit an additional amount equal to 3/30 of the monthly recurring charges for all the rate elements associated with the affected EVPL service.

Network Availability: a credit equal to 3/30 of the monthly recurring charges for all the rate elements associated with the affected EVPL service.

Network Latency: a credit equal to 3/30 of the monthly recurring charges for all rate elements associated with the affected EVPL service.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(4) SLA Credits for Ethernet Virtual Connections (EVCs) with Reporting (Cont'd)

Jitter: a credit equal to 3/30 of the monthly recurring charges for all the rate elements associated with the affected EVPL service.

Packet Delivery: a credit equal to 3/30 of the monthly recurring charges for all rate elements associated with the affected EVPL service.

The SLA credit amount will be determined by applying the credits outlined above to the rate elements or total billed revenues specified following.

The total credits issued for all SLAs for a specific EVC during a single bill period may not exceed the total monthly recurring charges billed for all the rate elements associated with that EVPL service. Credits are not provided for partial month service.

(a) Time to Repair Credit – The service level commitment measurement will be based on each individual trouble ticket for a customer's connection. Multiple trouble tickets on the same day for the same customer connection will only be eligible for one time to repair credit. The SLA credit will apply to the monthly recurring charges for all the rate elements associated with the affected EVPL service.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.20 Ethernet Virtual Private Line (Cont'd)

(E) Service Level Agreement (Cont'd)

(4) SLA Credits for Ethernet Virtual Connections (EVCs) with Reporting (Cont'd)

(b) Network Availability Credit – The service level commitment measurement will be based on a specific calendar month's performance. The credit will apply for each EVC that does not meet the availability commitment. The SLA credit will apply to the monthly recurring charges for all the rate elements associated with the affected EVPL service.

(c) Latency Credit – The service level commitment measurement will be based on a specific calendar month's performance. The credit will apply for each EVC that does not meet the latency commitment for any eligible QoS. The SLA credit will apply to the monthly recurring charges for all the rate elements associated with the affected EVPL service.

(d) Jitter Credit – The service level commitment measurement will be based on a specific calendar month's performance. The credit will apply for each EVC that does not meet the jitter commitment for any eligible QoS. The SLA credit will apply to the monthly recurring charges for all the rate elements associated with the affected EVPL service.

(e) Packet Delivery Credit – The service level commitment measurement will be based on a specific calendar month's performance. The credit will apply for each EVC that does not meet the packet delivery commitment for any eligible QoS. The SLA credit will apply to the monthly recurring charges for all the rate elements associated with the affected EVPL service.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS)

The rates and charges for OWS service are set forth in the following and are in addition to any applicable rates and charges set forth in any other sections of this service guide. Nonrecurring charges and monthly recurring rates applicable for OWS service are billed in advance.

(A) Monthly Rates

Monthly rates are recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days.

(B) Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply for Special Access Service are: Installation of Service and Service Rearrangements. These charges are in addition to the Access Order Charge as specified in 5.2.2 and 23.4.1.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS) (Cont'd)

(B) Nonrecurring Charges (Cont'd)

(1) Installation of Service

Nonrecurring charges apply to each service installed. The nonrecurring charges for the installation of service are set for each channel type as a nonrecurring charge for the Channel Termination.

(2) Service Rearrangements

Service rearrangements are changes to existing (installed) services which may be administrative only in nature, as set forth following, or that involve actual physical change to the service.

- Changes to pending orders are set forth in 5.4 preceding.

- Changes in the physical location of the point of termination or customer designated premises are moves as set forth following.

- Changes in the type of Service or Channel Termination which result in a change of the minimum period requirement will be treated as a discontinuance of the service and an installation of a new service.

- Changes in ownership or transfer of responsibility from one customer to another will be treated as a discontinuance of the service and an installation of a new service. In the event the change in ownership or transfer of responsibility is as set forth in 2.1.2(A) preceding where there is no change in facilities or arrangements, the change will be treated as an administrative change.

Administrative changes will be made without charge(s) to the customer. Administrative changes are as follows:

- Change of customer name;
- Change of customer or customer's end user premises address when the change of address is not a result of physical relocation of equipment;
- Change in billing data (name, address, or contact name or telephone number);
- Change of agency authorization;
- Change of customer circuit identification;
- Change of billing account number;
- Change of customer test line number;
- Change of customer or customer's end user contact name or telephone number; and
- Change of jurisdiction.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS) (Cont'd)

(B) Nonrecurring Charges (Cont'd)

(2) Service Rearrangements (Cont'd)

All other service rearrangements will be charged as follows:

- If the change involves the addition of other customer designated premises to an existing service, the nonrecurring charge for the channel termination rate element will apply. The charge(s) will apply only for the location(s) that is being added. The charge(s) will be in addition to an Access Order Charge as set forth in 5.2.2 and 23.4.1.

(C) Moves

Regulations for Moves for OWS are set forth in Section 7.4.5, preceding.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS) (Cont'd)

(D) Pricing Plans

OWS service is available on a month-to-month basis or for a period of one, three or five years. All OWS arrangements will begin in month one. If the customer requests that the service be disconnected prior to completion of the minimum service period of 12 months, termination liability charges equal to 100% of the total monthly recurring charges for the remaining months of the minimum service period plus 70% of the total monthly recurring charges for the remaining months of the term. Any termination after the minimum service period of 12 months termination liability charges equal to 70% of the remaining months of the term will apply. For example, a customer disconnecting in the 12th month of a 3 year plan will be charged 70% of the remaining 24 months of billing. The Federal Government and its authorized agents are exempt from the 50% termination liability penalty charge if service is discontinued prior to the expiration of the one, three or five year minimum commitment period.

Additionally, customers may disconnect OWS service, without penalty, should the total monthly recurring rates associated with OWS service increase by 10% or more at any one time. The customer must notify the Company in writing within 90 days after the effective date of the rate increase if they elect to discontinue service. Rate decreases will automatically be applied to the monthly recurring rates for the remainder of the service.

If the customer does not specify renewal terms in writing 90 days prior to the expiration of the one, three or five year period, the commitment period and OWS service rates in effect at the time of expiration will automatically renew. Alternatively, 90 days prior to the expiration of the one, three or five year period the customer may specify in writing their intent to continue use of the services under month-to-month rates. The customer can terminate OWS service at the end of the minimum commitment period with no penalty or obligation to continue the service. Further, if the customer notifies the Company in writing 90 days prior to the expiration date of their minimum commitment period with their intent to not renew their OWS service, the customer will have six (6) months after the expiration date to submit their disconnect order(s). If the customer fails to submit their disconnect order(s), by the end of the six (6) month period, the commitment period in effect at the time of the original expiration period will automatically renew at the current service guide rates.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS) (Cont'd)

(D) Pricing Plans (Cont'd)

If the customer submits their disconnect orders(s) after the six (6) month period, termination liability charges will apply. Termination liability charges will be calculated at 50% of the monthly recurring charges for the remaining months of the commitment period up to a maximum of twelve (12) months. Time from the expiration of the original commitment period until the disconnect order(s) are received will apply for calculation of the termination liability charges.

(E) Upgrades

Customers may upgrade OWS without incurring termination liability charges under the following circumstances:

(1) The order for the disconnect of the existing OWS and the order for the upgraded OWS must be received at the same time.

(2) The new OWS is provided between the same customer and central office locations as the discontinued service.

(3) The service period of the new OWS is equal to or greater than the service period of the existing OWS service.

7. Special Access Service (Cont'd)

7.4 Rate Conditions (Cont'd)

7.4.21 Optical Wavelength Service (OWS) (Cont'd)

(F) Termination Liability – Downgrades

If the customer chooses to decrease the existing speed or capacity to a lower bandwidth than what was on the previous order prior to the expiration date of the fixed period service rate plan, termination liability will apply. However, if the customer commits to a new term discount plan and if the total monthly recurring revenue of the new service is equal to or greater than 115% of the remaining value of the existing term plan, no termination liability will apply.

The customer must note on the order that the speed or capacity is being downgraded.

The new service due date must be within 30 days of the due date of the disconnection of the old service, unless the installation is delayed due to Company reasons.

New minimum service period applies to the new service; and

The customer agrees to pay all outstanding recurring and nonrecurring charges (these charges will not be included in the new service pricing plan); and

Applicable nonrecurring charges apply and are the charges in effect at the time the service is changed.

Service Guarantee Regulations are set forth in Section 2.4.4, preceding.

7.5.19 Ethernet Virtual Private Line Fixed Rate Term Plans (Cont'd)

(B) Bandwidth Profile [1] (Cont'd)

(3) Ethernet Virtual Connection (EVC) / Operator Virtual Connection (OVC) [2]

| | Monthly Rate |
|---|---|
| Monthly Per EVC/OVC Per Port | $50.00 |

(4) Network to Network (NNI) Port Connection

a. 1,000 Mbps

| | Monthly Rate |
|---|---|
| • Monthly | $ 3,585.74 |
| • 12 Months | $ 3,414.99 |
| • 24 Months | $ 3,252.38 |
| • 36 Months | $ 3,097.50 |
| • 60 Months | $ 2,950.00 |

b. 10,000 Mbps,

| | |
|---|---|
| • Monthly | $ 10,757.23 |
| • 12 Months | $ 10,244.98 |
| • 24 Months | $ 9,757.13 |
| • 36 Months | $ 9,292.50 |
| • 60 Months | $ 8,850.00 |

(5) Quality of Service (QoS)

See QoS rates in Section 7.5.18 and 22.5.18.

[1] For the Bandwidth Profile, Section 7.5.19.B 1, 2, 3, and 4, the rates and charges in this section apply to all special access customers served by the Telephone Company, including customers in the pricing flexibility Metropolitan Statistical Areas (MSAs) listed in Section 22.3 following.

[2] Rates for the Ethernet Virtual Connection (EVC)/Operator Virtual Connection (OVC) and Network to Network (NNI) Port Connection displayed on this page are available for the Bandwidth Profile only.
